<sup>1</sup> Average of taxable bonds due or callable in 15 years and over. See 1943 Statistical Abstract, table 407 for average prices of partially tax-exempt U. S. Government bonds.  
<sup>2</sup> Prices derived from average yields on basis of a 4 percent 20-year bond.  
<sup>3</sup> Prices derived from averages of median yields. For defaulted issues price series is average of actual prices.  
<sup>4</sup> Prices derived from averages of median yields on noncallable high-grade stocks on basis of a \$7 annual dividend.  
<sup>5</sup> Series discontinued beginning Dec. 1, 1947. Average for 1947 based on figures for 11 months.

<sup>1</sup> Long-term partially tax-exempt; none after 1945. Average yields on taxable bonds due or callable in 15 years and over are as follows: 1942, 2.46; 1943, 2.47; 1944, 2.48; 1945, 2.37; 1946, 2.19; 1947, 2.25.  
<sup>2</sup> High-grade non-callable, including public utility and industrial.  
<sup>3</sup> Average of monthly figures computed by dividing the aggregate annual dividends being paid as of the end of each month by the market value of all outstanding shares of the companies as of the same date.  
<sup>4</sup> Includes 15 banks and 10 insurance stocks.  
<sup>5</sup> Average of figures for June to December.

No. 498.—PROFITS AND DIVIDENDS OF INDUSTRIAL CORPORATIONS: 1939 TO 1947

[Includes data for 629 large corporations, none with assets of less than \$250,000. Representation very limited for companies with assets between \$250,000 and \$5,000,000. Excludes data for some important nondurable goods industries, such as meat packing, sugar refining, and rubber. Net profits are before dividends and after all charges, such as depreciation, interest, special reserves charged as expenses, and all taxes. Few companies report aggregate dollar dividends quarterly; for most companies represented, dividends are computed for each class of stock on basis of dividends per share and number of shares outstanding. Data not available before 1939. For net profits of all corporations as compiled from income-tax returns, see tables 365 and 366, pages 351 and 352]

[In millions of dollars]

<sup>1</sup> Excludes data for banks, insurance companies, building and loan associations, foreigners, nonprofit associations, and governmental bodies and agencies.

<sup>2</sup> Estimates of demand deposit balances as they would appear on records of depositors. They differ from figures based on bank records such as given in regular banking statistics. Depositor-record estimates are lower than bank-record estimates; for example, total demand deposits as of Dec. 31, 1946, on a holder-record basis amounted to \$4.6 billion dollars while on a bank-record basis these deposits amount to \$6.7 billion.

<sup>3</sup> Includes outstanding amounts of excess profits tax refund bonds beginning Dec. 1945, as follows: Dec. 1945, 1,128 million dollars; June 1946, 58 million dollars; Dec. 1946, 29 million dollars. Excludes 602 million dollars of armed forces leave bonds outstanding on Dec. 31, 1946, redeemable Sept. 2, 1947.

<sup>4</sup> Includes real estate companies, finance and credit companies, insurance agencies (not carriers), investment trusts, security brokers and dealers, holding companies not otherwise classified, etc.

<sup>5</sup> Includes only amounts administered by corporate trustees.

<sup>6</sup> Includes holdings of farmers and professional persons.

## No. 502.—CAPITAL ISSUES—SUMMARY, BY CLASSES: 1923 TO 1947

[In millions of dollars. Data cover domestic and foreign issues in United States. Preferred stocks of no par value and all common stocks are taken at offering price, other issues at par, except that in figures for corporate issues for 1917 and 1918 all stocks are included at market value. Corporate issues for 1917 and 1918 exclude real estate offerings and privileged stock subscriptions included in figures beginning 1919, and issues of less than \$100,000. State and municipal issues include bonds issued by States, Territories, and possessions, counties and municipalities, and by school and road districts and other independent governmental bodies]

### No. 505.—INDUSTRIAL AND COMMERCIAL FAILURES—NUMBER AND LIABILITIES: 1857 TO 1947

[Series revised beginning 1933 to exclude real estate and financial companies. These revisions bring failure record more nearly in accordance with type of concerns covered by "Total number of concerns in business," in which no changes were made. Beginning 1939, new series includes voluntary discontinuances with loss to creditors and small concerns forced out of business with insufficient assets to cover all claims, in addition to failures included in former series]

### No. 506.—INDUSTRIAL AND COMMERCIAL FAILURES—NUMBER AND LIABILITIES, BY MONTHS: 1942 TO 1947

(Liabilities in thousands of dollars. Current liabilities include all accounts and notes payable and all obligations, whether in secured form or not, known to be held by banks, officers, affiliated companies, supplying companies, or the Government. Deferred liabilities (the difference between current, as defined above, and the total) are therefore long-term obligations held by the public)

## **17. Communication Systems**

**(Including postal service)**

Financial and operating data for telephone, wire-telegraph, ocean-cable, and radio-telegraph carriers which render domestic and foreign service, are shown in this section. Also included are data relating to radio broadcast stations and networks which operate in the continental United States and its possessions.

Additional statistics on the communication industry as well as statistics on the number of telephones on farms, radios in occupied dwelling units, and the manufacture of communication equipment appear in other sections of this Abstract.

The Bureau of the Census in the Census of Electrical Industries compiled at 5-year intervals beginning in 1902 a report on telephones and telegraphs, covering all systems and lines. The last survey made was for the year 1937. Since the establishment of the Federal Communications Commission in 1934, statistical coverage of communications has been centralized and expanded in that agency.

Reports filed with the Federal Communications Commission cover substantially all of the radio broadcast stations and networks, wire-telegraph, ocean-cable, and radio-telegraph carriers operating in the United States and its possessions. Gross operating revenues of the telephone carriers reporting to the Commission are estimated to include approximately 95 percent of the operating revenues of all telephone carriers in the United States and its possessions. Statistical data compiled from these reports are contained in a volume entitled Statistics of the Communications Industry in the United States, which is published annually by the Federal Communications Commission.

"Bell System," as referred to in this section, consists of the American Telephone & Telegraph Co. and its principal telephone subsidiaries, which comprise all operating telephone carriers having assets in excess of \$1,000,000 and in which the American Telephone & Telegraph Co. owns, directly or indirectly, more than 50 percent of the outstanding voting capital stock.

Data on the postal service, obtained principally from the annual reports of the Postmaster General, are also included in the section.

<b>BELL SYSTEM (INCLUDED ABOVE)</b>						
Miles of wire (thousands).....	15,133	23,134	30,614	66,819	80,586	81,578
Number of telephones (thousands).....	5,087	7,327	9,515	13,726	13,793	16,332
Number of originating calls (millions).....	9,133	14,596	16,597	23,693	25,061	27,667
<b>SYSTEMS REPORTING ANNUAL INCOME OF LESS THAN \$5,000, 1912 AND 1917, AND LESS THAN \$10,000, 1922-37</b>						
Number of systems and lines.....	30,317	51,034	55,930	58,780	43,910	<sup>a</sup> 49,714
Miles of wire (thousands).....	1,229	1,529	1,763	1,559	1,193	<sup>a</sup> 1,260
Number of telephones (thousands).....	1,403	1,763	2,052	1,810	1,140	<sup>a</sup> 1,162
Number of originating calls (millions).....	( <sup>g</sup> )	2,037	2,746	2,418	948	656

<sup>a</sup> Includes 10,550 connecting lines for which separate reports were not secured; data for such lines, however, were included in reports of operating companies supplying switchboard service.

<sup>b</sup> Includes data for connecting lines having fewer than 5 telephones per line, as follows: 11,759 lines, 29,000 telephones; and estimated figures for other items as follows: 44,000 miles of single wire; and \$1,600,000 investment in equipment.

<sup>c</sup> Not reported for systems and lines having less than \$5,000 annual income in 1912. For 1917 and 1922, figures represent number of systems and lines reporting central offices; actual number of central offices was probably slightly larger.

<sup>d</sup> Not reported except for systems and lines with income of \$5,000 or more.

<sup>e</sup> Including assessments of mutual companies, and miscellaneous operating revenues.

<sup>f</sup> 83,378,000 miles of wire in cable and 6,193,000 not in cable.

<sup>g</sup> No data.

<sup>h</sup> No comparable data available.

**No. 516.—TELEPHONE SYSTEMS—SUMMARY, CLASS A CARRIERS: 1926 TO 1946**

[Covers class A telephone carriers filing annual reports with F. C. C. Class A carriers are those whose average annual operating revenues exceeded \$100,000. Gross operating revenues of class A carriers (excluding intercompany duplications of Bell System) reporting in 1937 represented approximately 94 percent of revenues of all telephone carriers as reported for Census of Electrical Industries for that year. (See table 511.) Figures include data for carriers consolidated and merged for which annual data are available. Includes intercompany duplications, but data for 1942-46 excluding such duplications are shown in italics below]

[All money figures in thousands of dollars]

1946 <sup>6</sup>	6,681,967	2,205,825	76.64	263,634	226,600	198,737	110,089	28,308	525,175	1,306,431

<sup>1</sup> Ratio of operating expenses to operating revenues.

<sup>2</sup> The decrease reflected in data shown for 1933 is due mainly to the fact that prior to that year the total of wire jointly owned with other companies was included, whereas from 1933 on, only the respondents' portion of jointly owned wire was included.

<sup>3</sup> Data for 1926 through 1932 include estimates.

<sup>4</sup> In comparing figures in this table, consideration should be given to the minor effect of revisions of Uniform System of Accounts, effective Jan. 1, 1933, and Jan. 1, 1937, resulting in certain changes in and rearrangements of both balance sheet and income statement.

<sup>5</sup> Excluding intercompany duplications.

<sup>6</sup> As of end of October.

**No. 517.—RADIOTELEPHONES—SUMMARY: 1937**

[Covers all companies and systems licensed by United States to engage in reception and transmission of commercial radiotelephone communications. Excludes radiotelephone stations such as amateur, experimental, Federal, police, fire, etc., which were not licensed to charge fees for receiving or sending calls. Survey covered U. S. licensees in United States, Alaska, Hawaii, and Puerto Rico, as well as those operating ship stations]

Number of companies or systems	27
Number of stations (as of Dec. 31)	132
Operating revenues applicable to the radio link (dollars)	1,212,073
Revenue calls, total number	147,896
Foreign traffic of the U. S. (calls subject to overseas regulations)	52,507
Ship traffic of the U. S. (calls subject to overseas, coastal, and harbor regulations)	28,409
Other traffic—Within the United States; <sup>1</sup> within Alaska; <sup>2</sup> within Hawaii; <sup>3</sup> within Puerto Rico; <sup>4</sup> Hawaii and Puerto Rico with other countries except continental U. S. and Alaska with ships...	66,980

<sup>1</sup> Calls originating, terminating, or relayed in United States.

<sup>2</sup> Originating calls only.

Western Union Tel. Co.: 1946	391,757	183,326	97.96	1,614	1,804	-----	2,088	212,899	59,280	141,279

<sup>1</sup> Ratio of operating expenses to operating revenue.

<sup>2</sup> Represents estimates by reporting carriers. Excludes stock and commercial news traffic and telephone toll messages. Mobile and foreign messages, domestic haul, excluded to avoid duplication.

<sup>3</sup> Data for 1926-33 include estimates by reporting carriers.

<sup>4</sup> Deficit or other reverse item.

<sup>5</sup> Includes net book cost of plant of Postal Telegraph, Inc., acquired by The Western Union Telegraph Co. in amount of \$16,754,000 on basis of gross book cost of \$69,320,000 less tentative allowance for depreciation of \$52,566,000.

<sup>6</sup> Represents operating income before deduction of income taxes.

<sup>7</sup> Not comparable with amount reported for Dec. 31, 1943, because of accounting adjustment for Postal Telegraph plant purchased by the Western Union Telegraph Co. Oct. 7, 1943; comparable 1943 amount is \$477,431,000.

<sup>8</sup> Includes \$3,536,000 charged to capital surplus.

<sup>9</sup> As of end of October.

### No. 519.—RADIOTELEGRAPH CARRIERS—SUMMARY: 1926 TO 1946

[All money figures in thousands of dollars. Figures show development of principal carriers filing annual reports with F. C. C. Includes intercompany duplications]

ITEM	1926	1930	1935	1940	1944	1945	1946
Investment in plant and equipment.....	15,800	25,930	29,961	29,735	26,837	28,572	24,016
Operating revenues.....	5,478	7,060	7,956	13,188	16,784	22,460	21,776
Operating expenses including depreciation.....	4,456	6,964	7,630	9,383	12,062	15,180	20,913
Operating ratio (percent) <sup>1</sup> .....	81.34	98.64	95.90	71.15	71.87	67.46	96.04
Operating taxes.....	( <sup>2</sup> )	185	198	1,497	5,485	6,800	773
Operating income <sup>3</sup> .....	1,010	72	35	3,319	4,803	7,173	469
Net income transferred to earned surplus.....	( <sup>4</sup> )	229	1,320	2,086	1,664	2,268	313
Dividends declared.....	( <sup>5</sup> )	-----	1,400	1,838	1,560	850	872
Revenue messages transmitted (thousands) <sup>6</sup> .....	2,685	5,151	6,621	8,569	6,880	10,518	12,672
Number of employees on June 30.....	1,266	2,119	2,641	3,097	3,340	3,880	4,989
Total compensation for year.....	2,211	2,809	3,946	5,791	10,245	14,217	17,833

<sup>1</sup> In comparing data for 1940-46 with prior years, consideration should be given to changes in reporting requirements due to the uniform system of accounts effective Jan. 1, 1940.

<sup>2</sup> Ratio of operating expenses to operating revenues. <sup>3</sup> Data not available.

<sup>4</sup> Beginning 1940, figures are before deduction of income taxes. <sup>5</sup> Deficit.

<sup>6</sup> Includes \$400,000 charged to surplus arising from reduction of capital stock

<sup>7</sup> Includes \$150,000 and \$246,000 charged to capital surplus during years 1940 and 1944, respectively.

<sup>8</sup> Includes data estimated by reporting carriers.

<sup>9</sup> As of end of October.

<sup>10</sup> Includes estimated data.

<sup>1</sup> Excludes agency and commission offices, numbering 11,476 on Dec. 31, 1947.  
<sup>2</sup> Figures for 1915 and prior years represent net income before bond interest.    <sup>3</sup> Deficit.  
<sup>4</sup> Pole and wire mileages reflect acquisition on Oct. 7, 1943, of facilities of Postal Telegraph Companies.  
<sup>5</sup> Effective Jan. 1, 1943, the Federal Communications Commission prescribed a new system of accounts for telegraph carriers and receipts and expenses as stated above for 1943 and subsequent years are not fully comparable with results for prior years.  
<sup>6</sup> Net income from current operations, before extraordinary adjustments of income applicable to prior years.  
<sup>7</sup> Excludes controlled pole lines and wires no longer recorded in plant records.

<sup>1</sup> The Western Union Telegraph Co., which operates both land and ocean-cable systems, is counted as 2 companies.

<sup>2</sup> Exclusive of pole line owned and operated wholly by railway companies.

<sup>3</sup> Exclusive of wire owned and operated wholly by railway companies, as follows: Reported by all railway companies, 1912, 314,329 miles, reported by railway companies having annual operating revenues of \$1,000,000 or more, 1917, 344,110 miles; 1922, 286,002 miles; 1927, 333,898 miles; 1932, 337,059 miles; 1937, 318,116 miles.

<sup>4</sup> Not available.

<sup>5</sup> For land systems only.

<sup>6</sup> Excluding 31,102,577 lettersgrams not distributed according to rate.

<sup>7</sup> Number of employees includes 7,516 messengers whose wages are not included in amount given for salaries and wages.

<sup>8</sup> In addition, telegraph revenues amounting to \$28,999,000 were reported by companies primarily engaged in supplying telephone service.

<sup>9</sup> Data for ocean-cable business of Western Union Telegraph Co. included with those for land systems.

<sup>1</sup> Excluding rural free delivery routes, ocean mail routes, and air-mail routes to foreign countries.  
<sup>2</sup> Audited postal surplus or deficit which is greater or less than excess of receipts or expenditures by the amount of adjusted losses and contingencies.  
<sup>3</sup> Domestic excludes and international includes foreign countries on domestic basis. See headnote, table 525.  
<sup>4</sup> Continental United States only. Data for years prior to 1926, except 1923, are estimates.  
<sup>5</sup> Postage stamps first issued under act of Mar. 3, 1847, and placed on sale at New York July 1, 1847.  
<sup>6</sup> From Nov. 1, 1864, when money-order system first went into operation, to June 30, 1865.  
<sup>7</sup> From Sept. 1, 1869, to June 30, 1870. International money orders first issued under convention of Oct. 12, 1867.  
<sup>8</sup> For 1918 includes \$44,500,000 and for 1919 \$71,292,000 war-tax revenue accruing from increased postage.

No. 525.—POSTAL MONEY-ORDER BUSINESS—SUMMARY: 1920 TO 1946

[For years ending June 30. See headnote, table 523. For revenues from money orders, see table 524. For value of orders issued for other years, see table 523. Money orders are exchanged on a domestic basis not only within this country, but with its outlying possessions, Canada, Cuba, and numerous islands and minor countries neighboring the United States. International-basis orders are exchanged between United States and its outlying possessions, on one hand, and other than "domestic basis" foreign countries, on the other. In this table, however, "International" includes money orders exchanged between United States and "domestic basis" foreign countries, and these are not included in "Domestic"]

<sup>1</sup> Annual expenditure (regular authorizations) represents estimated cost for transporting material and traffic over regular routes only, based on contracts outstanding at end of each fiscal year. Annual cost for emergency and side and transfer service. Average rates based on regular authorizations.

<sup>2</sup> For expenditures for Railway Mail Service, see table 526.

<sup>3</sup> Subject to revision. <sup>4</sup> Not computed.

<sup>1</sup> Represents audited expenditures; in 1890 and 1890, some incidental expense included.

No. 529.—POSTAL SERVICE OPERATION—SUMMARY FOR PRINCIPAL ITEMS: 1925 TO 1946

[For years ending June 30. See headnote, table 523. For sales of postage stamps and other stamped paper and postage collected on second-class matter, see table 524]

ITEM	1925	1930	1935	1940	1944	1945	1946
Transactions in stamped paper:							
Ordinary postage stamps issued (millions).....	17,387	16,269	13,610	16,381	19,106	20,240	19,180
Stamped envelopes (millions).....	2,997	3,164	1,618	1,650	1,902	2,065	1,816
Postal cards issued (millions).....	1,497	1,643	1,754	2,257	1,913	2,282	2,478
Pieces of mail carried <sup>1</sup> (millions).....	25,835	27,888	22,332	27,749	34,931	37,912	36,318
Second-class matter carried:							
Free in county (1,000 pounds).....	69,195	75,326	57,560	60,626	58,748	59,787	64,747
Paid at pound rates (1,000 pounds).....	1,348,297	1,554,415	1,063,389	1,283,673	1,365,669	1,319,587	1,547,030
Foreign mails dispatched by sea:							
Letters, post cards (1,000 pounds).....	5,640	7,103	4,602	4,231	17,158	31,426	17,707
Other articles (1,000 pounds).....	66,229	83,377	53,056	62,257	206,946	474,160	328,039
Mail registered:							
Domestic, paid (1,000 pieces).....	70,512	76,489	41,318	40,533	<sup>2</sup> 90,301	<sup>2</sup> 81,094	<sup>2</sup> 74,040
International, paid (1,000 pieces).....	10,993	7,869	3,444	2,713	( <sup>3</sup> )	( <sup>3</sup> )	( <sup>3</sup> )
Official, free (1,000 pieces).....	8,414	8,680	10,582	12,082	<sup>4</sup> 22,646	<sup>4</sup> 22,907	<sup>4</sup> 17,939
Registry fees (1,000 dollars).....	8,850	12,807	<sup>4</sup> 7,100	<sup>4</sup> 6,825	<sup>4</sup> 15,929	<sup>4</sup> 17,706	<sup>4</sup> 16,121
Mail insured:							
Domestic, parcel post (1,000 pieces).....	152,078	126,421	71,960	80,916	140,006	131,384	134,009
International (1,000 pieces).....	603	649	311	380	( <sup>3</sup> )	( <sup>3</sup> )	( <sup>3</sup> )
Total fees paid (1,000 dollars).....	8,061	8,775	5,249	5,702	<sup>4</sup> 12,959	<sup>4</sup> 12,259	<sup>4</sup> 10,599
Mail sent C. O. D.:							
Total pieces sent (1,000).....	52,362	46,249	31,118	34,648	<sup>4</sup> 44,503	<sup>4</sup> 44,146	<sup>4</sup> 52,902
Total fees (1,000 dollars).....	5,562	5,825	4,296	4,748	<sup>4</sup> 7,930	<sup>4</sup> 10,830	<sup>4</sup> 12,364

<sup>1</sup> See note 4, table 523.  
<sup>2</sup> Includes "insured mail treated as registered mail," formerly included with regular insured mailings.  
<sup>3</sup> Not published.  
<sup>4</sup> Excludes data for international mail included in prior years.  
<sup>5</sup> Not including surcharges (effective July 1, 1932) amounting to \$3,815,000 in 1935, \$2,674,000 in 1940, \$5,824,000 in 1944, \$7,371,000 in 1945, and \$7,191,000 in 1946.

## 18. Power

Energy for supplying mechanical power, heat, light and refrigeration for the complex machinery and processes necessary to maintain productivity and comfort in the United States is derived primarily from coal, oil, water, natural gas, wood and waste, wind, certain basic chemical and physical reactions, and the rays of the sun. Of these between 15 and 20 percent of the coal, over 2 percent of the oil, practically all of the water, and 10 percent of the natural gas are converted to electricity for application to the energy requirements of our economic system.

Statistics on these various sources of energy are compiled by numerous agencies but only a few of the series are reasonably complete or arranged to avoid duplication in a manner that permits ready computation of total energy requirements. Oil, coal, natural gas, and wood yield many products as well as power and, consequently, enter into many statistical series.

Data on coal, oil, and natural gas production, utilization, and related subjects are compiled annually by the Bureau of Mines and are published in the Minerals Yearbook. Data on natural gas utilization and the production of manufactured gas from coal, oil, and related products, its utilization, and related statistics are published by the American Gas Association in its monthly bulletins and annual statistical numbers. Summaries of statistical material from these sources appear in this Abstract in section 27, Mining and Mineral Products.

Data on the production of electric energy by type of prime mover and showing the quantities of basic fuels—coal, oil, natural gas, and others—used in production, and the capacity of all generating plants by type of prime mover and related statistics are compiled and published annually by the Federal Power Commission. These data cover both generation for public use by electric utilities and for use by the producer where generated by non-utility establishments. Data on sales, revenues, and customers by classes of service, on rates and typical bills, and related matters are also published by the Commission. Monthly statistics on production, fuels used in production, sales by classes of service, salaries and wages, taxes, and other costs are also published and distributed by the Federal Power Commission in a loose-leaf current data series known as Electric Power Statistics. Statistics on the distribution of electric energy by utilities for public use are presented monthly and annually by the Edison Electric Institute in its Statistical Bulletins. Summaries of these statistics appear in the following tables.

Data on the use of power by manufacturing, extracting, and related industries are issued from time to time by the Bureau of the Census in its Censuses of Manufactures and Mineral Industries. For the period 1939 to 1946, data on the use of electric power by major industry groups were compiled and published by the Federal Power Commission in a report on Industrial Electric Energy. Statistics based on these studies appear in the sections on manufacturing and mineral industries in this Abstract.

Over-all statistics on water as an actual and potential source of power are compiled by the Federal Power Commission and are shown in table 542.

The Bureau of the Census in the Census of Electrical Industries compiled at five-year intervals beginning in 1902 a report on the Electric Light and Power Industry. The last survey made was for the year 1937. Summary statistics from this report are shown in table 538.

Data in this section relate to continental United States except as indicated.

### No. 531.—ENERGY FROM MINERAL FUELS AND WATER POWER—ANNUAL SUPPLY: 1889 TO 1946

[In trillions of British thermal units. Unit heat values employed are: Anthracite, 13,000 B. t. u. per pound; bituminous coal and lignite, 13,100 B. t. u. per pound; petroleum, 6,000,000 B. t. u. per barrel, natural gas, 1,075 B. t. u. per cubic foot. Water power includes installations owned by manufacturing plants and mines, as well as Government- and privately-owned public utilities. Fuel equivalent of water power calculated from kilowatt-hours of power produced wherever available, as is true of all public-utility plants since 1910. Otherwise, fuel equivalent calculated from reported horsepower of installed water wheels, assuming capacity factor of 20 percent for manufacturers and mines and of 40 percent for public utilities.]

FIGURE Q.—INSTALLED CAPACITY OF ELECTRIC UTILITY GENERATING PLANTS IN THE UNITED STATES: 1889 TO 1947

[See table 533]

Source: Federal Power Commission.

# **No. 533.—PRODUCTION OF ELECTRIC ENERGY AND CAPACITY OF GENERATING PLANTS, BY TYPE OF PRIME MOVER: 1920 TO 1947**

[Figures for 1946 in tables 532-536 for electric utilities (for public use) are based on operation of 2,854 power plants owned by 1,380 concerns. Production and capacity of plants owned by following classes of electric utility operators are included—privately owned electric utilities, municipal electric utilities, Federal power projects, cooperatives, power districts, State projects, and publicly owned noncentral stations. Industrial classification comprises production and capacity of 4,158 industrial electric power plants of 100 kilowatts and over in 1945, including amounts for stationary electric power plants of railroads and railways. Installed capacity as of Dec. 31]

## No. 538.—ELECTRIC LIGHT AND POWER INDUSTRY—SUMMARY: 1902 TO 1937

[Figures cover all establishments engaged either in generation and distribution of electric energy, or distribution or transmission of electric energy, to public or private consumers. Statistics do not include establishments which consume all current generated, such as manufacturing and mining companies, railroads, railways, hotels, and other enterprises not in the nature of public utilities, unless a portion of their generated output is sold commercially. Plants operated by the Federal Government or by States were not included unless energy was sold commercially]

ITEM	1902	1912	1917	1922	1927	1932	1937
Number of reporting establishments, <sup>1</sup>							
Total	3, 620	5, 221	6, 543	6, 355	4, 335	3, 429	3, 801
Generating all or part of current	(2)	4, 646	5, 124	4, 380	2, 331	1, 788	1, 812
Distributing or transmitting only	(2)	575	1, 418	1, 966	2, 004	1, 641	1, 989

power, maintenance and other operat-							
ing expenses) (\$1,000)	(2)	(2)	(2)	553, 066	750, 484	803, 100	1, 042, 195
Value of electric utility plant (millions							
of dollars)	805	2, 176	3, 060	4, 465	9, 297	12, 694	12, 941
Fuel used for electric generation, <sup>10</sup>							
Coal, anthracite (1,000 short tons)	(2)	(2)	2, 442	1, 835	2, 002	1, 559	2, 024
Coal, bituminous (1,000 short tons)	(2)	(2)	19, 385	24, 492	35, 681	25, 998	40, 469
Coke (1,000 short tons)	(2)	(2)	63	37	32	153	88
Fuel oil (1,000 bbls. of 42 gals.)	(2)	(2)	5, 158	11, 856	7, 146	7, 968	13, 866
Gasoline (1,000 bbls. of 42 gals.)	(2)	(2)					
Gas, manufactured (1,000,000 cubic	(2)	(2)	14, 199	20, 174	5, 161	1, 926	4, 578
feet)	(2)	(2)					
Gas, natural (1,000,000 cubic feet)	(2)	(2)	14, 199	20, 174	59, 362	96, 365	159, 453

<sup>1</sup> The term "establishment" as here used may represent a single electric station (either generating or distributing or both) or a number of such stations operated under the same ownership. <sup>2</sup> Not available.

<sup>3</sup> Comprises 1,112 stations operated by steam; 1,283 by internal-combustion; 1,426 by water; and 206 composite (stations having more than 1 type of prime mover)

<sup>4</sup> Comprises generated output and energy purchased and received from other sources. Since the energy "Received from other sources" was, in a large part, purchased from other electric light and power companies, a considerable duplication is involved, as such energy would also be included in the "Generated."

<sup>5</sup> Includes "Estimated value of free service."

<sup>6</sup> Number on June 30.

<sup>7</sup> Reported by commercial establishments only. No data for municipal establishments.

<sup>8</sup> Not comparable with figures for other years since amount includes only salaries and wages chargeable to electric operating service.

<sup>9</sup> Includes value of plant and equipment, \$902,000,000, owned by companies engaged in the operation of electric light and power plants and other public utilities, not distributed among the several utilities.

<sup>10</sup> In addition, hogged fuel, sawmill, and other waste were reported.

# No. 542.—WATER POWER—DEVELOPED, 1920 TO 1945, AND ESTIMATED UNDEVELOPED, JANUARY 1947

[In thousands of kilowatts. Developed water power for 1945 and prior years represent rated kilowatt capacity of electric generators operated by actual installations of water wheels and turbines. Amounts prior to 1939 include generator capacities of electric utility plants only (see headnote, table 533) as generator capacities of industrial plants not generally available. 1939 and 1945 industrial figures not directly comparable; in many instances appear to be in close agreement. Water wheel and turbine capacity of industrial and miscellaneous plants, expressed in horsepower, and including mechanical drive plants (of 395,000 horsepower in 1939) not having electric generators were: 1921, 1,726,578; 1925, 1,750,323; 1930, 1,665,932; 1935, 1,929,404; 1939, 2,122,228]

Secondary roads.....	( <sup>2</sup> )	173,603	195,245	200,405	200,545	202,356	204,293
Urban extensions of State-highway systems.....	( <sup>2</sup> )	14,881	23,782	28,932	29,095	29,573	30,205
Connecting streets not under State control.....	( <sup>2</sup> )	3,123	3,267	3,238	3,003	2,996	2,841
Total mileage built during year by State-highway departments.....	35,277	26,814	32,594	15,971	15,080	15,281	21,713
Graded and drained.....	7,813	3,284	2,207	539	350	283	440
Surfaced.....	27,464	23,530	30,387	15,432	14,730	14,998	21,273
State-highway funds available (\$1,000) <sup>4</sup> .....	1,423,164	1,205,945	2,037,606	1,934,262	2,034,138	2,242,572	2,959,836
Disbursements of State-highway funds (\$1,000) <sup>4</sup> .....	1,139,677	848,355	1,591,290	1,241,494	1,212,066	1,255,298	1,669,889

<sup>1</sup> No segregation of secondary State highways from primary systems in 1930; figures shown include an undetermined amount of municipal street mileage on State systems or connecting these systems. Not strictly comparable with subsequent years, since county road mileage had not yet been taken over by State highway departments.

<sup>2</sup> Not available.

<sup>3</sup> Low type includes soil-surfaced, gravel or stone, bituminous surface-treated, and mixed bituminous surfaces; high type includes bituminous penetration, bituminous concrete and sheet asphalt, Portland cement concrete, brick, block and dual-type surfaces, and unclassified surfacing on bridges.

<sup>4</sup> Includes funds transferred to or from local units. Data for D. C. not included prior to 1940. Beginning 1940, includes proceeds of highway-user imposts allotted by the State treasurer for (1) county and other local roads and streets and for (2) nonhighway purposes.

Source: Federal Works Agency, Public Roads Administration; Highway Statistics, Summary to 1945; Highway Statistics, 1946.

**No. 545.—EXISTING RURAL ROAD MILEAGE, BY TYPE AND BY GOVERNMENTAL CONTROL, BY STATES, END OF 1945**

[Rural roads include roads outside incorporated areas and certain more populous unincorporated areas. State highway mileage data are from State reports for calendar year 1945. Other mileage data are from State and planning survey reports for calendar year 1945, except for a few States for which latest available data are for earlier years.]

<sup>1</sup> Low type includes soil-surfaced, gravel or stone, and low-type bituminous; high type includes high-type bituminous, Portland cement concrete, brick, block, and dual-type surfaces.

<sup>2</sup> Mileages shown are in addition to those forming a part of State or local highway systems.

<sup>3</sup> Total includes 361 miles, not classified by type, for the following States: California, 10; Utah, 274; Virginia, 77.

<sup>4</sup> Includes 2,508 miles of State park, forest, and reservation roads.

Source: Federal Works Agency, Public Roads Administration; Highway Statistics, 1946.

## No. 546.—DISBURSEMENTS OF STATE-HIGHWAY FUNDS, BY STATES: 1921 TO 1946

[Includes disbursements, whether from current revenues or proceeds of loans, for construction, maintenance, interest and principal payments on highway bonds, transfers to local units, and miscellaneous disbursements. Beginning 1935 covers calendar years; figures for earlier years for many States represent fiscal years. Beginning with 1940, figures not comparable with those for prior years as they include data for certain State income applicable to highways, namely, proceeds of highway-user imposts allotted, without passing through State highway departments, by State treasurer for (1) county and other local roads and streets and for (2) nonhighway purposes. These data not included in prior years]

[In thousands of dollars]

**No. 555.—COMMERCIAL MOTOR VEHICLES, BY VEHICLE TYPE, BY STATES—NUMBER  
AS OF DEC. 31, 1941**

[The Nation-wide Truck and Bus Inventory covers 97.4 percent of all bus registrations and 92.4 percent of registrations of other commercial vehicles. Busses are defined as passenger-carrying vehicles of 9 persons or more. Excludes station wagons, sedan deliveries, fire engines, ambulances, hearses, small trailers of less than 3,000-pound capacity such as are pulled behind passenger cars, and converted passenger cars]

<sup>1</sup> Includes District of Columbia. All States were in registration system in 1933 and thereafter.  
<sup>2</sup> Not available.  
<sup>3</sup> Based on enumerated population, Apr. 1, 1940.

Source: Federal Security Agency, U. S. Public Health Service, National Office of Vital Statistics; basic figures are published in annual reports as follows: 1915-36, Mortality Statistics; 1937-45, Vital Statistics of the United States, Pt. I. Motor-vehicle registrations, Federal Works Agency, Public Roads Administration; annual statements on motor-vehicle registrations.

## 20. Transportation, Air and Land—Steam and Electric Railways, Express Companies, Motor Busses, and Civil Aeronautics

**Steam railways.**—Because of the long period in which it has been subject to close Federal regulation and the degree of its consolidation, there is an extensive coverage of important statistical items relating to the railway industry. The Statistics of Railways in the United States, published annually by the Interstate Commerce Commission since 1888, is the most important source for steam railway statistics. Various other periodical reports are also issued by the Interstate Commerce Commission. The Association of American Railroads supplements official railway statistics with various releases.

The term "steam railways" as used in this section includes electrified divisions operated by such carriers. The total steam railroad mileage of the United States comprises: (a) Regular interstate carriers (and their nonoperating subsidiaries) reporting to the Interstate Commerce Commission, (b) switching and terminal railroads, also reporting to the Commission; and (c) private railroads (defined by the Commission as "circular" because they report on brief circulars and as "unofficial"). Except in certain mileage data the circular and unofficial companies are not included in any of the statistics. The switching and terminal roads were formerly included with operating railways, but are now separated, and data for them do not appear in most of the tables.

Nonoperating subsidiaries include proprietary companies, which are covered by the reports of operating carriers, and lessor companies which have no traffic and whose reports appear only in statistics of capitalization, dividends, and investment.

Operating railways are divided into three classes, according to the amount of their annual operating revenues, class I, having more than \$1,000,000 of such revenue; class II, from \$100,000 to \$1,000,000; and class III, less than \$100,000. During recent years more detailed reports are required from class I carriers than from smaller companies. The basis of the figures in each table is indicated by notes. Omission of class II and class III railroads affects very little the comparability of statistics with those of earlier years as regards most items, since the bulk of the business is done by class I.

The Interstate Commerce Commission divides railroads geographically into three districts and eight subsidiary regions. Each railroad is treated as a unit and placed wholly in some one district or region. Broadly speaking, the eastern district includes territory east of Chicago and north of the Ohio and Potomac Rivers; southern district, territory east of the Mississippi River and south of the Ohio and Potomac Rivers; and western district, the remainder of the country.

**Electric railways.**—The Interstate Commerce Commission issues annually an abstract of the annual reports of electric railways, chiefly interurban, which report to it. The American Transit Association publishes street railway statistics in its annual Transit Fact Book. The Bureau of the Census has published a quinquennial report on electric railways from 1902 to 1937. In the more recent years the report also covered affiliated trolley-bus and motor bus operations. The last Census of Electrical Industries was for the year 1937.

**Motor carriers.**—Statistics of class I for-hire carriers (those with \$100,000 or more of gross annual operating revenues) are compiled by the Interstate Commerce Commission from annual, quarterly, and monthly reports submitted to it by these carriers. This series begins with 1939 data.

The annual review and statistical number of Bus Transportation, a McGraw-Hill publication, summarizes operations of common carriers and school busses.

Civil aeronautics.—The Civil Aeronautics Administration of the Department of Commerce compiles statistics on civil aviation. These data are published in the Statistical Handbook of Civil Aviation.

No. 564.—STEAM RAILWAYS—MILEAGE OWNED AND MILEAGE OPERATED: 1890 TO 1946

[Excludes switching and terminal roads beginning with 1910 (they operate about 2,300 miles of main tracks). First and second columns cover all railways, including "circular" and "unofficial" lines; last 5 columns omit "circular" and "unofficial" lines. Mileage owned excludes all duplication and covers continental United States only. Mileage operated includes some duplication under trackage rights and some mileage in Canada operated by United States companies]

YEAR	Miles of road (first track) owned	MILES OPERATED					Class I railways: Road (first track)
		All railways: Road (first track)	Reporting railways

### No. 566.—STEAM RAILWAYS (ALL REPORTING COMPANIES)—EQUIPMENT IN SERVICE: 1929 TO 1946

["All reporting companies" include switching and terminal but not circular and unofficial lines. Data for tractive effort and capacity of cars exclude switching roads, also smaller roads during recent years; they would not be materially different if all carriers were included. Excludes the large number of cars owned by private car lines]

### No. 573.—STEAM RAILWAYS (ALL REPORTING COMPANIES)—CAPITALIZATION: 1890 TO 1946

[All amounts except "per mile of road" in millions of dollars. Excludes switching and terminal companies beginning with 1910; their total capitalization in 1946 was \$763,012,000. Includes both operating and non-operating railways. Gross figures include considerable amounts of securities held by companies issuing them as well as larger amounts held by other railway companies]

### No. 574.—STEAM RAILWAYS—STOCK OUTSTANDING, DIVIDENDS, AND INTEREST: 1891 TO 1946

[For years ending June 30 prior to 1916, calendar years thereafter. Includes nonoperating as well as operating roads. Excludes switching and terminal roads beginning with 1908. Dividend figures throughout cover all classes of roads, but interest figure for 1913 excludes unimportant class III roads. Amount of stock shown in first column is exclusive of stock held by issuing company, but includes that held by other railway companies]

## No. 581.—STEAM RAILWAYS—REVENUES, EXPENSES, AND INCOME: 1891 TO 1946

[For years ending June 30 prior to 1916, calendar years thereafter. Method of calculating net revenue and net operating income is more fully shown in table 582. Excludes switching and terminal companies beginning with 1908; operating revenues of switching and terminal companies: 1942, \$143,429,000; 1943, \$149,846,000; 1944, \$150,931,000; 1945, \$148,563,000; 1946, \$143,039,000; operating expenses: 1942, \$93,922,000; 1943, \$107,530,000; 1944, \$116,310,000; 1945, \$128,543,000; 1946, \$130,500,000]

CLASS AND YEAR OR YEARLY AVERAGE	Average miles of line (first track) operated	INCOME ACCOUNT ITEMS (THOUSANDS OF DOLLARS)					PER MILE OF LINE		Percent operating expenses of revenues
		Operating revenues	Operating expenses	Net revenue from operations	Tax accruals	Net railway operating income	Operating revenues	Net revenue from operations

No. 584.—STEAM RAILWAYS—REVENUE FREIGHT ORIGINATED, BY COMMODITY GROUPS, ALL ROADS, 1906 TO 1915, CLASS I ROADS, 1916 TO 1946

[In thousands of tons of 2,000 pounds. For years ending June 30 prior to 1916, calendar years thereafter. Excludes switching and terminal roads beginning with 1908. Figures for 1911 to 1915, inclusive, exclude class III roads but this affects comparability very slightly; those after 1916 exclude both class II and class III, thereby reducing grand total about 6 percent. Excludes nonrevenue freight; this is a large item in the case of a few commodities, notably coal]

CLASS OF ROAD AND YEAR OR YEARLY AVERAGE	Total	Prod- ucts of agri- culture	Ani- mals and prod- ucts	PRODUCTS OF MINES		Prod- ucts of forests	Manu- factures and miscel- laneous	All less than car- load
				Coal and coke	Other

**No. 586.—STEAM-RAILWAY ACCIDENTS—NUMBER OF PERSONS KILLED AND INJURED, BY STATUS: 1891 TO 1946**

[For various reasons, including fact that returns were required under different acts, statistics are not strictly comparable. Prior to 1921, train accidents were those causing damage to railway property in excess of \$150 or any damage and a resulting casualty. Thereafter they were considered as such when damage exceeded \$150 with or without a casualty. Where damage is less than \$150 and there is a reportable casualty it is classified as a train-service accident. Figures for years 1911-15 include industrial and other nontrain accidents to employees only, and for years 1908-10 exclude switching and terminal roads. Otherwise, data cover all reportable accidents, including those due to suicide, mental derangement, and attempting to escape custody]

**No. 590.—ELECTRIC RAILWAYS—SUMMARY: 1890 TO 1937**

[The census of street railways, which was first taken in 1890, and which has been taken at quinquennial intervals through 1937 beginning with the inquiry for 1902, covers (1) all street railways, without regard to kind of motive power, and (2) all interurban railways using other than steam as motive power. The nonelectric railroads included are those operated principally by cable and gasoline engines. Operations of electrified divisions of steam-railway companies are not included. Figures in this table do not include data for motorbus and trolley-bus operations of electric street railways. (For motorbus and trolley-bus statistics from census reports, see source)]

Operating ratio (percent).....	68.4	57.5	58.7	71.6	74.9	78.2	79.1

<sup>1</sup> Excludes data for 22 companies, operating on a part-year basis. These companies reported 36,810,221 passen-  
gers, 9,108,009 car-miles; 1,042,866 car-hours; \$2,898,206, operating revenue; and \$2,412,010, operating expense.

<sup>2</sup> Includes certain companies in Pennsylvania which maintained separate organizations, though controlled  
through stock ownership by other companies. For 1912 these companies were treated as merged and not included  
in the number reported.

<sup>3</sup> Includes small mileage of track lying outside United States.

<sup>4</sup> Data incomplete. Some of the companies engaged in both light-and-power and electric-railway operations  
were unable to report separately the values of plant and equipment assignable to their railway activities.

<sup>5</sup> Number reported as of June 30, for 1890, 1922, 1927, and 1932; for 1902, average for the year; for 1912, as of Sept.  
16. Figures for 1937 represent an average of numbers reported on June 30 and Dec. 31.

<sup>6</sup> Includes 334 trolley-bus operators.

<sup>7</sup> Includes 29,721,000 trolley-bus passengers.

<sup>8</sup> Includes auxiliary operating revenues of \$8,905,000 for 1927 and \$91,242,000 for 1922; auxiliary expenses, \$7,322,000  
for 1927, and \$49,232,000 for 1922. Data for operating revenues and operating expenses of auxiliary operations  
excluded so far as possible for earlier years.

Railways and Trolley-Bus and Motorbus Operations. Survey discontinued.

## No. 591.—TRANSIT INDUSTRY—SUMMARY: 1930 TO 1946

[Represents entire transit industry comprising all organized local passenger transportation agencies except taxicabs and suburban railroads. Based on financial and statistical reports received by American Transit Association from transit companies representing 85 to 95 percent of the industry]

ITEM	1930	1935	1940	1942	1943	1944	1945	1946
Miles of route operated (Dec. 31):								
Electric railway—miles of single track.....	35,400	26,700	19,600	18,200	18,210	18,112	17,732	16,742

Miles per owned vehicle <sup>9</sup> .....	<sup>9</sup> 49,514	45,976	45,079	44,531	43,385
Revenue per vehicle-mile (intercity) <sup>9</sup> .....	<sup>9</sup> \$0.245	\$0.282	\$0.316	\$0.326	\$0.337
Expense per vehicle-mile (intercity) <sup>9</sup> .....	\$0.240	\$0.273	\$0.312	\$0.326	\$0.344

<sup>1</sup> Amortization represents a very small part of this total.

<sup>2</sup> Does not include Federal or State income taxes.

<sup>3</sup> Withdrawals of sole proprietors and partners.

<sup>4</sup> Does not include drivers of equipment engaged by these carriers to perform "purchased transportation."

<sup>5</sup> Includes collection and delivery employees as follows: 1942, 19,010, compensation, \$24,862,000; 1943, 21,180, compensation, \$44,402,000; 1944, 21,111, compensation, \$48,778,000; 1945, 21,444, compensation, \$51,441,000

<sup>6</sup> Based on 1,019 carriers.

<sup>7</sup> Includes duplications on account of tonnage received from connecting motor carriers.

<sup>8</sup> Basic figures include expenses of operating vehicles in intercity and local services; these expenses are not separable. Comparisons of revenue and expense per intercity vehicle-mile are therefore subject to qualification.

## 21. Waterways, Water Traffic, and Shipping

Data in this section cover the following areas unless otherwise indicated: From Corps of Engineers, Department of the Army, Bureau of Census, Bureau of Customs, and Bureau of Foreign and Domestic Commerce, United States customs area which includes Alaska, Hawaii, and Puerto Rico, and, from Jan. 1, 1935, through Dec. 31, 1939, Virgin Islands; from United States Maritime Commission and War Shipping Administration, continental United States. Beginning with 1946, data on waterborne foreign commerce will be compiled by Bureau of Census.

**Units of measurement.**—"Cargo tonnage" represents weight of cargo in long tons (2,240 pounds) or short tons (2,000 pounds). All other tonnage figures refer to capacity of vessels. The terms gross and net tonnage refer to space measurement, 100 cubic feet being called 1 ton. Gross tonnage is the capacity of the entire space within the frames and the ceiling of the hull, together with those closed-in spaces above deck available for cargo, stores, passengers or crew, with certain minor exemptions. Net or registered tonnage is what remains after deducting from the gross tonnage the spaces occupied by the propelling machinery, fuel, crew quarters, master's cabin, and navigation spaces. It represents substantially space available for cargo and passengers. The net tonnage capacity of a ship recorded as "entered with cargo" may bear little relation to actual weight of cargo. Dead weight tonnage is the weight in long tons required to depress a vessel from light water line (that is, with only the machinery and equipment on board) to load line. It is therefore the weight of the cargo, fuel, etc., which a vessel is designed to carry with safety. Displacement tonnage (naval vessels) has reference to weight of the vessel itself with its normal equipment, fuel, etc.

**Vessel entrances and clearances.**—The tables on vessel entrances and clearances show the number and net registered tonnage of American and foreign dry cargo and tanker vessels with cargo and in ballast entering and clearing the United States customs area in the foreign trade and indicate the Customs Districts at which these vessels first entered and from which they last cleared. All types of watercraft engaged in the foreign trade which are required to make formal entrance and clearance under United States customs regulations are included in the statistics. Army and Navy vessels entering or clearing without commercial cargo are not included in the figures. The tons shown in tables 623-628 are net tons of 100 cubic feet carrying capacity of the vessels (as defined in Part 16 of Title 46, "Code of Federal Regulations, Measurements of Vessels") and do not represent the actual weight of cargo carried.

A vessel is reported as entered at the first port in the United States at which entry is made, regardless of whether any cargo is unladen at that port. Vessels touching at a United States port in distress, or for other temporary causes without discharging cargo are not included in the figures.

A vessel is reported as cleared from the last port where outward cargo is completed or where the vessel cleared in ballast. Vessels touching at a United States port in distress, or for other temporary causes without discharging cargo are not included in the figures.

<sup>1</sup> Comprises the following with figures for 1946: Harbor traffic of New York, Philadelphia, and San Francisco 46,054,000 tons; local traffic of other seaports, 38,129,000; domestic traffic of lake ports, 12,932,000.

<sup>2</sup> Excluding St. Marys Falls Canal traffic (91,687,000 tons in 1946) and additional Detroit River traffic (16,292,000 in 1946), data for which are already included in figures for Great Lakes traffic; also excluding duplications relating to rivers and canals themselves.

<sup>3</sup> Principally coastwise and lake traffic passing through canals and connecting channels other than the St. Marys Falls Canal and Detroit River.

<sup>4</sup> Estimated from figures in this table on assumption that all deductions represent duplications in domestic traffic; includes some minor duplications in figures for foreign traffic.

## No. 608.—COMMERCE OF PRINCIPAL UNITED STATES OCEAN PORTS: 1946

[In thousands of short tons of 2,000 pounds. In addition to commerce here shown, many ports have (1) commerce with ports on internal rivers and canals; (2) purely local port traffic, including, for New York, Philadelphia, and San Francisco, what is called intraport traffic between parts of a harbor for which separate statistics are maintained. These forms of traffic, although aggregate tonnage is large, are of much less economic importance than foreign and coastwise traffic]

## 22. Irrigation and Drainage

[Data in this section relate to Continental United States]

### No. 629.—IRRIGATION ENTERPRISES—SUMMARY: 1910 TO 1940

[Data are for the 17 Western States and Arkansas and Louisiana. Tables 629 and 631-638 relate to irrigation enterprises of all types, including those operated by individual farmers. They are based on reports of management of enterprises. An enterprise is defined as "an independent irrigation establishment owning or operating works for supplying water to agricultural land"]

ITEM		CENSUS OF—			
		1910	1920	1930	1940
Approximate land area.....	1,000 acres..	1,224,068	1,225,080	1,222,080	<sup>1</sup> 1,224,067
Farms (irrigated and nonirrigated) <sup>2</sup> .....	number	1,776,046	1,916,301	2,062,813	1,897,845
Land in all farms <sup>3</sup> .....	1,000 acres..	416,468	506,441	508,604	629,080
Irrigation enterprises:					
Enterprises.....	number	86,668	63,308	75,517	91,637
Units irrigated.....	do.	( <sup>4</sup> )	( <sup>4</sup> )	( <sup>4</sup> )	490,029
Area irrigated.....	1,000 acres..	14,438	19,192	19,548	21,004
Area existing works were capable of supplying with water.....	1,000 acres..	20,285	26,030	26,102	28,066
Area irrigable.....	1,000 acres..	<sup>4</sup> 22,245	<sup>4</sup> 25,891	30,590	31,308
Additional area existing works were capable of supplying with water.....	1,000 acres..	5,852	6,829	6,554	7,022
Additional irrigable area in enterprises, not supplied with water.....	1,000 acres..	<sup>4</sup> 17,812	<sup>4</sup> 16,000	11,082	10,302
Investment in irrigation enterprises.....	1,000 dollars..	321,454	697,657	862,758	1,062,049
Increase over preceding census.....	percent.	369.2	117.0	28.0	17.8
Average per acre based on area works were capable of supplying with water.....	dollars	15.85	26.81	34.20	37.80
Increase over preceding census.....	percent.		69.1	27.6	9.6
Estimated completed cost of existing enterprises.....	1,000 dollars..	437,949	819,778	1,015,108	1,126,546
Average per acre based on irrigable area in enterprises.....	dollars	<sup>4</sup> 12.68	<sup>4</sup> 22.84	33.17	35.99
Average annual cost per acre irrigated for maintenance and operation of irrigation works.....	dollars	<sup>5</sup> 1.07	2.43	2.77	2.26

<sup>1</sup> Represents redeterminations and therefore differs from figures shown for earlier years.

<sup>2</sup> From Census of Agriculture.

<sup>3</sup> Not available.

<sup>4</sup> Relates to total area in enterprises; irrigable areas not reported.

<sup>5</sup> Excludes cost of operation and maintenance for rice-growing districts in Gulf States; consequently figure is not comparable with those for later years.

<sup>1</sup> A farm reporting both irrigated and nonirrigated crops is recorded as one farm in total.

<sup>2</sup> Not available.

<sup>3</sup> Includes data for Lespedeza hay not shown separately.

<sup>4</sup> Data available only for Arizona and California.

<sup>5</sup> Computed by using acreages grown alone in all States except California, Idaho, Oregon, and Washington, where total acreages were used.

<sup>6</sup> Running square bales of lint cotton, counting round as half bales.

<sup>1</sup> Area for which the Bureau is prepared to supply water.

<sup>2</sup> Includes private projects reconstructed with Government funds.

<sup>3</sup> Water Conservation and Utilization Project.

<sup>4</sup> Includes 827 acres irrigated, mostly in small tracts, for which no crop reports were received.

<sup>5</sup> No report received.

<sup>6</sup> Although there are 178,015 acres that can be irrigated within project limits, the area for which there is considered to be a safe and reliable water supply is 155,000 acres.

<sup>1</sup> Warren Act contracts are those which provide for sale of excess water to irrigation districts, i. e., water over and above project requirements. Lands served are usually located outside project proper. The act also provides for joint construction and financing of irrigation works by Federal Government and irrigation districts.

<sup>2</sup> Totals for all crops represent net areas after deducting areas subsequently used for other crops or pasture; detail is total area in cultivation, no deductions being made for duplicated areas.

<sup>3</sup> Bales of 500 pounds each.

<sup>4</sup> Includes payments received from Federal and commercial agencies.

**No. 646.—DRAINAGE ON FARMS AND DRAINAGE ENTERPRISES—SUMMARY: 1920, 1930, AND 1940**

[Statistics for drainage on farms in first part of this table were collected from individual farmers, while those for drainage enterprises were obtained from a special canvass of organized drainage enterprises. A farm may have artificial drainage without being included in any organized enterprise; conversely, an organized enterprise may include a farm on which there is no artificial drainage, because the enterprise facilitates removal of water from that farm. Drainage enterprises comprise public corporations and local improvement districts established under State laws relating to drainage, commercial enterprises draining land for sale, other organizations engaged in extensive land drainage work, and tracts of 500 acres or more drained by individual farm owners. Enterprises may include timbered and other unimproved land not yet in farms. Data as to drainage on farms were not collected in the census of 1940. Canvass of drainage enterprises did not include New England States, N. Y., N. J., or Pa.; Del. and Md. were included only in 1940; no enterprises were found in Ala. or W. Va. before 1940, and none in Va. in 1920]

## 23. Agriculture—General Statistics

Statistics on agriculture are for the most part prepared by the Bureau of the Census, Department of Commerce, which conducts the Census of Agriculture and by the Department of Agriculture which prepares current estimates.

Beginning with 1840 a Census of Agriculture has been taken every 10 years in conjunction with the Decennial Census of Population. In 1925, 1935, and 1945 a mid-decennial Census of Agriculture has also been taken. Information at each census has been obtained by a personal canvass of individual farms by census enumerators. The first Census of Agriculture, however, was limited in scope. It included such items as an inventory of the principal classes of domestic animals, the production of wool, the value of poultry, the value of products of the dairy, and the production of the principal crops. The number of farms and the acreage and value of farm land were first included in the Census of 1850. In 1880 information was first secured as to the tenure under which the farms were operated. A detailed classification of farm land according to use was first obtained in 1925; in earlier censuses, farm land was classified only as improved land, woodland, and other unimproved land.

A farm as defined by the Bureau of the Census is all the land on which some agricultural operations are performed by one person, either by his own labor alone or with the assistance of members of his household, or hired employees. A tract of less than 3 acres is not considered a farm unless its agricultural products for the year covered were valued at \$250 or more. Agricultural operations consist of the production of crops or plants, vines or trees (excluding forestry operations), or of the keeping, grazing, or feeding of livestock for animal products, animal increase, or value enhancement. Included as farms are such agricultural enterprises as nurseries, greenhouses, hot-houses, fur farms, mushroom cellars, apiaries, and cranberry bogs. Excluded are fish farms, fish hatcheries, oyster farms, frog farms, kennels, game preserves, parks, and the like. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a farm for census purposes. Thus for a plantation each cropper and tenant operation is considered a separate farm even though the entire plantation may be handled essentially as a single farm enterprise.

The land in farms includes considerable areas of land not actually under cultivation or used for pasture or grazing, but all such land must have been under the control of the operator and considered a part of his farm. Land used for grazing or pasture that was neither owned nor leased by the farm operator was not included under land in farms. Thus vast acreages of land used for grazing, such as national forests, Taylor grazing land, State lands, or other public lands, and some railroad and other privately owned lands, are not included as land in farms even though used for agricultural purposes.

Annual agricultural statistics of a wide variety have been issued currently by the United States Department of Agriculture for over 80 years—the first being as of May 1, 1863. There are now 41 field offices—1 in practically every State—which act as clearinghouses for information furnished by voluntary reporters. Information from the field offices is sent to Washington where reports covering State and national data are issued by the Crop Reporting Board of the Bureau of Agricultural Economics.

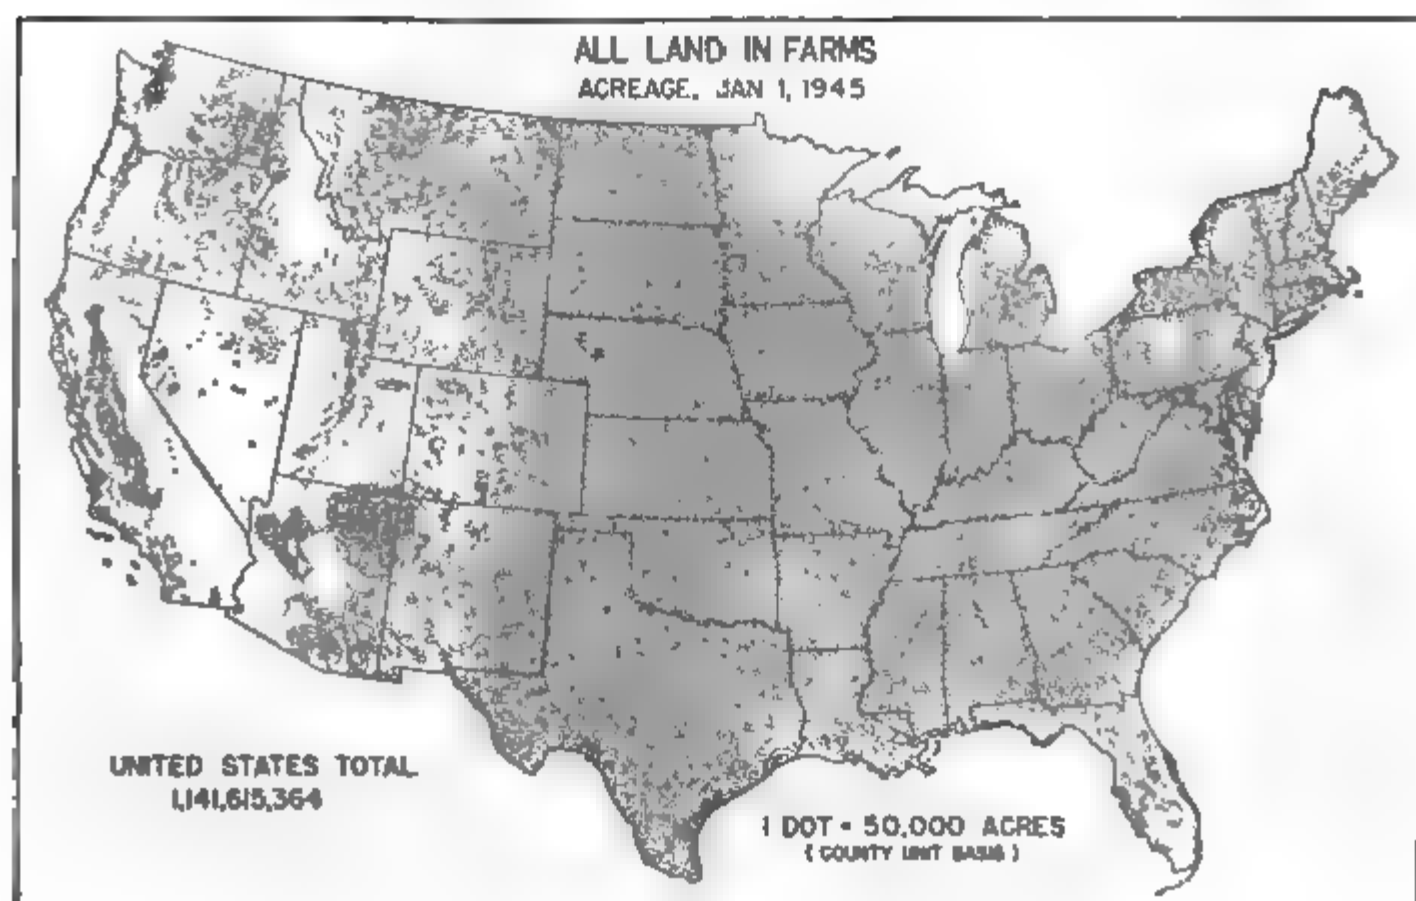

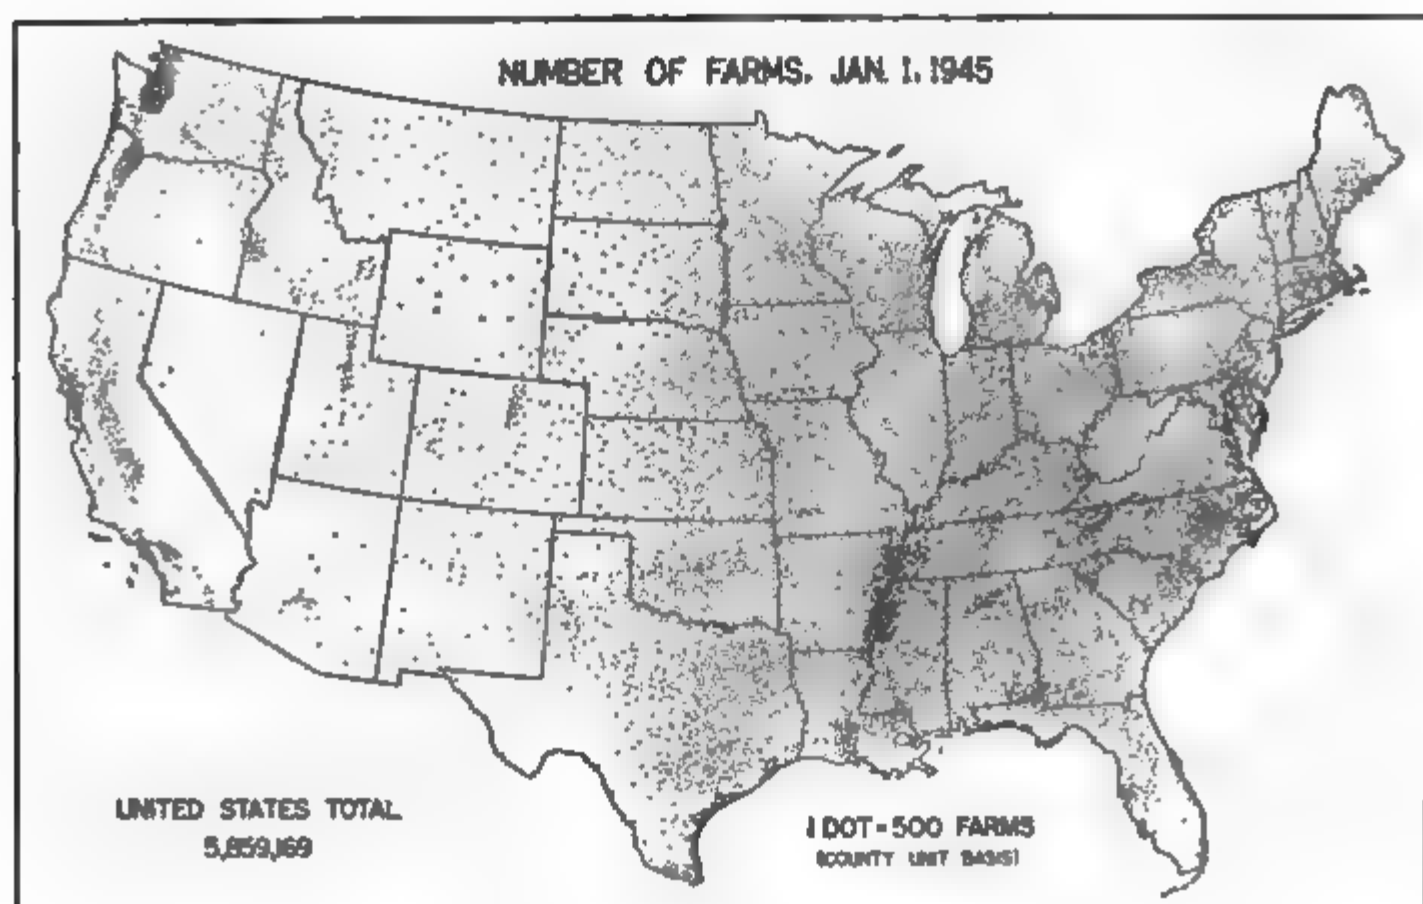

Statistics compiled by the Bureau of Agricultural Economics on crops, livestock and livestock products, agricultural prices, farm employment, and other related subjects are based mainly on data obtained through mail questionnaires. The basic information is obtained from nearly three-quarters of a million reporters, located in every agricultural county in the United States, who report on one or more items during a year. These reporters, mostly farmers, report for their own and nearby farms on some 80 crops and scores of other items pertaining to agricultural production and farm family living.

Cash income is the cash receipts from farm marketings and represents the quantities of crops, livestock, and livestock products sold by farmers multiplied by the prices received per unit of production at the local market. Gross farm income includes Government payments, value of farm products consumed on the farm, rental value of farm homes, as well as cash receipts from farm marketings.

These general notes on agriculture apply also to section 24, Agriculture—Production and Related Subjects, which covers farm crops, foodstuffs, farm animals, animal products, and related subjects.

<sup>1</sup> Estimates.

<sup>2</sup> Estimate for total population as of Jan. 1, 1945, including armed forces overseas; estimates for urban and rural as of July 1, 1945, for civilian population only.

<sup>3</sup> For definition of urban and rural, see p. 2.

<sup>4</sup> 1930-45 farm population comprises all persons living on farms regardless of occupation, except that 1945 figures exclude persons in dwelling units rented to others than those engaged in agricultural work; 1920 figures include also those farm laborers (and their families) who, while not living on farms, lived outside limits of any incorporated place. Further difference is due to fact that 1920, 1935, and 1945 censuses were taken in January, while 1930 and 1940 censuses were taken in April, when number of persons on farms is appreciably larger. For additional farm population data, see tables 13 and 15, pp. 15 and 17.

<sup>5</sup> Land used only for pasture that had been plowed within 7 years.

<sup>6</sup> Pasture other than cropland and woodland.

<sup>7</sup> Cropland harvested, crop failure, cropland idle or fallow, and plowable pasture.

<sup>8</sup> "Improved land"; figures nominally include land available for crops and land occupied by buildings, yards, and barnyards.

<sup>9</sup> Value is of specified farm property, not all farm property.

<sup>10</sup> 1945 figure represents value of horses, mules, cattle, hogs, sheep, goats, and chickens; in addition to these items, 1940 figure includes value of poultry other than chickens, bees, and fur animals in captivity. For 1940 figures comparable with 1945, see table 652, p. 600. For items and age groups included for earlier years, see 1940 Census of Agriculture Reports, Vol. III; for figures comparable to 1945, see 1945 Census of Agriculture Reports, Vol. II.

Source: Department of Commerce, Bureau of the Census; Sixteenth Census Reports, Agriculture Vol. III, and 1945 Census of Agriculture, Vol. II.

<sup>1</sup> Not available.

<sup>2</sup> Acres, value, and debt for part owners represent owned portion only; similar data for rented portion included with data for tenants and managers. Therefore, average debt and equity per farm are not shown for "tenants and managers" group. Cropper operations are included in the "tenants and managers" group.

Source: Department of Commerce, Bureau of the Census and Department of Agriculture, Bureau of Agricultural Economics; cooperative report, Farm-Mortgage Debt in the United States.

<sup>1</sup> For items comprising gross income, see table 674.

<sup>2</sup> Farm mortgage interest, cash wages and perquisites to hired labor, net rent to nonfarm landlords, cost of seed goods and services annually used in production, and estimates of depreciation or maintenance of durable implements, equipment, and buildings (including service buildings and dwellings).

<sup>3</sup> Includes cash wages and value of food, fuel, and lodging furnished. Excludes wages or other income farm laborer receives from nonfarm sources.

**No. 679.—FARMS—NUMBER AND PERCENT DISTRIBUTION, BY TYPE: 1940 AND 1945**

[For 1940, farms were classified by type on basis of major (single largest) source of income in 1939. For 1945 (value refers to calendar year 1944), farms with value of products used by farm household exceeding total value of all farm products sold were classified as subsistence farms. All others were classified by type of product representing more than 50 percent of total sales; if no one source of income represented more than 50 percent of total sales, the farm was classified as "General"]

TYPE OF FARM	1940 TYPE CLASSIFICATION (Census of 1940)		1945 TYPE CLASSIFICATION

<sup>1</sup> Exclusive of housework. Inquiry for 1939 and for 1944 specifically excluded contract construction work. No mention was made of wages for this kind of work for 1929.

<sup>2</sup> Not available.

<sup>3</sup> Inquiry specified expenditures for automobiles, tractors, and motortrucks for 1929 and 1939, and trailers for 1939.

<sup>4</sup> Includes quantities for which the farm operator reported no expenditure or expenditure for freight only.

<sup>5</sup> Includes expenditures for lumber, roofing materials, hardware, cement, paint, fencing materials, etc.

## No. 688.—FERTILIZER CONSUMPTION, 1880 TO 1946, AND BY STATES, 1943 TO 1946

[In thousands of tons of 2,000 pounds. Based on tag sales, records of Government officials, or estimates. Beginning 1935, figures include tonnage distributed by Agricultural Adjustment Administration and by Tennessee Valley Authority, data for the latter representing fiscal years ending June 30. Data for phosphate rock used in Illinois and Florida, available only since 1939, have been excluded from annual comparisons. In addition to tonnage for consumption, fertilizers and fertilizer materials produced in continental U. S. are exported to island possessions.]

<sup>1</sup> Represents marketing season during which farm products of a specified year are moved into channels of trade. Marketing seasons overlap.

<sup>2</sup> For years since about 1935, comprises members, contract members, and shareholders, but excludes patrons not in these categories.

<sup>3</sup> Includes value of commodities sold or purchased for patrons and charges for rendering other essential services either in marketing or purchasing. Most duplication in value arising from intra-association transactions has been eliminated.

## AMERICAN SAMOA

Number of farms, 1930.....	816	Farms operated by owners, 1940.....	799
Number of farms, 1940.....	1,038		

<sup>1</sup> Data not available.

<sup>2</sup> For Alaska and Hawaii, figures are for acres; for Puerto Rico, cuerdas. A cuerda is equivalent to 0.9712 acre.

<sup>3</sup> Number of farms reported for 1930, 2,104, no other data available.

Source: Department of Commerce, Bureau of the Census; Sixteenth Census Reports, Agriculture, Territories and Possessions.

## 24. Agriculture—Production and Related Subjects

The data in this section are, for the most part, from the Bureau of the Census, Department of Commerce, and from various bureaus in the United States Department of Agriculture. In general, statistics for agriculture census years are from the Bureau of the Census. Estimates for intervening years, and adjustments, where necessary, to a January 1 basis are from the Bureau of Agricultural Economics, United States Department of Agriculture.

The most extensive of the current survey data are gathered by the Bureau of Agricultural Economics from questionnaires handled in cooperation with the Post Office Department through its rural mail carriers. These surveys obtain livestock data in June and December and crop acreage data in October. For each survey the rural carrier distributes 10 to 20 cards to farmers on his route. The farmer is asked to complete his questionnaire for his own farm and return the card to his mail box.

In the data prepared by the Bureau of Agricultural Economics, estimates of crop acreage and production for the census years are set up currently on available information. Later, if necessary, these data are revised to a level based largely on the census enumerations. The estimates for intercensal years are based on sample data obtained each year from individual reporters. This information is supplemented by other data, such as State assessors' enumerations of agricultural information, crop meter frontage measurements, reports of carlot shipments, warehouse receipts, local surveys, personal observations by field statisticians as well as reports from other sources having a knowledge of farming, agricultural production, and processing. Cotton acreage and production are also based on sample data and, in large measure, on ginning information gathered by the Bureau of the Census. Usually, all known sources of information pertaining to agriculture in general, from the farm to the consumer's household are tapped for basic facts used in compiling current statistics on agriculture.

For each decade from 1840 through 1900, the Census of Agriculture was taken as of June 1. The four decennial censuses since then have been taken as of April 15, 1910; January 1, 1920; April 1, 1930; and April 1, 1940. The 1925, 1935, and 1945 quinquennial Censuses of Agriculture were taken as of January 1. Comparison of inventory numbers of livestock from census to census is seriously affected by a change in the date of enumeration. From January to April there are material changes in numbers on hand in most parts of the country due to births, marketings, farm slaughter, etc. In an effort to obtain as much comparability as possible the 3 censuses taken in April either excluded recently born animals from the enumeration or provided for their enumeration in a separate age group. Volume II of the 1945 Census of Agriculture Reports shows a complete history of the enumeration of livestock and presents discussion of the comparability from census to census.

For most kinds of domestic livestock, there are comparatively short, cyclic fluctuations in numbers, even though the trend over a long period of time may be definitely one direction. A single census may be taken at a time when such a cycle is at the peak or at the trough of numbers and hence gives no true indication of the long-time trend.

Annual inventory numbers of livestock on farms prepared by the Department of Agriculture together with estimates of livestock, dairy, and poultry production are based on information furnished by individual farmers, supplemented by State assessors' data in a number of States, and by such records as brand inspections, rail and truck shipments, and inspected slaughter. The level for these inventories is based in large part on census enumerations for years when census data are available.

Information on prices received by farmers for products they sell and prices paid for articles they buy for production and family living are obtained from about 85,000 farmers, local merchants, and handlers of agricultural products. Season average prices received by farmers are calculated by weighting midmonth prices by monthly sales during the crop marketing season, beginning with the first month when a particular crop harvest begins.

The index numbers of prices received and of prices paid by farmers consist of the aggregate value of a fixed quantity of goods, based on current midmonth prices for these commodities, expressed as a percentage of the aggregate value of the same quantity of goods in the base period. The ratio of the index of prices received to the index of prices paid by farmers measures the monthly variation in the per unit exchange value of farm products.

Data in imports and exports are now compiled by the Department of Commerce, Bureau of the Census, and are published in the annual report, Foreign Commerce and Navigation of the United States. (See section 30, Foreign Commerce of the United States.) The official trade statistics based on the fiscal year are usually preferable to data presented on a calendar year basis, for use in comparing imports and exports with crop production since, for most crops, they coincide more nearly with the crop year.

### No. 693.—FARM PRODUCTION—INDEXES OF VOLUME, BY MAJOR GROUPS OF PRODUCTS: 1931 TO 1947

[1935-39=100. Indexes based on estimates of production for sale and for consumption in farm homes. Excludes products fed to livestock or used for seed. Calendar year production of livestock and livestock products is compared with crop production of same year. Commodities covered by index contributed about 93 percent of gross farm income during 1935-39]

<sup>1</sup> Based on data for 123 agricultural import classifications.<sup>2</sup> Supplementary agricultural imports consist of all imports similar to agricultural commodities produced commercially in the United States, together with all other agricultural imports interchangeable to any significant extent with such United States commodities. Complementary agricultural imports include all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, teas, and spices.

Source: Department of Agriculture, Office of Foreign Agricultural Relations; compiled from official records of the Bureau of Foreign and Domestic Commerce and of the Bureau of the Census. 1943–47 data appear in Foreign Agricultural Trade, June 1947.

## No. 701.—AGRICULTURAL AND FOREST PRODUCTS—EXPORTS AND IMPORTS: 1857 TO 1947

[All figures, except percentages, in thousands of dollars. Crude rubber and similar gums (now mainly plantation products) are included in agricultural products and excluded from forest products]

YEARLY AVERAGE OR YEAR ENDING JUNE 30—	AGRICULTURAL EXPORTS <sup>1</sup> (EXCL. FOREST PRODUCTS)			AGRICULTURAL IM- PORTS <sup>1,2</sup> (EXCL. FOREST PRODUCTS)		FOREST PRODUCTS

1936.....	76.2	124.8	127.6	94.4	79.4	1947.....	114.9	221.7	160.1	149.6	119.7

<sup>1</sup> Relative production as indicated by multiplying production of crops of each year by 1927-32 average prices and dividing aggregate for each year by average aggregate for same crops during 1923-32 (predrought) period.

<sup>2</sup> Corn, oats, barley, sorghums for grain, wheat, rye, buckwheat, rice, flaxseed, cotton, all hay, sorghums for forage and silage, dry edible beans, soybeans for beans, peanuts, potatoes, sweetpotatoes, tobacco, sorgo sirup, sugarcane, sugar beets, and cowpeas.

<sup>3</sup> Asparagus, snap beans, cabbage, sweet corn, cucumbers, peas, spinach, and tomatoes.

<sup>4</sup> Asparagus, snap beans, cabbage, cantaloupes (including honeydews, honeyballs, and miscellaneous melons), carrots, cauliflower, celery, cucumbers, lettuce, onions, peas, spinach, tomatoes, watermelons, beets, eggplant, and peppers. Excludes production of farm gardens, home gardens, and most of market gardens.

<sup>5</sup> Apples, peaches, pears, grapes, plums, prunes, oranges, grapefruit, lemons, apricots, strawberries, cranberries, and olives.

Source: Department of Agriculture, Bureau of Agricultural Economics; published in Crops and Markets and in annual summary, Acreage, Yield, and Production of Principal Crops.

## No. 708.—ACREAGE LOSSES—ESTIMATED ACREAGES OF CERTAIN CROPS PLANTED AND NOT HARVESTED: 1929 TO 1947

[In thousands of acres. Acreages for winter wheat represent areas sown preceding fall and not harvested, thus including considerable land subsequently planted to other crops. Acreages for cotton include more than 10 million acres plowed under in 1933. Excludes acreages of grains cut for hay. Totals do not show total crop losses chiefly because of large acreage of hay land which produced only pasturage in some dry seasons]

YEAR	Total	Corn	Winter wheat	All spring wheat	Oats	Barley	Sorghums	Flaxseed	Cotton	Beans, dry edible	Other crops <sup>1</sup>

1939	9,525	1,879	24.3	530,892	138,631	35.3	96.09

<sup>1</sup> Excludes 14,503,000 acres of corn cut for fodder, valued at \$206,935,000, probably duplicated in acreage of corn harvested for grain. 3,107,000 acres of mature crops hogged off (corn, velvetbeans, soybeans, peanuts, sweet potatoes, etc.) also excluded.

<sup>2</sup> Total acreage of crops for which figures are available.

<sup>3</sup> Not available, or data not comparable.

<sup>4</sup> Irish and sweet potatoes included with "field crops," not with "vegetables." Acreage of vegetables represents acres of vegetables harvested for sale only; acreage in farm gardens not available. Value includes both vegetables for home use and for sale.

<sup>5</sup> Excludes acreage of horticultural specialties (not available for 1944); value includes horticultural specialties.

<sup>6</sup> Excludes acreage for alfalfa, clover, and grass seeds harvested, probably duplicated in hay acreage.

<sup>7</sup> Only strawberries reported in small fruits; other small fruits included in field crops.

<sup>8</sup> Vegetables for sale.

<sup>9</sup> Farm garden vegetables for home use only.

<sup>10</sup> Acreage in fruit orchards, vineyards, and planted nut trees not secured prior to 1930.

<sup>11</sup> Excludes acreage for horticultural specialties.

Tung nuts <sup>3</sup>			do	2, 321	62, 693	53	3, 130
Horticultural specialties						129, 575	231, 230

<sup>1</sup> Irish potatoes and sweetpotatoes included with "field crops," not with "vegetables."

<sup>2</sup> Excludes sweet corn, popcorn, "Egyptian corn," kafir, and milo maize.

<sup>3</sup> Figures for 1944 are not fully comparable with those for 1939. 1944 totals are for States for which a separate inquiry was carried on schedule. For further discussion, see 1945 Census of Agriculture, Vol. II.

<sup>4</sup> Oat hay included with small grains cut for hay.

<sup>5</sup> Excludes flax and wheat mixture.

<sup>6</sup> Clover seed except sweet clover.

<sup>7</sup> Represents acreage of vegetables harvested for sale only; acreage in farm gardens not available.

<sup>8</sup> Acreage of horticultural specialties not available for 1944 and therefore excluded for 1939; value includes horticultural specialties.

<sup>9</sup> Includes blackberries and dewberries, blueberries, boysenberries, loganberries, youngberries, raspberries, and strawberries.

Figures for 1800 to 1896 represent commercial movement, as given by Dan Talmage's Sons Co. Louisiana and Texas, 1900 to 1923; Louisiana only, 1924 to 1927, Louisiana and Florida, beginning 1928. Data for linters included 1810-1865; excluded for subsequent years. Beginning 1890, ginnings as reported by Bureau of Census. Figures for some years include small amounts in California, Mexico, cotton ginned in United States. Round bales counted as half bales. Rice weight. Figures prior to 1899 compiled by Bureau of Census from reports published by Department of Agriculture. See also note 10, table 707, p. 652. <sup>1</sup> Census figures for the previous year. Figures for 1870 and 1880 represent estimated average production for 1863-71 and 1880-82, respectively. <sup>2</sup> Not yet available. Source: Dept. of Agriculture, Bureau of Agricultural Economics, except as noted; annual report, Agricultural Statistics. Also published in annual crop reports.

**No. 707.—PRINCIPAL CROPS—ACREAGE, PRODUCTION, AND VALUE: 1866 TO 1947**

[Tons are of 2,000 pounds. For weights of units of measurement for principal products, see Appendix, p. 962. Approximate weights of units of measurement for other products are as follows: Number of pounds to a bushel—sweetpotatoes, 55; sorghums for grain, 56; clover seed, 60. Number of pounds to a barrel of cranberries, 100. Prices and yields for periods are weighted averages except for cotton and cottonseed, which are simple averages of prices and yields for individual years. Acreage, production, and yield of all crops revised to census data.] See table 706 for later estimates of 1939 to 1945 production.

<sup>1</sup> Values are based on season average or Dec. 1 prices. See notes on "Price" column.

<sup>2</sup> Received by farmers. Beginning 1908, prices are season average prices for the crop-marketing season; prior thereto, Dec. 1 prices. Prices for 1937, 1940, and 1941 for corn, 1938 through 1942 for wheat, and 1940 through 1944 for rye, include an allowance for unredeemed loans at average loan value.

<sup>1</sup> Values are based on season average or Dec. 1 prices. See notes on "Price" column.

<sup>2</sup> Received by farmers. Prices are season average prices as follows: Barley, buckwheat, and flaxseed, beginning 18; rice, beginning 1909. Prices for prior years are as of Dec. 1. Prices for 1940 through 1942 for barley and 1942 and 1943 for flaxseed include an allowance for unredeemed loans at average loan value.

<sup>1</sup> Values are based on season average or Dec. 1 prices. See notes on "Price" column.

<sup>4</sup> Received by farmers. Beginning with 1908 for potatoes and cotton, 1910 for sweetpotatoes, and 1909 for cottonseed, prices are season average prices. Figures for prior years are Dec. 1 prices. For 1933, 1934, 1937, 1938, and 1940 through 1942, season average prices for cotton crops include an allowance for unredeemed loans at average loan value.

<sup>5</sup> Average for 9 years.

<sup>6</sup> Average for 6 years.

<sup>7</sup> Average for 7 years.

<sup>8</sup> Average for 4 years.

<sup>9</sup> Includes 7,462,000 bushels in 1928, 66,000 bushels in 1931, and 2,175,000 bushels in 1932 not harvested on account of market conditions. Price and value apply only to the harvested portion of the crop.

<sup>10</sup> State production figures, which conform with census annual ginning enumeration, with allowance for cross State ginnings, rounded to thousands and added for United States totals. Cotton grown in Baja, California, ginned in California from 1913 to 1924, has been excluded.

<sup>11</sup> Production is in running bales prior to 1899; 500-pound gross weight bales thereafter.

<sup>12</sup> Data for 1909 and 1910.

<sup>13</sup> Area in cultivation July 1 less removal of acreage reported by the Agricultural Adjustment Administration, less abandonment on area not under contract.

Values are based on season average or Dec. 1 prices. See notes on "Price" column.

Received by farmers. See also notes on prices for each crop.

Based on the reported price of grain sorghums.

Prices are season average prices, prices of beans being for cleaned beans.

Average for 1929 and 1930.

Farm value of dry edible beans equals the price of cleaned beans applied to the production of cleaned beans or than to the total production.

Average for 1924 and 1925.

Dec. 1 prices, 1916 to 1931; beginning 1932, season average prices.

includes 5,436,000 pounds in 1935, 4,365,000 pounds in 1937, 3,140,000 pounds in 1938, and 2,813,000 pounds in 1939, not available for marketing because of economic conditions and the marketing agreement allotments.

and values are computed on the harvested crop.

<sup>16</sup> Equivalent solid acreage.

<sup>19</sup> Bags of 100 pounds (uncleaned).

<sup>22</sup> Average for 1919 and 1920.

1947.....		785	17,521		22.30		112,560	128,919		1.15

<sup>1</sup> Values based on season average or Dec. 1 prices. See notes on "Price" column.

<sup>2</sup> Received by farmers. Prices as of Dec. 1 except as noted.

<sup>3</sup> Prices are season average prices beginning 1919; Dec. 1 prices theretofore. <sup>4</sup> All hay.

<sup>5</sup> Dec. 1 price. Prior to 1942, price of sweet sorghums for forage and hay.

<sup>6</sup> Average for 1929 and 1930.

<sup>7</sup> Not available.

<sup>8</sup> Prior to 1939, data are for 7 States. Production figures include fruit consumed on farms, sold locally, and used for manufacturing, as well as that shipped, they exclude fruit which ripened on trees but was destroyed prior to picking. Figures relate to crop produced from bloom of year shown. In California, picking season usually extends from about Oct. 1 to Dec. 31 of following year. In other States, season begins about Oct. 1.

<sup>9</sup> Prices are season average.

<sup>10</sup> Net content of boxes varies. In California and Arizona, approximate average is 77 lbs.; in other States, 80 lbs.

<sup>11</sup> Season average returns to growers. Price and value apply to entire crop exclusive of that portion donated to charity, unharvested, and/or eliminated on account of market conditions. (See note 35.) Prices are equivalent packing-house-door returns for all methods of sale and are weighted by production to obtain U. S. averages.

<sup>12</sup> Production includes following quantities donated to charity, unharvested, and/or eliminated on account of economic conditions: 1932, 877; 1934, 1,395; 1935, 614; 1936, 1,025; 1937, 1,204; 1938, 2,949; 1939, 1,236; 1940, 1,322; 1941, 762; 1942, 664; 1943, 830; 1944, 1,771; 1945, 731; 1946, 2,631. Price and value are computed on remaining crop.

Source: Dept. of Agriculture, Bureau of Agricultural Economics; annual report, Agricultural Statistics, and annual summaries of crop statistics.

## No. 706.—CORN—ACREAGE, PRODUCTION, AND VALUE, BY STATES: 1936 TO 1947

[Pounds per bushel, 56. Covers corn for all purposes, including hogged and siloed corn and that cut and fed without removing ears, as well as that husked and snapped for grain. Prices are season average prices received by farmers]

## No. 716.—COTTON AND COTTONSEED—ACREAGE, PRODUCTION, AND VALUE, BY STATES: 1911 TO 1947

[Cotton production excludes linters. Figures for production in some States differ slightly from census figures on ginnings due to ginnings in 1 State of cotton grown in another. Where figures are not shown for individual States, separate data are not available for entire period but are included in United States totals. Values shown are for marketing season or crop year and should not be confused with calendar year income. Yields and prices for periods are simple averages of figures for individual years. Tons are of 2,000 pounds]

YEARLY AVERAGE OR YEAR	COTTON					COTTONSEED			Total farm value
	Acres harvested	Bales (500 pounds gross)	Farm value	Yield per acre	Farm price per pound	Quantity	Farm value	Farm price per ton <sup>1</sup>	
	Thousands	Thousands	1,000 dollars	Pounds	Cents	1,000 short tons	1,000 dollars	Dollars	1,000 dollars

# No. 719.—TRUCK CROPS, COMMERCIAL—ACREAGE, PRODUCTION, AND VALUE, BY KIND, 1936 TO 1947, AND LEADING STATES, 1947

Includes only States with crop of commercial importance, for fresh market and processing combined. Approximate weights of units of measurements are as follows: Number pounds to crate—aspargus, 30; cantaloupes, 70; cauliflower, 37; celery, 45 (1/4-size crates); honeydew melons, 35; strawberries, 36 (3/4-quart crates). Number pounds to bushel—carrots, 50; cucumbers, 48; eggplant, 33; escarole, 25; kale, 18; peppers, 25; potatoes, 50. Number pounds to box of artichokes, 40. Lettuce is in western crates (mostly 4 to 8 dozen heads), 70 pounds; onions, 50-pound sacks, and garlic, 100-pound sacks. Totals are of 2,000 pounds. Values based on average seasonal prices received by growers

<sup>1</sup> Includes some quantities not marketed and excluded in computing value.

<sup>2</sup> Shelled basis 2 pounds of lima beans produce approximately 1 pound shelled beans; 2 1/4 pounds of green peas, 1 pound of shelled peas.

<sup>3</sup> Mainly for canning, but includes also market crop in New Jersey, New York, and Pennsylvania.

<sup>4</sup> Peppermint and spearmint.

<sup>5</sup> Pounds of oil.

<sup>6</sup> Commercial early Irish.

<sup>1</sup> Growth of 9 months in Louisiana and 12 months in Florida. Sugar campaign usually not ended before February in Louisiana and April in Florida, following season of growth of cane.

<sup>2</sup> Calculated by the Agricultural Adjustment Administration method. (S. R. Series 1, No. 1.)

<sup>3</sup> Based on the ratio of 100 pounds of raw sugar to 93.46 pounds of refined sugar.

<sup>4</sup> Not including sirup production. See table 728.

<sup>5</sup> Includes price support payments of \$1.45 per ton in 1945. Excludes Government payments under Sugar Act of \$1.21 per ton in 1945 and approximately \$1.25 in 1946.

Source: Dept. of Agriculture, Bureau of Agricultural Economics; annual report, Agricultural Statistics. Also published in The World Sugar Situation.

# No. 730.—SUGARCANE AND CANE SUGAR—PRODUCTION OF HAWAII: 1936 TO 1947

[Tons are of 2,000 pounds]

YEAR BEGINNING JAN. 1—	Total acres in cane	CANE USED FOR SUGAR			SUGAR MADE (1,000 TONS)		Raw sugar 96° made per ton of cane (pounds)	Recovery of equivalent refined sugar from cane ground <sup>4</sup> (percent)
		Acres harvested	Production (1,000 tons)	Yield per acre (tons) <sup>1</sup>	Converted to 96° raw basis <sup>2</sup>	Equivalent refined <sup>3</sup>		
1936	245,891	130,828	9,170	70	1,042	974	227	10.62

1939	235,227	138,440	8,610	62	904	929	231	10.79
1940	235,110	138,417	8,567	63	977	913	228	10.67
1941	238,111	130,768	8,560	65	947	885	221	10.34
1942	225,199	114,745	7,918	69	870	813	220	10.27
1943	220,928	113,754	8,185	72	898	828	216	10.11
1944	216,072	109,523	7,832	72	878	818	223	10.44
1945	211,331	103,173	7,371	71	821	768	223	10.41
1946	208,376	84,379	6,002	71	680	636	227	10.59
1947	211,624	113,020	7,942	70	872	815	220	10.26

<sup>1</sup> Age of cane equals 18 to 22 months of growth.

<sup>2</sup> See note 2, table 729.

<sup>3</sup> One ton of raw sugar 96° test is assumed to be equivalent to .9346 ton of refined.

<sup>4</sup> Based on tonnage of cane used.

Source: Data collected by Dept. of Agriculture, Bureau of Agricultural Economics, through the Hawaiian Sugar Planters' Association. Published in annual report, Agricultural Statistics, and in The World Sugar Situation.

<sup>1</sup> Beginning 1910, stocks on hand are taken into account. Figures for 1910-20 are for cane sugar only; 1922-34 includes stocks of raw cane sugar in all ports and beet sugar held by factories, according to trade sources. Beginning 1935, includes stocks of raw and refined sugar held by refiners, by importers and distributors of direct consumption sugar, and by beet sugar factories, as reported by Sugar Division, U. S. Department of Agriculture.

<sup>2</sup> Beet sugar converted to raw at rate of 1.075 through 1920.

<sup>3</sup> Includes Hawaii, Puerto Rico, and the Philippines. Virgin Islands included beginning July 1, 1917.

<sup>4</sup> No account taken of sugar imported in other forms. Imports from Philippine Islands excluded beginning July 1, 1900, and from Virgin Islands beginning July 1, 1917; reexports deducted through 1932; imports for consumption beginning 1933.

<sup>5</sup> Includes shipments to Hawaii and Puerto Rico for all years, to Alaska beginning 1933, and Virgin Islands beginning Jan. 1, 1935. Excludes direct exports to foreign countries through customs districts of noncontiguous territories.

<sup>6</sup> Sugar used in manufacture of other commodities for exports on which drawback was paid, taken into account beginning 1910.

<sup>7</sup> Raw sugar converted to refined by multiplying by following factors: For 1930 Cuba and Hawaii, 0.9358; Puerto Rico, 0.9398; Philippine Islands, 0.95; all others, 0.932; beginning 1931, Hawaii, 0.9617; Puerto Rico, Philippine Islands, and Virgin Islands, 0.946; Cuba and all others, 0.9418.

1947 (prel.).....	4,679	2,199	1,824	375	1,000	950	530	33,466	6.6	14.0

<sup>1</sup> Includes Puerto Rico, Hawaii, Phil. Isls., and beginning 1910, Virgin Islands not shown separately.

<sup>2</sup> Beet sugar not converted to raw prior to 1909. Refined reduced to raw basis by multiplying by 1.07.

<sup>3</sup> For 1900 to 1906, shipments to United States.

<sup>4</sup> Statistics for 1874 to 1880 represents exports. Normal grinding season begins Oct. 1. In 1933, production was from grindings of Oct. 1, 1933, to Dec. 31, 1934; beginning 1934, from grindings of the next calendar year.

<sup>5</sup> Exports 1871 to 1911, production 1912 and subsequently. Includes production of muscovado and pancecha, low grades of sugar mostly for domestic consumption.

<sup>6</sup> Less than 500 tons.

<sup>7</sup> One year only.

<sup>8</sup> Not available.

<sup>9</sup> Louisiana and Texas 1900 to 1923, Louisiana only 1924 to 1927; Louisiana and Florida beginning 1928.

<sup>1</sup> Exports assumed to be wholly from sugar imported from foreign countries.

<sup>2</sup> Hawaii, Puerto Rico, and Philippine Islands and beginning July 1, 1917, Virgin Islands.

<sup>3</sup> Not available.

Source: 1875 to 1909, computed from production as reported by Department of Agriculture, and exports, imports and shipments as reported by Department of Commerce, Bureau of Foreign and Domestic Commerce; thereafter, based on data in tables 733 and 734.

**No. 736.—COTTON—PRODUCTION, CONSUMPTION, EXPORTS, IMPORTS, PRICES, AND CARRY-OVER: 1905 TO 1947**

[All figures, except average net weight and price, in thousands of bales. Production figures relate to crop of preceding year and are compiled from individual reports of ginner. Beginning 1911, price per pound represents average price received by growers, as computed by Department of Agriculture; for earlier years, it is average price of average grade marketed in New Orleans prior to April 1 of following year. Consumption figures relate to 12 months during which crop of specified year was chiefly marketed, and not to calendar year. Export and import figures (compiled by Bureau of Foreign and Domestic Commerce through April 1941, Bureau of Census thereafter) relate to 12 months beginning Sept. 1 for years prior to 1915, and to 12 months beginning Aug. 1, thereafter. Figures for linters are included in those for consumption prior to 1909, and in export figures prior to 1915. Separate figures for linters prior to those years not available. See 1937 Statistical Abstract, table 659, for figures for years prior to 1905]

YEAR ENDING JULY 31 <sup>1</sup>	COTTON (EXCLUSIVE OF LINTERS)							
	Production		Average net weight of bale (lbs.)	Average price per pound upland cotton (cents)	Con- sumption (running bales)	Exports of do- mestic cotton (running bales)	Imports (equiva- lent 500- pound bales)	Carry- over (running bales)

## No. 789.—ANIMAL AND VEGETABLE FATS AND OILS—PRODUCTION, CONSUMPTION, AND STOCKS: 1946 AND 1947

[Data cover factory operations only, and therefore exclude considerable quantities of lard, tallow and grease produced on farms and by local butcheries and small renderers, and quantities consumed and held in homes, hotels, restaurants, bakeries, and quantities consumed and held by painters, building contractors, garages, etc. Stocks include amounts held by and in transit to producers, factory consumers and public storages, but exclude amounts held in private storages by retailers, wholesalers and jobbers. Additional data on consumption and stocks of raw materials, such as cottonseed, copra, corn germs, flaxseed, soybeans, etc., and consumption data by process and end-use are contained in Facts for Industry Series M17-1 and M17-2]

[In thousands of pounds]

<sup>1</sup> Data from peanut-oil producers were collected by U. S. Dept. of Agriculture.

<sup>2</sup> Included in "all others" to avoid disclosing operations of individual establishments. <sup>3</sup> Included in cod oil.

<sup>4</sup> Data for "other fish" consumption during 1946 indicate an excess of approximately 20,000,000 pounds over supply. This may be accounted for, in part, by duplication in consumption of 6,127,000 pounds reported once by hydrogenators and again when further processed by fat splitters and other users. Other consumption duplication involving similar cases, plus possible understatement of production, may account for the remaining discrepancy.

<sup>5</sup> Not shown to avoid disclosure of operations of individual establishments.

<sup>6</sup> Beginning July 1947, data for crude and refined tall oil were reported separately. Production and consumption data are for July 1 to Dec. 31, 1947. Not comparable with 1946 since data for tall oil includes companies not previously reporting.

<sup>7</sup> Not comparable with 1946 since three plants previously reporting fat splitting and production and consumption of fatty acids in soap are now reporting consumption of animal fats, such as inedible tallow in the manufacture of soap.

## No. 755.—DOMESTIC ANIMALS ON FARMS—NUMBER AND VALUE: 1880 TO 1948

[For census years prior to 1910 and for Jan. 1 estimates by Dept. of Agriculture, animals of all ages are included except in figures for cattle and sheep, 1880 and 1890, which are nominally exclusive of calves and lambs, respectively. Difference in date of enumeration affects comparability of census figures for all classes and especially for swine]

YEAR AND DATE	NUMBER (THOUSANDS)							Value of animals (thousands of dollars) <sup>5</sup>
	Horses <sup>1</sup>	Mules <sup>1</sup>	All cattle <sup>1</sup>	Dairy cows <sup>2</sup>	Other cattle <sup>1</sup>	Sheep <sup>3</sup>	Swine <sup>4</sup>

<sup>1</sup> Census figures for 1910 are for animals over 3½ months old; 1920, 1925, 1935, and 1945, animals of all ages; 1930 and 1940, animals over 3 months old.

<sup>2</sup> Census returns prior to 1900 represent "milch" cows; 1900, cows 2 years old and over kept for milk; 1910, dairy cows 2 years old and over on Jan. 1, as estimated; 1920 and 1925, dairy cows and heifers 2 years old and over; 1930 and 1940, cows and heifers 2 years old and over on Jan. 1 of census year, kept mainly for milk production.

<sup>3</sup> Census figures for 1910 are for sheep and lambs over 3½ months old; 1920, 1925, 1935, and 1945, sheep and lambs of all ages; 1930 and 1940, sheep and lambs over 6 months old. Jan. 1 estimates are for stock sheep.

<sup>4</sup> Census figures for 1910 are for hogs and pigs over 3½ months old; 1920, 1925, 1935, and 1945, hogs and pigs of all ages; 1930, hogs and pigs over 3 months old; 1940, hogs and pigs over 4 months old.

<sup>5</sup> Value of animals specified in preceding columns.

<sup>6</sup> Not available.

<sup>7</sup> See source note.

\* No estimate.

† Less than 500.

Source: 1935, 1940, and 1945 (except cows and heifers 2 years old and over kept for milk in 1935 and 1945), Department of Commerce, Bureau of the Census; 1945 Census of Agriculture, Vol. II. Other figures are estimates by Department of Agriculture, Bureau of Agricultural Economics, published in *Livestock on Farms Jan. 1*.

# No. 757.—DOMESTIC ANIMALS AND CHICKENS ON FARMS—NUMBER AND VALUE, BY KIND, AND FARMS REPORTING: 1930 TO 1945

[Data for 1930 and 1940 are as of Apr. 1, and for 1935 and 1945 as of Jan. 1. Difference in date of enumeration affects comparability. Total value of all livestock for which data were collected at each census is shown in table 649, p. 595. Available data for certain classes not shown in the table below are as follows: Turkeys over 3 months old, 1935, 5,382,000, valued at \$11,668,000; turkeys over 4 months old, 1940, 4,362,000, valued at \$7,462,000. Hives of bees (on farms and elsewhere), 1930, 3,108,000, valued at \$13,632,000; 1940, 2,277,000, valued at \$7,326,000]

No. 767.—MEATS AND LARD—PRODUCTION, FOREIGN TRADE, AND CONSUMPTION,  
BY KIND: 1938 TO 1946

[All amounts, except per capita, in millions of pounds. Pork production represents total hog-carcase weight, less raw fat from carcass rendered into lard. Other meat production represents dressed carcass weight only, with edible byproducts excluded. Lard production represents rendered weight of lard. Uninspected production includes farm, retail, and nonfederally inspected wholesale slaughter. Exports and imports of meats comprise the several kinds of meat converted to a dressed-carcase-weight basis. Lard exports represent rendered lard, including neutral lard. Exports include shipments to Alaska, Hawaii, Puerto Rico, and Virgin Islands. Consumption represents production plus imports less exports, with allowance for changes in storage stocks. Figures for recent years are subject to revision.]

YEAR	PRODUCTION			Exports of U. S. production	Imports for con- sumption	CONSUMPTION	
	Total	Federally inspected	Unin- spected (esti- mated)			Total	Per capita (pounds) <sup>1</sup>

## No. 779.—WOOL—PRODUCTION, IMPORTS, AND EXPORTS: 1839 TO 1946

[In thousands of pounds. Production, except census data, estimated and for calendar years; figures for 1900 and later years, revised estimates, based on 1945 census data. Puled wool included beginning 1900 and probably included for 1870 to 1899, though exact basis of estimates for these years is not known. Figures for 1839, 1849, and 1899 include only fleece. Exports and imports for 1839 are for fiscal year ending Sept. 30; for 1849 and 1899, fiscal years ending June 30; subsequently, calendar years. Imports and foreign exports prior to 1914 and domestic exports for all years include hair of Angora goat, alpaca, and other like animals]

PERIOD	Production	Imports <sup>1</sup>	EXPORTS		PERIOD	Production	Imports <sup>1</sup>	EXPORTS

<sup>1</sup> General imports through 1932; imports for consumption thereafter.

<sup>2</sup> Average for fiscal years 1913 to 1915.

<sup>3</sup> Exports for fiscal year ending June 30.

<sup>4</sup> Not reported separately for 1911, no exports in 1912.

Source: Production, 1839, 1849, 1899, Dept. of Commerce, Bur. of the Census; Sixteenth Census Reports, Agriculture, Vol. III. Other years, production, Dept. of Agriculture, Bur. of Agricultural Economics, annual report, Agricultural Statistics. Imports and exports, Dept. of Commerce, Bur. of Foreign and Domestic Commerce through April 1941, Bur. of Census, thereafter; annual report, Foreign Commerce and Navigation of the U. S.

## No. 780.—WOOL—PRICES AND VALUE OF IMPORTS: 1926 TO 1946

ITEM	1926-1930, average	1931-1935, average	1936-1940, average	1941-1945, average	1943	1944	1945	1946
Prices (cents per pound)								
Average U. S. local market price, unwashed	30	17	26	40	42	42	42	42
Bright fleece, fine clothing, at Boston	36	20	30	39	39	39	39	40
Territory, <sup>1</sup> fine staple scoured, at Boston	103	67	89	117	118	119	119	119
Value of U. S. imports (1,000 dollars) <sup>2</sup>								
Clothing <sup>3</sup>	6,060	1,059	2,771	22,918	27,085	22,343	23,085	20,361
Combing <sup>3</sup>	26,231	4,384	24,267	190,829	251,603	136,033	178,096	197,094
Carpet <sup>4</sup>	34,300	12,156	28,547	19,586	8,996	8,262	19,447	34,963
Not finer than 40s <sup>4</sup>		841	4,577	9,880	1,285	13,451	16,336	30,654

<sup>1</sup> Wyo., Mont., Utah, Nev., Colo., N. Mex., eastern Oreg., and parts of Dakotas.

<sup>2</sup> Imports for consumption beginning with 1933; general imports prior to 1933.

<sup>3</sup> Because of changes in tariff laws in 1922, much wool of kind formerly classifiable as "clothing" is now classified as "combing."

<sup>4</sup> Carpet excludes "not finer than 40s" beginning 1931.

1935	417.5	319.0	98.5	748.4	141.7						

<sup>1</sup> Scoured wool plus greasy wool reduced to a scoured basis, assuming average yields varying with class, origin, grade, and whether shorn or pulled.

<sup>2</sup> Shorn wool reported greasy plus pulled wool reported greasy raised to a "greasy-shorn" basis, and shorn and pulled wool reported scoured raised to a "greasy-shorn" basis, conversion factors varying with class, origin, grade, and whether shorn or pulled.

<sup>3</sup> Wool regarded as more or less suitable for apparel purposes; formerly "Combing and clothing."

<sup>4</sup> Does not include consumption on "cotton and other" systems.

## 25. Forests and Forest Products

The Bureau of the Census, Department of Commerce, and the Forest Service, Department of Agriculture, are the principal Government agencies engaged in the collection and publication of statistics of forest land, forest industries, and forest products. The Forest Service, through its forest survey activities, is making an inventory of the forest resource and is measuring rates of forest growth and drain. A number of reports for surveyed areas have been published. A series of reports based on a reappraisal of the Nation's forest situation made during 1945 and 1946 have been published recently. Tables on forest areas, stand, growth, and drain (Nos. 785-788) are from the preliminary report of this series, Basic Forest Statistics for the United States. Other reports from this series are (1) Gaging the Timber Resource of the United States, (2) Potential Requirements for Timber Products in the United States, (3) The Management Status of Forest Lands in the United States, (4) Wood Waste in the United States, (5) Protection against Forest Insects and Diseases in the United States, and (6) Forest Cooperatives in the United States. Other reports to follow these will deal with different aspects and the situation as a whole. Other publications of the Forest Service include data on stumpage and log prices, lumber consumption and distribution, lumber used in manufacture, and fire statistics. The Statistical Supplement to the Annual Report of the Chief of the Forest Service carries statistics of the administration of the national forests.

The Bureau of the Census, Department of Commerce, publishes information on forest industries and products in reports of the Census of Manufactures, in addition to annual reports of the Census of Forest Products. The Bureau of the Census also publishes statistics of foreign trade in forest products. Information on the domestic movement of forest products is reported by the Interstate Commerce Commission and the Association of American Railways.

The Bureau of Agricultural and Industrial Chemistry of the Department of Agriculture publishes annual reports of the production of naval stores.

The Bureau of Labor Statistics of the Department of Labor publishes statistics of wholesale lumber prices monthly and annually.

The Timber Products and Pulp and Paper series of the Industry Reports, published by the Bureau of Foreign and Domestic Commerce in cooperation with other government agencies, carry forest products statistics which have been developed to meet current needs for information.

A number of forest products trade associations and trade journals collect and publish statistics of forest products, production, markets, shipments, inventories, etc.

The completeness and reliability of published statistics of forests and forest products vary considerably. The data for forest land area and stand are, of course, much more reliable for areas which have been surveyed than for those areas which have not been covered. Forest fire statistics for federal lands are considered much better than for private lands, though too much reliance should not be placed in any estimates of fire damage or causes of fires.

In the field of forest products, data for lumber production and other manufactured products such as veneer and plywood, pulp and paper, cooperage, naval stores, etc., are much more complete than for the primary forest products such as poles and piling, fuelwood, and fence posts. As explained in the headnotes to the following tables, however, the data for lumber production are subject to certain limitations because of incomplete coverage. Information for pulp and paper, and plywood, on the other hand, are believed to be practically complete. Statistics relating to average value of lumber sawed may be subject to some special limitations due to under representation of small mills.

\* Balsam fir

\* Ponderosa pine.

\* Excludes dead chestnut of sawlog size still standing and usable.

\* May include some white fir, Sitka spruce, western hemlock, Port Oxford cedar and western red cedar commonly lumped with Douglas-fir in redwood cruising.

\* Excludes 416 million board feet in Plains region.

\* Includes Jeffery pine.

\* Includes western white pine, mountain hemlock, and lodgepole pine recorded in cruises of fir areas.

\* Redwood exclusive of volume of 1,000 bigtrees on cruises in west-side Sierra subregion.

<sup>1</sup> Within established boundaries. Area under Forest Service Administration includes federally owned lands in purchase units which have not been proclaimed as national forests, lands approved for acquisition, but un-acquired, experimental forests and ranges and all small federally-owned administrative sites outside of established boundaries, and lands within national forest boundaries which have been transferred from Soil Conservation Service and other Federal agencies but do not have a national forest status.

<sup>2</sup> Excludes those lands outside national forest boundaries transferred from Soil Conservation Service and other Federal agencies, and requiring Presidential or Congressional action to extend a national forest status.

<sup>3</sup> Outside established boundaries. Area under Forest Service Administration comprises lands acquired by United States in pursuance of certain national programs of land utilization and adjustment, which by Order of the Secretary of Agriculture have been placed under administration of Forest Service but have not yet been given a national forest status. Portions of these project lands, located within established national forest or purchase unit boundaries, are included as part of national forest or purchase unit acreage. Fort Bayard Reservation, New Mexico, was placed under administration of Forest Service by Federal Works Agency.

Source of tables 798, 799, and 800: Dept. of Agriculture, Forest Service; annual report, Agricultural Statistics.

## No. 801.—LUMBER—PRODUCTION, BY KIND OF WOOD, AND AVERAGE MILL VALUE

[Data not strictly comparable because of incomplete coverage of numerous small mills in the East prior to 1943 and exclusion of mills cutting less than 80 M ft. b. m. for all years prior to 1942 except 1899-1909 and 1919. Exclusion of under 80 M class of mills would affect totals less than 1 percent as reflected by 1943 survey. Data for 1943-45 include estimates for the East based on sample surveys. 1946 data are preliminary estimates derived by summation of Bureau of Census data for 25 States and Forest Service sample estimates for 22 States. See table 802. Small production quantities are subject to large sampling errors.]

[Quantities in millions of board feet; average mill value per 1,000 board feet]

<sup>1</sup> Excludes 165,365,000 board feet of softwood lumber and 7,605,000 board feet of hardwood lumber sawed by New England mills from timber salvaged from the hurricane of 1938.

<sup>2</sup> Preliminary. <sup>3</sup> Sample estimates of Forest Service. Subject to revision by Census Bureau.

<sup>4</sup> Arkansas and Oklahoma combined.

<sup>5</sup> California only; for 1909 and 1919 Nevada included with "All other."

<sup>6</sup> Includes Nevada.

No. 805.—LATH AND SHINGLES—PRODUCTION: 1899 TO 1945

[Lath in thousands and shingles in squares. Shingles reported in thousands prior to 1933 and converted to squares on basis of 800 shingles to square. See headnote, table 801 for explanation of lack of comparability of statistics. Data for shingles reasonably comparable over a period of years, because of complete enumeration of Red Cedar Shingle Industry, this industry's production comprising over 90 percent of total shingle production]

YEAR (CALENDAR)	Lath	Shingles	YEAR (CALENDAR)	Lath	Shingles

1935.....	4,925,009	10,479,095	1947 <sup>4</sup> .....			11,051,548	21,028,898

<sup>1</sup> Beginning 1914 includes screenings.

<sup>2</sup> Includes data for existing mills not classified as producers of pulp before 1940. In that year data for 6 mills not previously classified as producers of wood pulp were included for first time. For same reason, an additional mill was included in 1941, and 2 more added in 1943.

<sup>3</sup> Includes data for 25 existing mills not previously classified as producers of paper and paperboard.

<sup>4</sup> Includes estimated production of insulating board for 1 mill. Estimates were made on assumption that production of this mill was proportionately the same in 1941 and 1942 as in 1943.

<sup>5</sup> Preliminary; see table 812 for latest State figures available.

<sup>a</sup> Preliminary; detail for minor grades not available.

<sup>1</sup> Reported in bookpaper and paper not elsewhere classified.

<sup>2</sup> Reported as writing paper.

<sup>3</sup> 1944 figures include production of special industrial boards; figures for other years represent production of special industrial paper, only.

<sup>4</sup> Less than 500 tons.

<sup>5</sup> Includes estimated production of insulating board for 1 mill. Estimates made on assumption that production of this mill was proportionately the same in 1941 and 1942 as in 1943.

<sup>6</sup> Includes tube stock, classified as all other paperboard in subsequent years.

<sup>1</sup> Figures for turpentine and rosin from crude gum, beginning 1929-30, and from wood beginning 1933-34, relate to crop year ended Mar. 31. All other figures relate to calendar years.

<sup>2</sup> Figures compiled from data reported by establishments in Turpentine and Rosin industry.

<sup>3</sup> Figures compiled from data reported by establishments in Wood-Distillation industry.

<sup>4</sup> Not reported.

<sup>5</sup> Includes, for 1909 and 1914, 18,310 gallons and 92,401 gallons, respectively, of turpentine and, for 1914, 3,596 drums of rosin, reported by establishments engaged in manufacture of lumber and timber products.

<sup>6</sup> Estimated by J. E. Lockwood; complete data not available. Figures include estimates of rosin produced from reclaimed gum, as follows: 1932-33, 26,720 drums; 1933-34, 28,048; 1934-35, 27,200.

<sup>7</sup> Includes estimates by J. E. Lockwood for production of turpentine from steam-distilled wood.

<sup>8</sup> Includes data for rosin produced from reclaimed gum: For 1935-36, 43,350 drums; 1936-37, 34,155; 1937-38, 21,017; 1938-39, 31,983; 1939-40, 31,414; 1940-41, 20,181; 1941-42, 19,765; 1942-43, 11,297; 1943-44, 9,824; 1944-45, 8,066; 1945-46, 8,538; 1946-47, 8,449.

<sup>9</sup> Figures do not include data for rosin produced from reclaimed gum. See note 8.

## 26. Fisheries

The Fish and Wildlife Service, Division of Commercial Fisheries in the Department of the Interior, conducts annual surveys for various statistical information on the fishery industries. These data are published in greater detail in publications of the Service and include data on the volume of the catch of individual species of fish and shellfish and their value, employment in the fisheries, quantity of gear operated, the number of fishing and transporting craft employed in the capture and transporting of fishery products, employment in wholesale and manufacturing establishments, and volume and value of the production of manufactured fishery products. In addition to the basic statistics on employment, yield, and the production of manufactured fishery products for individual States and various geographical sections, there are included in reports data on imports and exports of fishery commodities; landings by fishing vessels at Boston, Gloucester, and New Bedford, Massachusetts; Portland, Maine; and Seattle, Washington; shad fisheries of the Hudson and Potomac Rivers; alewife fishery in the Potomac; seed oyster fisheries; a review of the Pacific Coast halibut fishery; a statement on whaling operations by United States firms; data on the sponge fishery; and lists of firms producing various manufactured fishery products. These data are summarized in the Statistical Abstract. The more detailed information may be obtained from the Fish and Wildlife Service, Washington 25, D. C.

### No. 815.—FISHERIES—SUMMARY OF TOTAL CATCH AND VALUE: 1930 TO 1946

**No. 819.—FISHERIES—DISPOSITION OF DOMESTIC CATCH: 1941 TO 1946**

[Includes Alaska. A large portion of waste derived from canning, filleting, and dressing fish and shellfish is utilized in production of fish meal and oil in addition to whole fish used in manufacture of these products. In 1941 about 775,000,000 pounds of waste were used in production of meal and oil. In subsequent years about 600,000,000 pounds of waste were used for this purpose each year]

## **27. Mining and Mineral Products**

This section summarizes the principal statistics relating to the mineral industries and mineral products. It includes not only the crude and prepared minerals associated with the mineral extraction, but also some of the finished products manufactured from minerals. Statistics relating to the manufacture of mineral products are also included in section 29, Manufactures. Additional information relating to the mineral industries and mineral products appear also in other sections of this Abstract such as the section on labor force, prices, foreign commerce, and others.

Most of the statistics in this section are from the Bureau of Mines and the Bureau of the Census, with additional material from other Government agencies such as the Bureau of Labor Statistics, Bureau of the Mint, and the Interstate Commerce Commission and from non-Government sources such as the Engineering and Mining Journal, American Metal Market, the Iron Age, and the American Gas Association. Data in this section cover the following areas unless otherwise indicated: Bureau of Mines production statistics, continental United States, and, for leading products, outlying areas; Bureau of Census statistics, continental United States; foreign trade statistics, the United States customs area, which includes Alaska, Hawaii, Puerto Rico, and for 1935 to 1939, the Virgin Islands.

Mineral statistics, with principal emphasis on commodity detail, have been collected annually or at more frequent intervals by the United States Geological Survey or by the Bureau of Mines since 1880. The principal statistics have been published annually through 1931 in Mineral Resources of the United States and thereafter in the Minerals Yearbook. Data available from Bureau of Mines publications include quantities and values of minerals produced, sold or used by producers, or shipped; quantities of minerals stocked; crude materials treated and prepared minerals recovered, by method of treatment; and mineral content of materials produced. Data on production are sometimes available by method of extraction. Shipments or sales of products are classified in many cases by grade, by end use, or by State of destination. The Bureau of Mines also collects and publishes separate data on employment and accidents. The number of workers and man-days or man-hours worked, as measures of exposure to accidents, are tabulated only for broad industry groups.

Censuses of mineral industries have been taken approximately every 10 years since 1840. The statistics are collected and published in the Census volumes in such a manner as to relate the statistics on the production of the various minerals as nearly as possible to data on employment, principal expenses, fuels and power consumed, and other information available only for each establishment as a whole. Each establishment is classified according to its most valuable product. The data are also collected and compiled in a manner to permit integration with other Census statistics such as for manufactures and wholesale and retail trade. Data are available on the number of operations, quantity and value of products, number of persons engaged (sometimes by department or type of work), principal expenses (wages, salaries, cost of supplies and materials, fuel, purchased electric energy, and work done on contract), horsepower of power equipment, and sometimes other items, such as man-hours, cost of buildings, machinery and equipment, number and type of power-loading machines, cost of drilling oil and gas wells, development work, and capital invested. Commodity statistics on many of the manufactured mineral products are also collected by the Bureau of the Census at monthly, quarterly, or annual intervals.

To avoid misinterpretation, it should be noted that the Census of Mineral Industries statistics in tables 831-833 relate to operations primarily engaged in extracting minerals

and in such primary mineral-preparation activities (crushing, screening, washing, flotation, etc.) as are needed to render the minerals marketable. Many of the statistics collected by the Bureau of Mines represent products of operations beyond the limits covered by the Census of Mineral Industries. Value totals based on Bureau of Mines publications, as shown in tables 827 and 830, are not comparable with the Census value totals, as shown in tables 831-833. Census values represent crude or prepared minerals f. o. b. the mine, well, or mineral-preparation plant. Bureau of Mines value totals include for most metallic products the value of ingot metal rather than the value of ores and concentrates, the value of natural gas at points of consumption rather than at wells, and the value of such manufactured products as cement and lime rather than the value of the limestone used in producing them.

## No. 830.—MINERAL PRODUCTS OF THE UNITED STATES—QUANTITIES AND VALUES: 1930 TO 1946

(Short tons are 2,000 pounds; long tons, 2,240 pounds. Data cover continental United States and, for leading products, outlying areas. Certain of the figures represent shipments rather than quantity mined, and some of the figures for 1946 are preliminary. Total values of metallic and nonmetallic products include figures which Bureau of Mines is not at liberty to publish and estimated figures for certain products for which data are not available. In some cases, neither quantity nor value can be shown and these products are not listed here but data for them are included in totals. On the other hand, values for certain products, such as coke, are excluded from totals to eliminate duplication, since values of products derived therefrom, or of raw materials used, are accounted for under other items.)

PRODUCT	QUANTITY						VALUE (THOUSANDS OF DOLLARS)					
	1930	1935	1940	1944	1945	1946	1930	1935	1940	1944	1945	1946

For footnotes, see p. 747.

<sup>1</sup> From both domestic and foreign ores. Beginning 1935, data represent antimonial lead produced at primary refineries from both primary and secondary sources, and are not comparable with data for prior years; estimate of value of primary antimony and lead content of antimonial lead from domestic sources included in total value of metallic products.

<sup>2</sup> Content of antimonial lead. Value of the antimony in antimonial lead excluded from total value.

<sup>3</sup> Largely from foreign ore beginning 1935. Value not included in total value. Bureau of Mines not at liberty to publish value figures or quantity figures for 1940-1946.

<sup>4</sup> Figures not available or Bureau of Mines not at liberty to publish them; value included in total value of metallic or nonmetallic products.

<sup>5</sup> Represents dried bauxite equivalent.

<sup>6</sup> Product from domestic ores only.

<sup>7</sup> Value does not include premiums paid miners by the Government. Total premiums for copper, lead, and zinc amounted to approximately \$83,000,000 in 1944, \$79,000,000 in 1945, and \$77,000,000 in 1946.

<sup>8</sup> According to Bureau of the Mint; valued at \$20.67+ per ounce through 1930, at \$35 per ounce in 1935 and subsequent years.

<sup>9</sup> Value not included in total value; see headnote.

<sup>10</sup> Value calculated at nominal price, 27 cents per pound.

<sup>11</sup> Figures not available. Value of products derived therefrom, or of raw materials used, is included elsewhere.

<sup>12</sup> According to Bureau of the Mint.

<sup>13</sup> Figures obtained through cooperation with Bureau of the Census. For 1940, total is estimate based on figures issued by Bureau of the Census as somewhat incomplete. For 1944-45 there was no canvass; total for clay products is estimate by Bureau of Mines; no

estimate was made for sand-lime brick. Value of clay products excludes values of pottery and refractories for 1940 and subsequent years.

<sup>14</sup> Includes brown coal and lignite, and anthracite mined elsewhere than in Pennsylvania.

<sup>15</sup> Quantities as reported by Department of the Interior, National Bituminous Coal Division; values include selling expenses.

<sup>16</sup> Gypsum mined; For 1940 and subsequent years, value of crude at mine; for earlier years, value as sold (crude and calcined).

<sup>17</sup> Figures cover fiscal year ending June 30 of year stated.

<sup>18</sup> Beginning 1935, includes mica recovered by grinding mica schist; excluded in prior years shown.

<sup>19</sup> Figures not available; value of iron ore sold for paint included in total value of non-metallic products.

<sup>20</sup> Includes sublimed blue lead, sublimed white lead, leaded zinc oxide, and zinc oxide except that in 1946 data for sublimed blue and white lead are excluded but value is included in total value of nonmetallic products.

<sup>21</sup> Figures not available.

<sup>22</sup> No canvass. Estimate of value included in total value of nonmetallic products.

<sup>23</sup> Includes soapstone used as dimension stone.

<sup>24</sup> From copper and zinc smelters and zinc roasters and from roasting of high-sulfide gold and silver concentrates.

<sup>25</sup> For 1930 figures exclude soapstone. For 1935 and thereafter, figures cover talc, pyrophyllite, and ground soapstone. Dimension soapstone is included in stone. Value of soapstone in 1930 is included in total value of nonmetallic products; Bureau of Mines not at liberty to publish figures.

<sup>1</sup> Companies with operations in more than 1 industry are counted only once in totals.

<sup>2</sup> See note 3, table 833. <sup>3</sup> See note 4, table 833. <sup>4</sup> See note 5, table 833. <sup>5</sup> See note 6, table 833.

<sup>6</sup> Represents permanent additions and major alterations (including installation costs); minor additions and replacements and cost of land are excluded.

<sup>7</sup> See note 9, table 833.

<sup>8</sup> Not shown because of dissimilar products.

<sup>9</sup> Includes amounts received by or due contractors for services performed during year.

<sup>10</sup> Includes statistics for 334 salaried employees paid \$1,091,000 at central offices that served more than 1 mineral industry.

<sup>11</sup> Contractors performing oil- and gas-field services were not asked to report expenditures for supplies and materials, fuel, purchased electric energy, or contract work, and contractors performing general services for mineral industries were not asked to report expenditures for contract work. These expenditures are not included in totals shown. Expenditures by "Contract-service operations" duplicate in part expenditures for "Contract work" reported by producing operations.

<sup>12</sup> Oil- and gas-field contractors were not asked to report expenditures for buildings, machinery, and equipment, and contractors performing general services for mineral industries were asked to report only combined expenditures for these items, which amounted to \$150,000. These expenditures are not included in totals shown.

<sup>13</sup> Crude petroleum, 1,228,133,816 barrels (42 gallons); natural gas, 2,929,184,829 M cubic feet, of which 2,327,412,386 M cubic feet were marketed.

<sup>14</sup> Thousands of gallons.

<sup>15</sup> Includes data for 58 strip-pit and culm-bank contractors.

<sup>1</sup> Companies with operations in more than one industry are counted only once in totals.<sup>2</sup> See note 3, table 833.<sup>3</sup> See note 4, table 833.<sup>4</sup> See note 5, table 833.<sup>5</sup> See note 6, table 833.<sup>6</sup> Represents permanent additions and major alterations (including installation costs); minor additions and replacements and the cost of land are excluded.<sup>7</sup> See note 6, table 833.<sup>8</sup> Not shown because of dissimilar products.<sup>9</sup> Contractors performing oil- and gas-field services were not asked to report expenditures for supplies and materials, fuel, purchased electric energy, or contract work, and contractors performing general services for mineral industries were not asked to report expenditures for contract work. These expenditures are not included in totals shown. Expenditures by "Contract-service operations" duplicate in part the expenditures for "Contract work" reported by producing operations.<sup>10</sup> Oil- and gas-field contractors were not asked to report expenditures for buildings, machinery, and equipment, and contractors performing general services for mineral industries were asked to report only combined expenditures for these items, which amounted to \$150,000. These expenditures are not included in totals shown.<sup>11</sup> Tons of 2,240 pounds.<sup>12</sup> Less than \$501.

\* Contractors engaged chiefly in development work for other concerns in mineral industries; Pennsylvania anthracite strip-pit and culm-bank contractors are excluded. Statistics for contractors performing oil- and gas-field services exclude data for oil- and gas-field work performed on contract by concerns that also operated oil and gas wells for their own account unless separate reports were obtained for each of these two types of activities. Statistics are also excluded for concerns rendering oil- and gas-field services or producing crude petroleum, natural gas, or natural gasoline whose reports covering these activities indicated that neither the value of products and services rendered, nor reported principal expenses, nor cost of buildings, machinery, and equipment, nor cost of drilling and equipping wells amounted to as much as \$2,500 during 1939. Statistics for contractors performing general services for mineral industries exclude data for contractors that received or were due less than \$2,500 for work done during 1939.

† Represents amounts received or due for services performed during year.

‡ Statistics cover, in general, only those operations that had reported principal expenses or cost of buildings, machinery, and equipment during year of at least \$2,500; for common sand and gravel corresponding minimum was \$15,000. Statistics include data for oil- and gas-field operations in States in which the reporting concerns had no products, provided the concerns were large enough to come within the scope of the census as defined in head-note of table B33.

## No. 833.—MINERAL INDUSTRIES—SUMMARY FOR THE UNITED STATES: 1919, 1929, AND 1939

[Statistics cover producing operations only. In general, those for 1939 cover only those operations (or concerns producing crude petroleum, natural gas, and natural gasoline, and rendering oil- and gas-field services) for which total value of all products, reported principal expenses, cost of buildings, machinery, and equipment during year, or cost of drilling and equipping wells during year amounted to \$2,500 or more. For bituminous coal and lignite an output criterion of 1,000 tons of coal was substituted for value of all products. Statistics for common sand and gravel industry exclude data for operations that produce less than 15,000 tons of sand and gravel unless reported principal expenses or cost of buildings, machinery, and equipment during year amounted to \$15,000 or more. Statistics for 1929 cover, in general, only those "enterprises" for which total value of all products or cost of development work amounted to \$2,500 or more. Bituminous coal and lignite mines that produced less than 1,000 tons of coal and common sand and gravel operations that produced less than 25,000 tons of sand and gravel, were excluded. Statistics for 1919 exclude data for "enterprises" for which value of all products was less than \$500 or cost of development work was less than \$5,000. Noncommercial production of stone and sand and gravel obtained from mines or quarries operated by governmental agencies, public utilities, or by construction companies or contractors producing wholly for their own use or on contract for governmental agencies is excluded for all years]

<sup>1</sup> Excludes statistics for common clay and shale, crude petroleum and natural gas, green sand, natural gasoline, peat, potash, and rock salt industries, for comparability with 1929.

<sup>2</sup> Excludes common clay and shale, common sand and gravel, glass sand, foundry sand, natural sodium compounds, peat, potash, and rock salt industries, and limestone mines and quarries operated in conjunction with cement and lime plants for comparability with 1919.

<sup>3</sup> Includes value of crude minerals produced, value added during year by preparation processes, receipts for services performed for other concerns, and value of electric energy generated and sold.

<sup>4</sup> Represents statistics for skilled and unskilled employees who perform manual labor, use tools, operate machines, handle materials, and care for property. Average numbers of wage earners were derived by adding numbers reported for each month and dividing sums by 12.

<sup>5</sup> Represents statistics for salaried employees at operations and at central and branch offices, including officers of corporations, managers, superintendents, and other supervisory personnel, responsible professional and technical employees, and clerical employees. Number of salaried employees represents number receiving pay on a representative or normal day or pay-roll period: for 1939, during normal pay-roll period ending nearest Oct. 14; for 1929, on Dec. 14 or on nearest representative day, for 1919, on Dec. 15 or on nearest representative day. Salaries represent total amount paid to salaried employees during calendar year.

<sup>6</sup> Represents statistics for proprietors and firm members at operations and at central and branch offices.

<sup>7</sup> Census statistics not available.

<sup>8</sup> For 1939 includes installation costs, which are excluded for 1929.

<sup>9</sup> Statistics for 1939 and 1929 refer to equipment in use or available for use at end of year.

<sup>10</sup> Includes equipment, with rating of 8,655 horsepower, operated by purchased power other than electric energy.

No. 835.—COPPER—PRODUCTION, EXPORTS, IMPORTS, AND CONSUMPTION:  
1910 TO 1946

[In short tons (2,000 pounds). Production figures for unrefined copper cover United States and Alaska. Output of copper from foreign crude materials also shown under refined copper production. Consumption as shown represents quantity withdrawn from total new supply on domestic account (apparent consumption) not actual consumption, largely because consumers' inventories are not taken into account. Over a period of years, however, apparent consumption data give a good indication of consumption trends]

## No. 838.—COPPER—EXPORTS AND IMPORTS: 1891 TO 1946

[Exports are those classed as "domestic" in foreign trade statistics but include copper smelted or refined in United States from imported ore or unrefined metal. Values include all forms of copper; quantities represent all copper except the small item, "Other manufactures." Copper content of exports of ore for years 1891-1915 and of imports for years 1894-1903 was estimated]

[Quantities in short tons (2,000 pounds); values in thousands of dollars]

<sup>1</sup> Values at New York prices through 1907; at St. Louis prices, 1908 to 1914; at average price of all grades, 1915 and later years.

<sup>2</sup> Computed at yearly average of high and low monthly prices at New York.

<sup>3</sup> Census year ended May 31.

<sup>4</sup> Excludes premiums paid to miners by the Government.

Source of tables 843 and 844: Department of the Interior, Bureau of Mines; Minerals Yearbook.

**No. 845.—GOLD AND SILVER—PRODUCTION IN CONTINENTAL UNITED STATES, ALASKA, PUERTO RICO, AND PHILIPPINE ISLANDS: 1792 TO 1946**

[Value of gold in terms of money, being at a fixed rate, is not shown in this table. Gold was valued at \$20.67+ per fine troy ounce from 1837 until 1933. In 1933, however, various higher prices prevailed subsequently to Executive order of Aug. 29. Value of gold production for that year, as computed by Bureau of Mines, was \$65,338,000, including \$12,485,000 premium calculated at average weighted price (\$25.56 per ounce). On Jan. 31, 1934, legal value of gold was fixed at \$35 per fine ounce. Value given for silver is commercial value, except for 1921 to June 1923 and for 1934 and subsequent years (see footnotes 1 and 2), for which periods it has differed materially from coinage value. Excludes production of Philippine Islands after 1945]

[Figures are totals for period or for year]

<sup>1</sup> For 1921, 1922, and first half of 1923, price taken at figure of \$1 per ounce fixed by Pittman Act.

<sup>2</sup> Value 1934-37 calculated on basis of average amount per ounce returned to depositors of newly-mined domestic silver: 1934, \$0.64+ per fine ounce; 1935, \$0.71875; 1936, \$0.7745; 1937, \$0.7735. Value thereafter calculated on basis of amount per fine ounce returned to depositors of newly-mined domestic silver produced: In 1938, \$0.6464+; 1939, \$0.6787+; July 1, 1939-46, \$0.7111+; subsequent to July 1, 1946, \$0.905.

<sup>3</sup> Not calculated.

<sup>4</sup> Less than 500 ounces.

<sup>5</sup> Excluded after 1945.

<sup>1</sup> Value prior to 1934 calculated on basis of \$20.67+ per fine ounce, in 1934 and thereafter, \$35.00 per fine ounce.<sup>2</sup> U. S. gold coin not a factor after passage of Gold Reserve Act of Jan. 30, 1934.<sup>3</sup> Excess of return from industry over new material issued to industry.

## No. 847.—SILVER—PRICES, LONDON AND NEW YORK, AND VALUE IN THE DOLLAR: 1835 TO 1946

[London price converted to basis of ounce 1,000 fine and converted to American money at par of exchange through 1930; from 1931 through 1944, at current rate of exchange. London quotations in depreciated currency after Sept. 21, 1931, also for some prior years, including 1918 to 1924. New York quotations in depreciated currency after early March 1933. Commercial ratio computed on basis of London quotations through 1914; thereafter, on basis of New York average price. Beginning 1945, London and New York prices converted to basis of ounce 0.999 fine at current rate of exchange. Beginning 1934, monetary value of gold is \$35.00 per fine ounce, as against \$20.67+ in previous years. Value of fine silver (371¼ grains) in dollar computed on basis of London quotations through 1917; thereafter, on basis of New York average price]

[All figures, except "Commercial ratio to gold," expressed in dollars]

## No. 850.—COAL—PRODUCTION, 1821 TO 1946, AND BY STATES, 1926 TO 1946

[Quantities in thousands of short tons (2,000 pounds); values in thousands of dollars. Figures relate to mines having an output of 1,000 tons or more a year for 1919, 1921, 1924 and subsequent years. Includes coal consumed at mines. Figures for anthracite relate to Pennsylvania output only; those for bituminous relate to continental United States and Alaska. Bituminous coal includes lignite and small amounts of anthracite outside Pennsylvania. Comparatively little coal is held in stock at the mines]

<sup>1</sup> Figures for bituminous coal represent average value per ton less selling expense (Bur. of Mines series) prior to 1937; thereafter, average gross realization including selling expense (Bit. Coal Div. series).

<sup>2</sup> Based on total production as shown in table 850.

<sup>3</sup> Calculated at 303.5 working days in the anthracite field and 308 working days in the bituminous field.

<sup>4</sup> Of 2,000 pounds.

<sup>5</sup> Not available.

<sup>6</sup> 1891.

<sup>7</sup> 1890.

<sup>1</sup> Federal Power Commission. Represents consumption by public-utility power plants in power generation, including a small quantity of coke amounting to approximately 100,000 tons annually.

<sup>2</sup> U. S. Bureau of Census.

<sup>3</sup> Association of American Railroads. Represents consumption by class I railways for all uses, including locomotive, powerhouse, shop, and station fuel. The I. C. C. reports that in 1945 consumption for all uses by class I line-haul railways, plus purchases for class II and class III railways, plus purchases by all switching and terminal companies combined, was 129,315,960 tons of bituminous coal and lignite. Similar data from the I. C. C. not yet available for 1946.

<sup>4</sup> Includes small amount of anthracite.

<sup>5</sup> Estimates based upon reports collected by Solid Fuels Administration from a selected list of representative manufacturing plants and retail dealers. Truck shipments from mines included "Other industrials."

<sup>6</sup> Included in "Other industrials."

<sup>7</sup> Preliminary.

**No. 856.—NATURAL GAS AND NATURAL GASOLINE—PRODUCTION, 1906 TO 1946, AND BY STATES, 1930 TO 1946**

[Quantities of gas in millions of cubic feet, of gasoline in thousands of gallons; values in thousands of dollars. Production figures for gas refer only to that marketed, in addition to which considerable quantities are used by producers, and large quantities are wasted or lost. Values given are at point of consumption. Consumption figures by States differ greatly from production figures by reason of interstate transportation]

<sup>1</sup> Includes data for mines producing nonmetallic minerals other than coal.<sup>2</sup> Preliminary.<sup>3</sup> Not available.

Source of tables 878 and 879: Department of the Interior, Bureau of Mines; annual bulletins, Metal Mine Accidents, Quarry Accidents, Accidents at Metallurgical Plants, Coke Oven Accidents, and Coal Mine Accidents.

## 28. Construction and Housing<sup>1</sup>

**Construction.**—Monthly estimates of the value of work put in place are probably the most widely used of the current Federal statistics on construction. These estimates are prepared jointly by the Department of Commerce and the Bureau of Labor Statistics. Estimates of private nonresidential construction activity are primarily the responsibility of the Department of Commerce. Publicly financed construction of all types and housing construction activity are primarily the responsibilities of the Bureau of Labor Statistics.

Estimates of privately financed nonresidential construction such as stores, warehouses, and factories are based primarily on F. W. Dodge Corporation reports of construction contracts awarded, supplemented by building permit data for States which the Dodge Corp. does not cover. Public utility construction estimates are derived from data reported by the Interstate Commerce Commission and other Federal regulatory agencies, and by private associations such as the American Gas Association and the American Transit Association.

A considerable number of Federal agencies administer construction programs or award contracts for construction; some of them engage in construction themselves. In this field, construction activity data are derived by the Bureau of Labor Statistics from the reports of the respective Federal agencies. Data on other State and local governmental construction activity are obtained from F. W. Dodge Corporation and Engineering News Record reports.

Estimates of residential construction activity, including number of housing units started, average construction costs, and number of units per structure, are based primarily upon reports of building permits granted which are received from approximately 4,000 permit-granting authorities. Field surveys on a sample basis are used to obtain data on construction activity in nonpermit areas. Sample field surveys are also conducted in permit areas to determine such factors as the proportion of permits allowed to lapse, the time lag between the grant of the permit and the date of start, the relationship between permit valuation and contract valuation, and the length of the building period.

The Bureau of the Census has taken a Census of Construction for 1929, 1935, and 1939. The last census covered all persons or establishments whose principal business in 1939 was utilizing construction materials and labor in construction work for others, or for themselves for speculative and investment purposes on projects located within the limits of continental United States. Because the Census excluded force account work, its coverage was substantially less than current estimates of value of work put in place.

**Housing.**—The first national Census of Housing was taken in 1940 by the Bureau of the Census as part of the Sixteenth Decennial Census and provided comprehensive data on housing characteristics. (See tables 902-911, 913-917, 919-921.) In contrast, collection of current statistics on housing places emphasis upon data directed toward the administrative needs of specific programs. Data on housing characteristics, roughly comparable to those collected in the 1940 Census of Housing, were collected in April 1947 by the Bureau of the Census in its current population survey. During 1946 and 1947 these national figures on housing units started and on average construction costs were supplemented by national data on units completed and by corresponding data for each of 60 local areas. The current program of the Bureau of Labor Statistics provides monthly estimates of the number of housing starts in the nation as a whole, but the series on completions and the local area data have been discontinued.

Data on home mortgages and foreclosures are provided by the Home Loan Bank Board. The Federal Housing Administration compiles data on its real estate financial operations, such as volume of mortgages insured, type of lending institution, etc.

<sup>1</sup> Based on "Statistical Services of the United States Government", a paper prepared by the Division of Statistical Standards, Bureau of the Budget, for International Statistical Conference, August 20, 1947.

# No. 880.—CONSTRUCTION IN THE UNITED STATES—ESTIMATED EXPENDITURES FOR PRIVATE AND PUBLIC CONSTRUCTION: 1930 TO 1947

[Represents value of work put-in-place during year; consequently differs from building permit and construction contract data which measure value of work started. In addition, coverage generally broader than permit and contract data. Includes value and cost of installation of equipment which is integral part of structure, but not that of machinery, shipbuilding, or land costs. Annual estimates, 1915-29, comparable with data below, available in Office of Domestic Commerce, Bureau of Foreign and Domestic Commerce]

[In millions of dollars]

<sup>1</sup> Estimates of new private nonfarm residential construction prepared by Bureau of Labor Statistics.

<sup>2</sup> Public industrial building not segregable from private construction in 1930-1932.

Source: Estimates of new construction for 1939-47 are joint estimates of Dept. of Commerce, Bureau of Foreign and Domestic Commerce, and Dept. of Labor, Bureau of Labor Statistics; other data except as indicated in note 1, are estimates of Bureau of Foreign and Domestic Commerce. Current estimates are published monthly in the Industry Report on Construction and Construction Materials and Survey of Current Business.

# TABLE 1001.—NEW PERMANENT DWELLING UNITS STARTED IN NONFARM AREAS BY TYPE 1920 TO 1947

Figures are estimates covering construction of all new permanent family dwelling units in nonfarm areas of United States, based upon building-permit reports, and from 1944 on building-permit information supplemented by data from field survey, in non-permitting areas. This area consists of all urban and rural nonfarm places. Urban designation is applied to all incorporated place with a population of 2,500 or more in 1940, and by special rule, to a small number of unincorporated cities and divisions. Rural nonfarm construction includes all construction for nonagricultural use in unincorporated areas and incorporated places of less than 2,500 population. Home-urban construction is classified by location whereas rural nonfarm construction is classified according to the number of individuals building. The series published formerly in the Statistical Abstract included temporary as well as permanent dwelling units from 1941. The official series of the Bureau of Labor Statistics now exclude temporary units; a new unit is not added to the country's lasting inventory of housing.

YEAR	Total non-farm	AREA		TYPE OF DWELLING		
		Urban	Rural non-farm	1-family	2-family	Multi-family
1920	27.00	19.00	8.00	202.00	2.00	2.00
1921	44.00	32.00	12.00	311.00	7.00	6.00
1922	71.00	57.00	14.00	457.00	14.00	12.00
1923	57.00	49.00	8.00	51.00	17.00	15.00
1924	82.00	71.00	11.00	52.00	17.00	14.00
1925	87.00	73.00	14.00	72.00	15.00	20.00
1926	94.00	68.00	26.00	49.00	11.00	24.00

<sup>1</sup> Preliminary.

<sup>2</sup> Exclusive of hangars and other buildings.

<sup>3</sup> Included in miscellaneous.

<sup>4</sup> Includes nonresidential construction at site of 3 Resettlement Administration projects for which breakdown of residential and nonresidential costs is not available.

<sup>5</sup> Excludes loans granted by Rural Electrification Administration.

<sup>6</sup> Includes work under jurisdiction of Public Roads Administration.

<sup>7</sup> Includes forestry and railroad construction and repair projects.

Source: Department of Labor, Bureau of Labor Statistics; current data published in Monthly Labor Review.

**No. 884.—CONSTRUCTION CONTRACTS AWARDED IN 37 STATES—VALUE OF CONSTRUCTION AND FLOOR SPACE OF BUILDINGS, BY CLASS OF CONSTRUCTION: 1927 TO 1946**

[For State figures, see table 885. Public works and public utilities cover some projects not measurable in terms of floor space, such as highways, pipe lines, subways, etc. Statistics for the 37 States were not compiled for years prior to 1925, but available figures covering a varying number of States for earlier years have been published in the 1932 and previous issues of the Statistical Abstract. Figures for the individual States and districts in table 885 represent the value of construction contracts awarded in the States and districts where the work was actually done.]

[Values in millions of dollars; floor space in thousands of square feet]

## No. 886.—CONSTRUCTION CONTRACTS AWARDED—INDEXES OF VALUE: 1920 TO 1947

[1922-25 average=100. Indexes are derived from monthly figures of construction contracts awarded reported by F. W. Dodge Corporation. Reports covered 37 States beginning with May 1924 and a varying number for earlier years. In order to obtain comparable figures from 1919 to date, total value of construction contracts awarded in 37 States was estimated for January 1919 through April 1924. Seasonal adjustments computed separately for "residential" and "all other" types of construction and the two series combined. Indexes based on a 3-month moving average, centered at middle month. For more detailed description of indexes, see Federal Reserve Bulletin for July 1921.]

## No. 887.—ENGINEERING CONSTRUCTION CONTRACTS AWARDED—VOLUME, BY TYPE: 1926 TO 1947

[In millions of dollars. Covers continental U. S. construction projects of following minimum costs through 1945 (except for 1932-35): Waterworks, excavation, drainage, and irrigation, \$15,000; other public works, \$25,000; industrial buildings, \$40,000; other buildings, \$150,000. For 1946, these minimums were raised to \$22,500, \$40,000, \$55,000, and \$205,000, respectively, to account for rise in construction costs. For 1947, minimums used were \$28,000, \$50,000, \$68,000, and \$250,000. For 1932-35, minimums used were: \$10,500, \$17,500, \$28,000, and \$105,000.]

**No. 889.—BUILDING CONSTRUCTION IN CITIES OF 50,000 OR MORE INHABITANTS  
VALUE OF ALL CONSTRUCTION AND NUMBER OF NEW DWELLING UNITS: 1943  
TO 1947**

[Valuation figures are derived from estimates of construction costs made by prospective builders when applying for permits to build and value of contracts awarded by Federal Government. No land costs are included. For type of building covered see table 882. Cities shown had a population of 50,000 and over in 1943.]

<sup>1</sup> Preliminary. <sup>2</sup> Classified as urban under special rule by Bureau of the Census, 1940

<sup>3</sup> Figures represent applications filed. <sup>4</sup> Not available.

<sup>5</sup> 1943-44 represent applications filed, adjusted to eliminate large postwar projects. Data for 1945 to 1947 represent work actually started, based on inspections instead of on applications filed, as in previous years.

Source: Department of Labor, Bureau of Labor Statistics: 1943 from annual reports on building construction; subsequent annual and current data for cities of 100,000 or more published in monthly releases; data for cities 50,000 to 100,000 from records not published elsewhere.

No. 890.—CONSTRUCTION AND BUILDING COST INDEXES: 1913 TO 1947

[1913=100 except Aberthaw for which base year is 1914. For Bureau of Labor Statistics index of building material prices, see pp. 296 and 297]

<sup>1</sup> American Appraisal Co. Average for 30 cities of 4 types of buildings: Wood frame, brick-wood frame, brick-steel frame, reinforced concrete. Mechanicals not included. Based on actual appraisal costs. Available for individual cities. Recently revised to include adjustments for social security taxes, unemployment insurance and corresponding "overhead."

<sup>2</sup> Associated General Contractors of America. Wages and materials for 12 cities combined in 40-60 ratio. Wages, prevailing rates for hod carriers and common labor. Materials, weighted: Sand, gravel and crushed stone, 1; cement, 1; lumber, 1; hollow tile, 1/4; structural and reinforcing steel, 1/4.

<sup>3</sup> Engineering News Record construction cost index has 4 components: (1) Structural steel shapes, base price; (2) cement at Chicago; (3) lumber, which until 1935 was 12 x 12 long leaf yellow pine wholesale at New York, and since 1935 is 2 x 4 S4S pine and fir in carload lots, ENR 20-cities average; (4) common labor, ENR 20-cities average of wage rates in force. This construction cost index is designed to predict changes in construction cost trends and to measure the movement of construction costs in general. It is not intended to apply to any specific class of construction or to a particular locality. ENR Building Cost index: In practice, the construction cost index has been used widely to apply to building costs, and when common and skilled labor rates move in similar trends it is a satisfactory measure of relative building cost movement. However, following the low wage rates of 1932, common labor climbed much faster than skilled and reached new all-time highs by July 1937. The increase was in the lower ranges between union and nonunion. When "prevailing" wages became synonymous with union wages the gap closed up, hence the ENR 20-cities wage average increased more rapidly than the union rates. To provide a more representative measure of building cost movement, the skilled labor trend has been substituted for the common labor trend in the ENR Construction Cost index, and the ENR Building Cost index computed.

<sup>4</sup> E. H. Boeckh & Assoc., Inc. Individual series for 10 types of buildings for 16 areas. Weights based on studies of actual building costs—vary with different type of structures. Material prices are those paid by contractors to material dealers. Prevailing skilled and common wage rates from contractors. Base: United States average, 1926-29=100. Series given here is brick and concrete, New York, converted to 1913=100 base.

<sup>5</sup> Aberthaw. Until Mar. 31, 1946, New England, 7-story and basement (62' 4" x 202' 4"), reinforced concrete building built in 1914, repriced quarterly as a construction bid to duplicate original building; labor costs based on current experience with similar construction. Since Mar. 31, 1946, New England, composite of 36 major cost items in 3 multi-story and 2 one-story industrial buildings, including all mechanical trades, repriced using actual and estimated labor and material costs.

<sup>6</sup> George A. Fuller Company. Composite of 36 major cost elements, in 3 commercial type buildings, including mechanicals, elevators, wiring, heating and ventilating, repriced.

<sup>7</sup> Turner Construction Co. Eastern Cities. Own building cost experience applied to these factors: Labor rates, material prices, productivity of labor, efficiency of plant and management, competitive conditions.

## No. 891.—MATERIALS CONSUMPTION FOR NEW CONSTRUCTION: 1944 AND 1945

[Data represent estimated quantities of materials required by construction activity, both public and private, in the United States. They are divided into 4 major categories: (1) Military, which covers Army and Navy establishments, camps, cantonments, hospitals, airfields and bases, storage facilities, etc. (2) Plant expansion, which includes the construction of industrial plants engaged in the production of ships, aircraft, and other war materials, (3) Housing, which represents civilian, nonmilitary housing, and (4) All other nonmilitary construction such as schools, hospitals, commercial establishments, streets, roads, sewer and water development, farm construction, and utilities. Estimates do not include materials consumed in the manufacture of machines, machine tool and processing equipment.]

## No. 892.—BUILDING COSTS, SMALL-HOUSE—INDEXES: 1936 TO 1947

[Average month of 1935-39=100. This index is a 3-month moving average of cost estimates for building a standard 6-room frame house. Data have been revised to reflect a new system of data collection utilizing Bureau of Labor Statistics facilities. See source publication for discussion of old and new concepts. Series discontinued after July 1947]

# No. 894.—CONSTRUCTION—SUMMARY, BY KIND OF CONTRACTOR, BY SIZE GROUPS: 1939

[The 1939 Census of Construction covered all persons or establishments whose principal business in 1939 was utilizing construction materials and labor in construction work for others, or for themselves for speculative and investment purposes, on projects located within the limits of continental United States. It included erection and installation departments of manufacturers and merchandisers, when it was an important but not necessarily major portion of their business enterprise. Force-account work, ship and boat building, and installation and servicing of domestic appliances were not included. "Work performed" represents contract or order value of work done by the contractor's or builder's own forces. Work sublet to others was not included as work performed in the report of the builder or general contractor, but was reported as part of the business of the special trade contractor who received the subcontract. "Construction work" includes alterations and repairs, as well as new construction and additions. Data for establishments reporting less than \$300 of work performed in 1939 are not included. The canvass is known to have been incomplete in coverage of small contractors who operated from their homes. Most of this shortage occurred in metropolitan districts. It is believed that this under-coverage affects materially only number of establishments and number of proprietors]

KIND OF CONTRACTOR	NUMBER OF ESTABLISHMENTS			VALUE OF WORK PERFORMED (1,000 DOLLARS)			MATERIALS USED AND EQUIPMENT INSTALLED (1,000 DOLLARS) <sup>1</sup>

# No. 898.—CONSTRUCTION—SUMMARY FOR ESTABLISHMENTS REPORTING BUSINESS OF \$25,000 OR MORE, BY STATES 1929 AND 1939

[1929 and 1939 comparisons must be limited to establishments reporting business of \$25,000 or more as the 1929 census covered only that size group. That size group in 1939 accounted for 77 percent of total value of work performed by all contractors and builders regardless of size. Geographic distribution is based on office address of reporting establishment, not location of construction project.]

No. 903.—OCCUPIED DWELLING UNITS OR FAMILIES—TENURE: 1890 TO 1940

[1940 figures based on occupied dwelling units; not strictly comparable with data for private families, but differences are negligible. Figures for 1900 and 1930 represent private families only; those for 1890, 1910, and 1920 include small number of quasi-family groups. For 1947 data, see table 912]

**No. 906.—DWELLING UNITS, URBAN AND RURAL—ESTIMATED TOTAL MONTHLY RENT AND ESTIMATED TOTAL VALUE: 1940**

[For urban and rural-nonfarm units, monthly rent and value include land; for farm units, farm land is excluded. Monthly rental data include contract rent of tenant-occupied nonfarm units and estimated rent of other units. Monthly rent of owner-occupied rural-farm units is an estimate based on 1 percent of reported value. Value of owner-occupied units represents the owners' estimate of the value. For tenant-occupied and vacant units value was estimated as 100 times the monthly rent. Value or rent of units for which these data were not reported was estimated by assuming that the average value or rent of such units was the same as the value or rent of reporting units in the corresponding tenure and occupancy group of the urban and rural areas of each region]

[In thousands]

**No. 910.—DWELLING UNITS, URBAN AND RURAL-NONFARM—MEDIAN CONTRACT OR ESTIMATED MONTHLY RENT AND MEDIAN VALUE, BY TENURE: 1940**

[Monthly rental data include contract rent of tenant-occupied units and estimated rent of owner-occupied and vacant units. Figures for "All dwelling units" include vacant units. Median defined: That item which is in the middle of a series arranged according to size. Thus, the median rent is the rent which divides the total number of dwelling units into two equal groups, one having rents higher than the median and one having rents lower than the median]

<sup>1</sup> For definition of median, see headnote, table 910.

<sup>2</sup> Mortgage data are limited to owner-occupied nonfarm units in structures without business and containing not more than 4 dwelling units, percent represents percent of reporting owner-occupied units which were mortgaged. For number of owner-occupied urban and rural-nonfarm units, see table 907.

## 29. Manufactures

**Census of Manufactures.**—The basic source of comprehensive data on manufacturing production has been the Census of Manufactures conducted by the Bureau of the Census. This census was taken decennially from 1849 to 1899, for each fifth year thereafter through 1919, and biennially from 1921 through 1939. During the recent war years the Census of Manufactures was abandoned as directed by Executive Order No. 9152 in the interests of more important work related to the Nation's war effort. The next Census of Manufactures, taken in 1948 to cover the year 1947, is being tabulated as this volume goes to press.

The quinquennial censuses—those of 1904, 1909, 1914, and 1919—covered all factories or plants whose products were valued at \$500 or more, but beginning with 1921, the minimum limit has been \$5,000. Conceptually a manufacturing establishment is a plant, mill, works, shop, or factory at a single physical location for which independent bookkeeping records are maintained, regardless of its managerial or financial affiliations. An establishment—which may be a single plant or a group of closely located plants operated by a single concern without separate records for each—is the basic reporting unit. In addition, the establishment is the basic unit of industrial classification, being assigned to an industry on the basis of its reported product of chief value.

“Value of products” represents the selling value at the plant or factory. Because of the use of the products of some establishments as materials for others, the total cost of materials and the total value of products for all industries in a given group, and for all groups in the aggregate, include much duplication, estimated at roughly one-third of the gross value of products. Such duplication is not, however, found to any great extent within individual industries. “Value added by manufacture,” computed by subtracting “cost of materials, supplies, fuel, etc.,” from value of product, provides a rough measure of [the contribution of manufacturing processes to product values and is practically free of duplication.

Detailed quantity and value data on the output of manufactured products are compiled from reports of the Census of Manufactures. The “total value” figures for a group of products differ from the “value of products” of the corresponding industry as given in table 930. The product figures include the minor or secondary production of the commodity in plants engaged primarily in other lines of manufacture, whereas the industry figures which relate to the total output of a group of plants primarily engaged in a particular industry, include the value of the secondary products made by the plants classified in the industry.

Because the Bureau of the Census is prohibited from disclosing the operations of any individual company, general plant and detailed commodity information for any industry can be published only where a given industry in a given State or area is represented by three or more independently owned establishments of approximately the same size. This restriction has little effect upon tables for the entire United States, but there are many instances where because of the concentration of production in a few establishments, it has been necessary to combine data for presentation, rather than showing detailed industry data for each city and State.

**Current and other statistics.**—Monthly, quarterly, and annual commodity surveys are also conducted by the Bureau of the Census. These data are published currently in the Facts for Industry series. This series also includes releases of information collected by or for the War Production Board and successor agencies during the war and reconversion periods by the Census Bureau or other Federal agencies.

Reports on current activities of industries, or current movements of individual commodities, are also compiled by trade associations and trade journals, commercial agencies, and by such governmental bureaus as Labor Statistics, Agricultural Economics, Foreign and Domestic Commerce, Fish and Wildlife Service, Tariff Commission, and Internal Revenue, in addition to the Census Bureau previously mentioned.

Abbreviated balance sheet and income account data on all United States manufacturing corporations are compiled and published annually by the Bureau of Internal Revenue from corporation income and profits tax returns and holding company returns.

Data on financial operations and intercorporate relations of manufacturing corporations are collected from time to time by the Securities and Exchange Commission, the Tariff Commission, the Federal Trade Commission, and special investigating agencies. Financial statistics for certain manufacturing industries in the form of balance sheets, profit and loss statements, analyses of sales and expenses, lists of subsidiaries, types and amounts of security issues, and selected data on the salaries paid to officers and directors, are summarized and published for the leading corporations that are registered with the Securities and Exchange Commission. The Tariff Commission publishes commodity surveys which cover economic and competitive aspects of production, distribution, and international trade in selected important industries. Each survey deals with several products which are related because of the raw materials consumed, or competitive uses. The Federal Trade Commission has made several comprehensive studies of individual industries, notable among which are the reports on the motor-vehicle industry, certain industries processing agricultural raw materials, and the agricultural implement and machinery industry. Studies of individual industries have also been made by trade associations and private research agencies.

**Material in other sections.**—In addition to the statistics presented in this section, statistics on the output and activities of manufacturers will be found in various other sections of the Statistical Abstract. For example, data on wages and hours appear in section 8, Labor Force, Employment, and Pay Rolls; statistics on manufacturing corporations compiled from corporation income tax returns appear in section 14, National Government Finances; and statistics on lumber production in section 25, Forests and Forest Products. For page references to the commodity or industry, consult the index. For references to the important sources of statistics on manufacturing and related activities, see the listings under the appropriate subjects in the "Bibliography of Sources of Statistical Data," page 988.

**Geographic coverage.**—Statistics in this section relate to continental United States except as noted.

No. 922.—MANUFACTURES—SUMMARY: 1849 TO 1939

[It is sometimes necessary, for various reasons but chiefly because of changes in census classification, to make adjustments in figures for earlier census years. Adjustments have been made in figures beginning with 1890 as a result of exclusion from Census of Manufactures since 1929 of the industries "Coffee and spice, roasting and grinding," "Flax and hemp, dressed," "Gas, illuminating and heating," "Grindstones," "Motion pictures, not including projection in theaters," "Peanuts, walnuts, and other nuts, processed or shelled," and "Railroad repair shops" (both steam and electric)]

CENSUS YEAR	Number of establishments	Wage earners (average for year)	Wages (\$1,000)	Cost of materials, containers, fuel, and purchased energy (\$1,000)	Value of products (\$1,000)	Value added by manufacture (\$1,000) <sup>1</sup>

1935 <sup>4</sup>	167, 916	7, 203, 794	7, 311, 329	<sup>5</sup> 26, 441, 145	44, 993, 699	<sup>6</sup> 18, 552, 553
1937 <sup>4</sup>	<sup>7</sup> 166, 794	8, 569, 231	10, 112, 883	<sup>5</sup> 35, 539, 333	60, 712, 872	<sup>6</sup> 25, 173, 539
1939 <sup>4</sup>	<sup>7</sup> 184, 230	7, 886, 567	9, 089, 941	<sup>5</sup> 32, 160, 107	56, 843, 025	<sup>6</sup> 24, 682, 918

<sup>1</sup> Value of products less cost of materials, containers, fuel, and purchased electric energy.  
<sup>2</sup> For all establishments having products valued at \$500 or more.  
<sup>3</sup> Reduced to gold basis.  
<sup>4</sup> For all establishments having products valued at \$5,000 or more.  
<sup>5</sup> Includes cost of contract work.  
<sup>6</sup> Calculated by subtracting sum of cost of materials, containers, fuel, purchased electric energy, and cost of contract work from value of products. Not strictly comparable with years prior to 1935.  
<sup>7</sup> An establishment operating two or more factories was counted as two or more establishments in censuses for 1937 and 1939. Total number was increased approximately 2,000 by this change.

No. 927.—MANUFACTURES—PRIME MOVERS, MOTORS, AND GENERATORS, BY NUMBER AND RATED CAPACITY: 1899 TO 1939

[See headnote, table 922]

KIND	1899	1909	1919	1929	1939
Number of establishments reporting power equipment.....	<sup>1</sup> 131, 309	<sup>1</sup> 181, 994	<sup>1</sup> 219, 398	190, 091	<sup>2</sup> 179, 674
Prime movers, horsepower.....	<sup>3</sup> 9, 633, 215	<sup>4</sup> 16, 393, 467	19, 432, 157	19, 328, 309	21, 239, 195
Electric motors driven by purchased energy, horsepower.....	178, 176	1, 669, 226	8, 965, 406	21, 793, 762	29, 213, 085
Prime movers:					
Steam engines:					
Number.....	<sup>5</sup> 127, 145	<sup>5</sup> 148, 001	110, 609	62, 395	42, 538
Horsepower.....	<sup>6</sup> 7, 999, 241	<sup>6</sup> 13, 806, 053	13, 346, 169	9, 157, 755	6, 533, 429
Steam turbines:					
Number.....	( <sup>9</sup> )	( <sup>9</sup> )	5, 655	8, 883	12, 631
Horsepower.....	( <sup>9</sup> )	( <sup>9</sup> )	3, 098, 698	7, 409, 748	11, 295, 872
Diesel and semi-Diesel engines:					
Number.....	( <sup>9</sup> )	( <sup>9</sup> )	( <sup>9</sup> )	( <sup>9</sup> )	5, 311
Horsepower.....	( <sup>9</sup> )	( <sup>9</sup> )	( <sup>9</sup> )	( <sup>9</sup> )	630, 181
Other internal-combustion engines:					
Number.....	<sup>6</sup> 14, 231	<sup>6</sup> 33, 866	<sup>6</sup> 30, 080	<sup>6</sup> 10, 991	10, 278
Horsepower.....	<sup>6</sup> 132, 961	<sup>6</sup> 739, 736	<sup>6</sup> 1, 223, 296	<sup>6</sup> 1, 203, 303	1, 176, 044
Hydroturbines and water wheels:					
Number.....	<sup>7</sup> 23, 078	<sup>7</sup> 21, 226	<sup>7</sup> 13, 952	6, 511	3, 854
Horsepower.....	<sup>7</sup> 1, 453, 821	<sup>7</sup> 1, 819, 465	<sup>7</sup> 1, 763, 994	1, 557, 503	1, 603, 669
Electric generators, kilowatt rating.....	( <sup>9</sup> )	( <sup>9</sup> )	( <sup>9</sup> )	7, 591, 999	9, 658, 828
Electric motors, total horsepower.....	475, 342	4, 582, 689	15, 612, 644	33, 844, 131	45, 291, 319
Driven by purchased energy:					
Number.....	( <sup>9</sup> )	193, 898	954, 916	2, 655, 142	4, 138, 287
Horsepower.....	178, 176	1, 669, 226	8, 965, 406	21, 793, 762	29, 213, 085
Driven by energy generated in plant:					
Number.....	16, 317	180, 791	465, 519	829, 959	1, 224, 478
Horsepower.....	297, 166	2, 913, 463	6, 647, 238	12, 050, 369	16, 078, 234

<sup>1</sup> Because of change from \$500 to \$5,000 in minimum-value-of-products limit, "Number of establishments reporting power equipment" figures for 1919 and earlier years are not comparable with those for 1929 and 1939. This change did not, however, materially impair comparableness of figures for other items in this table.

<sup>2</sup> Returns for "Logging camps and logging contractors (not operating mills)," numbering 967, were excluded from power tabulations.

<sup>3</sup> Includes 47,192 horsepower reported as other owned power, not distributed by type of prime mover.

<sup>4</sup> Includes 28,213 horsepower reported as other owned power, not distributed by type of prime mover.

<sup>5</sup> Figures for "Steam engines" include data for "Steam turbines," not reported separately.

<sup>6</sup> Figures for "Other internal-combustion engines" include data for "Diesel and semi-Diesel engines," not reported separately.

<sup>7</sup> Includes data for water motors.

<sup>8</sup> Not available.

**No. 980.—MANUFACTURES—SUMMARY FOR INDUSTRY GROUPS, 1929 TO 1939, AND FOR SUBGROUPS AND INDUSTRIES, 1939**

[Figures do not represent exactly numbers of wage earners, values of products, etc., assignable to classes of commodities from which industries derive their names, as it is necessary for census purposes to classify each establishment as a whole in some one industry, according to its product of chief value, although in many cases a single establishment manufactures two or more classes of commodities. See also general note, p. 822]

GROUP OR INDUSTRY	Cen- sus year	Num- ber of estab- lish- ments	Wage earners (average for the year)	Wages (\$1,000)	Cost of materials, etc., fuel, purchased energy, and contract work (\$1,000)	Value of products (\$1,000)	Value added by manufac- ture (\$1,000) <sup>1</sup>

<sup>1</sup> Includes data for Hawaii for all years and data for Puerto Rico beginning with Aug. 1, 1929.

<sup>2</sup> Separate accounts for alcohol produced at industrial alcohol plants required commencing May 1, 1920.

<sup>3</sup> Through 1930, includes rum and spirits produced at distilleries for denaturation. 1935 through 1941, represents withdrawals of alcohol only for denaturation. 1942 through 1946, represents all products used for denaturation which were regarded, upon receipt at denaturing plants, as alcohol, whether originally produced as alcohol by industrial alcohol plants or as spirits or unfinished spirits by registered distilleries.

<sup>4</sup> Prior to 1943 includes denatured rum.

<sup>5</sup> Represents gross production. Net production (gross production minus products used in redistillation) for such years follows: 1942, 419,566,596; 1943, 364,696,976; 1944, 590,925,045; 1945, 660,089,874.

<sup>1</sup> Barrels of not more than 31 wine gallons. <sup>2</sup> Excludes ethyl alcohol.

<sup>3</sup> A tax gallon for spirits of 100 proof or over is equivalent to the proof gallon. For spirits of less than 100 proof the tax gallon is equivalent to the wine gallon.

<sup>4</sup> Excludes high-proof spirits and unfinished spirits produced at registered distilleries for industrial purposes.

<sup>5</sup> Includes ethyl alcohol.

<sup>6</sup> Excludes vermouth.

<sup>7</sup> Production represents total amount removed from fermenters, including distilling material (substandard wines produced with excessive water or residue materials). In 1947, 343,707,768 gallons of distilling materials were produced.

<sup>8</sup> Standard United States gallon.

<sup>9</sup> Excludes distilling materials.

<sup>10</sup> Includes champagne, other sparkling wines, and artificially carbonated wines.

<sup>11</sup> Tax is payable on each 1/4 pint or fraction thereof in each bottle or container.

<sup>1</sup> Includes scrap chewing tobacco.  
<sup>2</sup> Number of factories on Jan. 1, 1947: Tobacco and snuff (excluding 206 "quasi" manufacturers), 381; cigars, 2,441; cigarettes, 60.

Source: Treasury Department, Bureau of Internal Revenue; Annual Report of the Commissioner.

No. 988.—TOBACCO, LEAF—AMOUNTS CONSUMED IN THE MANUFACTURE OF CIGARS, CIGARETTES, CHEWING AND SMOKING TOBACCO, AND SNUFF

[All figures in thousands of pounds. Figures represent the equivalent in unstemmed leaf tobacco of stemmed leaf or scraps, cuttings, and clippings. In the following table the tobacco used in the manufacture of cigars and cigarettes was converted on the basis of 3 pounds of stemmed leaf or scraps, etc., to 4 pounds of unstemmed beginning 1915 (conversion prior to 1915 was at the ratio of 3 to 5) and of tobacco and snuff beginning 1903. For 1896 to 1902, tobacco used in manufactured tobacco and snuff was shown only under two heads, namely, "leaf" and "scraps." It is probable that stemmed leaf was included with unstemmed tobacco under the head of "leaf" without the one kind being converted to the equivalent in the other. The conversion ratio of 3 to 4 was applied only to "scraps" for these years. Data exclude tobacco used in bonded manufacturing warehouses]

No. 989.—COTTON-SYSTEM SPINDLES, COTTON CONSUMPTION, AND STOCKS

[Statistics for 1915 to 1947 relate to 12 months ending July 31 and those for prior years to 12 months ending Aug. 31. For 1946 and 1947 spindles in place include all cotton-system spindles in place regardless of fiber spun. Prior to 1946, "in place" figure represents all spindles in place used exclusively for spinning cotton. Consumption and stocks are expressed in running bales, counting round as half bales, except that all figures, 1840 to 1870, inclusive, and foreign cotton for all years are in equivalent 500-pound bales]

<sup>1</sup> For 1945 and earlier years data represent sum of greatest number of cotton spindles reported by each mill as active at any time during year, regardless of length of time operated. Beginning with 1946, active figure includes all cotton-system spindles active last day of year, regardless of type of fiber spun. On July 31, 1947, there were 21,383,000 spindles active on cotton, 807,000 on synthetics, 329,000 on other fibers and blends, and 1,305,000 idle.

<sup>2</sup> Includes linters for 1840 to 1908. Figures for all years include foreign and domestic cotton.  
<sup>3</sup> Not available. <sup>4</sup> Cotton mills only.  
<sup>5</sup> Includes stocks held in public storage and at compresses beginning 1938.  
<sup>6</sup> Includes linters for 1906 to 1908. <sup>7</sup> Average, 1909 and 1910.  
<sup>8</sup> "Upland" includes "American-Egyptian" beginning 1912 (first year produced). <sup>9</sup> Less than 500 bales.

## No. 942.—WOOL MANUFACTURING EQUIPMENT, BY TYPE: 1899 TO 1943

[Represents equipment in possession of wool manufacturing establishments, regardless of condition. 1943 data based on reports of machinery "in place," and include estimates of number in possession but not in place. Data for 1899, 1914, and 1929 reported in Census of Manufactures, and exclude mills whose product was valued at less than \$500 in 1899 and 1914, and less than \$5,000 in 1929; 1943 inventory included all mills, regardless of size]

TYPE	1899	1914	1929	1943
Rag pickers <sup>1</sup>	(?)	1,769	1,496	1,346
Garnetts <sup>1</sup>	(?)	413	437	577
Cards (combs), except shoddy cards	(?)	(?)	8,831	7,172
Woolen	7,756	5,819	5,810	5,247
Worsted <sup>1</sup>	(?)	(?)	2,221	1,926
Combs	1,451	2,425	2,661	2,613
Spinning spindles, total	3,220,792	4,307,365	4,880,606	3,642,902
Woolen <sup>1</sup>	2,225,893	2,079,626	2,303,207	1,661,818
Worsted	994,899	2,227,739	2,547,401	1,981,084
Twisting spindles, total <sup>1</sup>	442,672	876,783	917,146	706,220
Woolen	96,252	91,792	95,778	144,030
Worsted	344,420	784,991	821,368	654,190
Looms, except carpet and rug <sup>1</sup>	53,294	76,789	69,554	43,210
Carpet and rug looms	9,796	9,821	10,267	6,557

<sup>1</sup> Data for 1899, 1914, and 1929 include estimates to provide for these machines in knitting mills. 1929 data also include estimates on number of woolen spinning spindles and worsted cards in knitting mills.

<sup>2</sup> Data not available.

<sup>3</sup> 1943 and other years not strictly comparable. Census of Manufactures for 1899, 1914, and 1929 called for a report on looms from those mills whose principal products were wool and hair goods while 1943 inquiry covered all mills consuming weaving yarns spun on woolen or worsted spinning spindles. Includes pile fabric looms conforming with these definitions.

Source: Department of Commerce, Bureau of the Census; 1943 data published in Facts for Industry Series M15H.

<sup>1</sup> Cotton fabric data for 1939 include cotton, linen and cotton-warp mixtures. Rayon fabric data include rayon and silk, including mixtures.

<sup>2</sup> Complete data for finishing rayon fabrics in 1941 are not available.

<sup>3</sup> Rayon fabrics are defined as fabrics containing 51 percent or more rayon by weight. Rayon means synthetic yarns made by viscose, cuprammonium and cellulose acetate processes. An unknown quantity of fabrics made from nylon and other synthetic fibers are also included in the rayon yardage.

<sup>4</sup> White finished rayon goods are included with rayon dyed goods.

<sup>5</sup> Includes roller, screen, flock and block printed fabrics.

# No. 947.—RAYON BROAD WOVEN FABRICS—PRODUCTION, BY TYPE: JULY 1943 TO DECEMBER 1947

[Data cover production of rayon broad woven fabrics containing by weight 51 percent or more rayon. Fabrics reported are either 100 percent rayon or rayon mixtures containing 51 percent or more rayon with addition of cotton or other fibers. However, if wool fibers are added to extent of 25 percent or more, they are classed as woolen mixtures and are not included with fabrics listed. After Census of Manufactures for 1939, detailed data for this industry were not collected until 1943. Data for 1943-46 were collected to meet requirements of war agencies and are not comparable with Census of Manufactures data. 1947 data are preliminary]

[In thousands of linear yards]

<sup>1</sup> Includes estimated production for a few mills not reporting; estimates distributed by fabric classification.

<sup>2</sup> Included in "All other flat fabrics."

<sup>3</sup> Included with "All other 100 percent spun rayon fabrics" to avoid disclosing data for individual establishments.

<sup>4</sup> Included in "All other filament and spun rayon."

<sup>5</sup> Fabrics containing 51 percent or more rayon by weight, without separation as to type of yarn used; includes filament rayon, spun rayon and mixtures of rayon and other fiber.

<sup>6</sup> Includes fabrics made of casein, other synthetic fibers and mixtures of rayon and other fibers containing less than 51 percent of rayon.

<sup>7</sup> Includes small amount of silk mixtures.

**No. 948.—WOOLEN AND WORSTED MANUFACTURES—PRODUCTION, BY KIND,  
1939 TO 1947**

[Woolen and worsted woven goods defined as fabrics containing by weight 25 percent or more wool fiber. Wool fiber means fibers as defined by Wool Products Labeling Act of 1939. Data beginning with 1943 not strictly comparable with those published in Census of Manufactures for 1939. Detailed information on military fabrics required by war agencies, and in most cases, collected by type of fabric rather than by end use. Consultations with military agencies provided basis for estimating end use of each type of fabric. Estimates occurred primarily in men's wear fabrics, and involved less than 15 percent of total apparel fabrics produced. Production figures of women's and children's wear fabrics collected by weight of fabric instead of end use. In Census of Manufactures for 1939 data collected from this industry on a square-yard basis; present series requires reporting of linear yards, with narrow fabrics converted to a 54-inch width. 1939 data converted to a 54-inch linear yard measure by dividing quantity of square yards by 1½, excepting blankets which were converted to a 72-inch linear yard measure by dividing quantities of square yards by 2]

<sup>1</sup> The inclusion of "Books and pamphlets printed for publication by others," "Maps, atlases and globe covers made for others," "Greeting cards printed for others," "Newspapers and periodicals printed for publication by others," etc. results in duplication in the aggregate value and receipts, as follows: 1937, \$158,466,000; 1939, \$201,627,000. (No separate data available for greeting cards for 1937.) These amounts represent receipts by commercial printers for work done by them for other printers or for publishers, and consequently enter twice into the aggregate value and receipts.

<sup>2</sup> Includes "Pamphlets printed for publication by others."

<sup>3</sup> No data.

<sup>4</sup> Included with "Other commercial printing."

<sup>5</sup> Included with "Greeting cards."

<sup>6</sup> In addition, labels, tags, and seals were produced by methods other than letterpress, as follows: 1937, \$25,083,000; 1939, \$29,944,000. 1929 figures are not available.

Contact process (gross) (100% H <sub>2</sub> SO <sub>4</sub> ) <sup>12</sup>	do	2,674,040	5,294,555	6,355,939	6,220,536	7,270,513
Contact process (new) (100% H <sub>2</sub> SO <sub>4</sub> ) <sup>12</sup>	do		4,703,193	5,517,873	5,676,232	6,654,170
Fortified spent acid (100% H <sub>2</sub> SO <sub>4</sub> )	do		591,362	835,066	544,404	616,343
Zinc yellow (zinc chromate) (C. P.)	do		12,068	12,326		3,376

<sup>1</sup> Includes data for small amount of aqua ammonia reported by one company.

<sup>2</sup> Preliminary.

<sup>3</sup> No comparable data.

<sup>4</sup> Excludes by-product coke-oven production.

<sup>5</sup> Not shown separately to avoid disclosure of individual operations.

<sup>6</sup> Proportion of estimate, 5 percent.

<sup>7</sup> Includes data for deodorizing, decolorizing, and water purification grades. Data for gas-mask solvent recovery grades excluded.

<sup>8</sup> Proportion of estimate, 3 percent or less.

<sup>9</sup> Includes data for molybdate chrome orange.

<sup>10</sup> About 1 percent of production represents data for pulp colors, and flushed and reduced chrome yellow.

<sup>11</sup> Includes quantities diverted to manufacture of caustic soda and sodium bicarbonate and quantities processed to finished light and finished dense soda ash.

<sup>12</sup> Excludes quantities converted to finished dense soda ash.

<sup>13</sup> Collected in cooperation with Bureau of Mines.

<sup>14</sup> Liquid production figures represent total production for each process, including quantities later evaporated to solid caustic and reported as such.

<sup>15</sup> Includes sulfuric acid of oleum grades.

Source: Department of Commerce, Bureau of the Census; 1939 from Biennial Census of Manufactures; 1943-47 compiled from manufacturers' reports and published in Facts for Industry Series M19A. Monthly data published currently.

## No. 965.—REFRACTORIES—PRODUCTION, SHIPMENTS, AND STOCKS, BY KIND: 1946

[Excludes dead-burned magnesia or magnesite to avoid duplication; a large part of such materials shipped during year to refractory products manufacturing plants and later incorporated in refractory products covered (such as magnesite brick and shapes). Total quantity and value of dead-burned magnesia or magnesite reported to Bureau of Census as shipped during 1946 amounted to 252,000 short tons valued at \$7,528,000. Also excludes crude and prepared clays sold for refractory purposes. Preliminary figures of U. S. Bureau of Mines show that 5,268,000 short tons of clay were sold or used by producers in 1946 for refractories. Largest part of this total represents fireclay later incorporated in clay refractories covered in this report.]

PRODUCT	Number of plants	Unit of Measure (quantity)	Production (quantity)	SHIPMENTS		Stocks at end of 1946 (quantity)
				Quantity	Value (\$1,000)

**No. 974.—IRON AND STEEL CASTINGS—SHIPMENTS: 1943 TO 1947**

[In short tons. For malleable iron castings, data represent complete coverage. Data for gray iron castings represent approximately 93 percent (for pressure pipe and soil pipe, practically complete) coverage for 1943, and complete coverage for 1944-46. For steel castings, data represent about 94 percent coverage for 1943 and 1944, and complete coverage for 1945 and 1946. For 1947, data on gray iron castings and steel castings represent preliminary estimates of complete coverage, based on a sample of the foundries]

<sup>1</sup> Includes skelp beginning 1922.

<sup>2</sup> Merchant bars include concrete reinforcement bars and, beginning 1934, certain miscellaneous bars previously included in "All other finished rolled production."

<sup>3</sup> Average for years 1897-90.

<sup>4</sup> Average for period July 1, 1897, to Dec. 31, 1900.

<sup>5</sup> Average for years 1902-05.

<sup>6</sup> Average for period July 1, 1903, to Dec. 31, 1905.

<sup>7</sup> Average for years 1897-95.

<sup>8</sup> Small structural forms not included in 1911.

## No. 978.—IRON AND STEEL—AGGREGATE EXPORTS: 1890 TO 1946

[Covers products listed in table 979; excludes data for highly elaborated products of iron and steel. Value figures through 1921 exclude, and those beginning 1922 include data for small items for which quantity figures are not available. Ferromanganese data included for all years. Data for steam and hot-water heating boilers and radiators, formerly classified as heavy iron and steel products, excluded beginning with 1922]

[Quantities in thousands of long tons (2,240 pounds); values in thousands of dollars]

No. 983.—NONFERROUS METALS AND ALLOYS, AND FINISHED PRODUCTS THEREOF—  
PRODUCTION, BY KIND: 1935, 1937, AND 1939

[Covers products made for sale and interplant transfer, excluding those made for consumption in same works. Data represent production of commodities specified, whether made as primary or as secondary products by industries reporting them. Census designations of industries in which these commodities are made are as follows: "Alloying, and rolling and drawing of nonferrous metals, except aluminum"; "Secondary smelting and refining of nonferrous metals, not elsewhere classified"; "Nonferrous metal foundries (except aluminum)"; and "Nonferrous metal products not elsewhere classified." No data are included for production of copper, lead, zinc, and other nonferrous metals from the ore nor of secondary metals by establishments engaged in primary smelting and refining of nonferrous metals]

Source: Department of Commerce, Bureau of Census, Facts for Industry Series. Data for power cranes and shovels from Power Crane and Shovel Assn. Data on electric stoves and electric water heaters for 1946 from National Electric Manufacturers' Assn. and Bureau of Census; for 1947 from the former, and therefore not on comparable basis.

## NO. 985.—MACHINERY—VALUE OF THE PRINCIPAL CLASSES MANUFACTURED

(In thousands of dollars. The various classes of machinery listed are products of a number of industries, such as "Industrial machinery, not elsewhere classified," "Motor vehicles, motor-vehicle bodies, parts and accessories," "Agricultural machinery (except tractors)," etc. This table is not an industry presentation, but a special presentation giving value of products for groups designated. The values are in part duplicated in other tables in this Abstract such as tables 986 and 990)

CLASS	1929	1933	1935	1937	1939
Agricultural machinery and parts (harvesting, haying, planting, fertilizing, and machinery for preparing crops for market)	167,673	17,109	68,916	114,340	96,267
Aircraft (begun and completed within year)	52,157	15,860	17,454	23,654	75,573
Bakers' machinery and equipment	21,730	7,332	11,869	18,130	17,063
Blowers and fans	25,243	6,955	15,830	25,282	24,561
Bottlers' machinery, except for dairies	11,082	9,157	8,264	21,135	11,969
Canning machinery	8,535	3,139	8,271	11,840	4,108
Cash registers, adding, calculating, and card-tabulating machines, and typewriters	151,583	46,577	83,217	118,552	95,712
Cement and concrete machinery (not including cement-making, etc.)	4,132	224	1,809	4,053	1,730
Cement-making machinery	4,387	545	1,046	2,005	3,035
Clay-working machinery (brick, pottery, etc.)	4,402	591	1,071	2,737	2,069
Coin-operated commodity or vending machines	8,821	5,472	5,989	8,978	6,154
Commercial laundry, dry-cleaning, and pressing machinery	86,110	7,993	14,241	21,969	20,737
Confectionery and ice-cream machinery	3,674	2,687	5,052	7,217	6,945
Construction and similar machinery	160,683	25,858	61,706	123,889	115,294
Cotton-ginning machinery	11,760	2,165	4,892	11,300	8,115
Dairy machinery	16,593	8,327	14,864	18,402	15,467
Electrical machinery (generators, motors, and fans, including parts)	265,974	73,405	151,501	206,690	219,910
Elevators, escalators, and conveyors:					
Automobile lifts	(*)	1,889	4,013	3,786	4,254
Conveying and elevating machinery	48,537	11,413	22,045	33,911	29,773
Elevators, escalators, and dumb-waiters	44,044	8,322	9,110	21,235	16,969
Engines (steam or internal-combustion), turbines, and water wheels <sup>1</sup>	129,175	25,874	61,555	113,851	113,573
Flour-mill and grain-mill machinery	8,286	2,354	5,167	6,916	6,087
Foundry machinery	10,639	1,957	5,585	9,156	6,804
Glass-making machinery	3,688	1,895	3,543	4,729	4,439
Lawn mowers	10,953	3,467	4,087	8,427	8,691
Leather-working machinery, other than shoe	1,249	747	1,005	1,220	1,265
Locomotives	62,909	2,748	21,735	65,163	43,411

Rubber working machinery	13,852	3,347	4,893	12,271	13,685
Scales and balances	25,385	6,806	12,191	17,169	13,544
Sewing machines	37,378	10,274	18,250	24,503	20,304
Shoe machinery	12,317	8,130	10,245	10,903	10,603
Stokers, mechanical	14,954	5,629	11,537	22,176	20,275
Sugar-mill machinery	3,046	794	1,260	4,344	2,935
Textile machinery and parts	115,526	57,892	64,609	100,696	95,691
Tobacco-manufacturers' machinery	5,018	1,106	1,698	3,679	3,377
Vacuum cleaners (electric)	35,108	14,411	24,191	36,029	44,160
Washing machines, clothes wringers, driers, and ironing machines for domestic use	79,011	42,422	59,513	73,291	66,232
Well-drilling machinery (excluding oil-well)	(*)	(*)	(*)	3,334	1,519
Windmills	4,063	1,400	1,833	2,613	1,289
Woodworking machinery	25,151	6,100	12,542	23,118	23,413

<sup>1</sup> Not strictly comparable with figures for earlier years.

<sup>2</sup> Includes postal meters.

<sup>3</sup> Excludes dry-cleaning machinery.

<sup>4</sup> Not including mining dredges.

<sup>5</sup> No comparable data.

<sup>6</sup> Not including motor-vehicle or aircraft engines.

<sup>7</sup> Includes dredging.

<sup>8</sup> Includes mine conveying and elevating machinery.

<sup>9</sup> Not strictly comparable with figures for 1929.

<sup>10</sup> Includes parts and attachments.

**o. 991.—AIR CONDITIONING AND COMMERCIAL REFRIGERATION EQUIPMENT—  
SHIPMENTS BY MANUFACTURERS: 1940 TO 1947**

Value figures in thousands of dollars. Statistics cover types normally sold as standard items and more important types of components and accessories. Data include a very limited amount of certain types specifically designed for special uses. Excluded are less important components and accessories such as switches, dehydrators, accumulators, valves, and surge drums and tanks. Companies included represent substantially all producers of equipment shown]

## No. 992.—MOTION-PICTURE PRODUCTION—SUMMARY: 1921 TO 1939

[All money figures are in thousands of dollars. Represents activities of motion-picture studios and laboratories. Excludes distribution of films and their projection in theaters. No data included for establishments which reported less than \$5,000 as cost of work done. The motion-picture industry has been canvassed, since 1921, in connection with the Biennial Census of Manufactures. It is not, however, a manufacturing industry, but was treated as such prior to 1931]

YEAR AND STATE	Number of establishments	PERSONS ENGAGED		SALARIES AND WAGES		Cost of contract work	Cost of studio supplies, fuel, etc. <sup>1</sup>	Cost of production
		Salaried officers and employees	Wage earners (average for year)	Salaries	Wages

## KIND AND COST OF WORK DONE

ITEM	1933	1935	1937	1939	ITEM	1933	1935	1937	1939
Total cost of work done	119,343	161,865	197,741	215,700	Unfinished productions, cost	14,581	15,684	33,075	28,304
Negative films, cost	62,290	116,673	131,755	148,632	Laboratory work:				
Theatrical:					Positive films, cost	7,625	6,046	3,218	6,416
Number	1,059	1,094	3,942	( <sup>4</sup> )	Receipts for work done for others	11,636	15,089	15,318	18,594
Cost	77,538	110,975	126,039	142,602	Value of other work done	1,520	1,818	3,468	2,337
Advertising, cost	4,576	4,940	4,540	1,703	Receipts for use of studio facilities	1,502	4,554	707	1,420
Industrial, cost		( <sup>5</sup> )		2,175					
Educational, cost	168	324	1,176	726					
Other films, cost		2,434		1,426					

<sup>1</sup> Includes cost of studio supplies, containers for films, fuel, and purchased electric energy.

<sup>2</sup> Data cover "productive employees" only. These include all wage earners and a part, but not all, of the salaried employees. Figures are not, therefore, comparable with either the wage-earner figures or with the total number of persons engaged. Data for other years cover all classes of employees.

<sup>3</sup> Does not include data for salaried officers of corporations.

<sup>4</sup> Data incomplete.

<sup>5</sup> "News reels" included with "advertising."

<sup>6</sup> Figure for "industrial" included in that for "other films."

<sup>7</sup> Combined to avoid disclosing approximations of data for individual establishments.

Source: Department of Commerce, Bureau of the Census; Biennial Census report, Motion Pictures.

## No. 993.—ALASKA—MANUFACTURES, BY INDUSTRIES: 1899 TO 1939

[Figures for 1939 do not include data for plants reporting products valued at less than \$2,000; those for earlier years cover all plants having products valued at \$500 or more. This increase in minimum value-of-products limit resulted in some reduction in "Number of establishments" reported as compared with what it would have been had minimum of \$500 been retained, but did not seriously impair comparableness of figures for 1939 with those for earlier years. Comparable figures for earlier years are given for all industries for which such figures are available]

INDUSTRY	Census year	Number of establishments	Wage earners (average for the year)	Wages	Cost of materials, etc., fuel, electric energy	Value of products	Value added by manufacture <sup>1</sup>
				Dollars	Dollars	Dollars	Dollars

Cigars and cigarettes.....	1939	42	415	119,706	435,681	713,484	277,803
Tobacco, chewing and smoking...	1939	5	30	3,909	15,873	27,210	11,337
Other industries.....	1939	<sup>16</sup> 26	847	420,231	2,575,607	3,868,024	1,292,417
	1919	87	1,539	610,089	12,182,318	13,671,261	1,488,943
	1909	123	1,088	254,934	5,168,382	5,880,631	712,249

<sup>1</sup> Value of products less cost of materials, supplies, containers, fuel, purchased electric energy, and contract work.

<sup>2</sup> Figures include data for coffee cleaning and polishing, which is now treated as an agricultural activity and therefore was not covered by the 1939 Census of Manufactures.

<sup>3</sup> Except "Liquors, malt," and "Foods, miscellaneous." See footnote 16.

<sup>4</sup> The figures for this industry do not include data for sugar-cane plantations.

<sup>5</sup> Household furniture, 40 establishments; mattresses, 2; office furniture, 1; show cases, 2.

<sup>6</sup> Footwear, except rubber, 9 establishments; leather, tan, 1; saddlery, 1; other goods, 1.

<sup>7</sup> Aluminum products, 1 establishment; ornamental ironwork, 3; sheet-metal work, 3; tin cans, 3; watch parts, 1.

<sup>8</sup> Reported as "Foundry and machine-shop products."

<sup>9</sup> Estimated in part by use of ratios derived from reports made for corresponding classes of establishments operated in the United States.

<sup>10</sup> As part of the establishments engaged in contract work reported receipts for work done on materials owned by others, and part reported actual values of goods made, all returns have been converted to estimated value of products.

<sup>11</sup> This figure is inflated to the extent to which it includes amounts paid for outside work.

<sup>12</sup> Products of planing mills not reported in conjunction with sawmills.

<sup>13</sup> Books, 1 establishment; job printing, 40; photoengraving, 1.

<sup>14</sup> Brick and hollow structural tile, 2 establishments; sewer pipe, 1; other concrete and stone products, 3.

<sup>15</sup> Awnings, 1 establishment; hats, felt and linen, 2; hats, straw, 4; hosiery, full-fashioned, 1; rugs, string, 1; rugs, wool, 1.

<sup>16</sup> Bus bodies, 1 establishment; buttons, pearl, 2; compressed and liquefied gases, 2; cottonseed oil and meal, 1; diamond cutting, 1; foods, miscellaneous, 5; liquors, malt, 2; matches, 1; novelties, mahogany, 1; oxcarts and truck bodies, 1; paperboard containers, 1; salt, 1; signs, neon, 1; soap, 2; tires, retreading, 1; trunks, 3.

<sup>1</sup> Figures include patents for inventions, designs, and reissues of patents. Includes applications without fees.

<sup>2</sup> Data are for period from July 28, 1836, to Dec. 31, 1850, except as otherwise specified.

<sup>3</sup> Data are for 11 years beginning 1840; records prior to this date are not available.

<sup>4</sup> Data are for 8 years beginning 1843.

<sup>5</sup> Data are for 13 years beginning 1838.

<sup>6</sup> Data are for the year 1870.

<sup>7</sup> Data are for 7 years beginning 1874.

<sup>8</sup> Registration of labels suspended from May 27, 1891, to June 9, 1896.

<sup>9</sup> Data are for 8 years; first print registered Mar. 7, 1893.

<sup>10</sup> Data are for the year 1925.

<sup>11</sup> Figures for 1940 are for the six-months period ended June 30, 1940. On July 1, 1940, jurisdiction of prints and labels was transferred to the Copyright Office, Library of Congress, and data concerning them are compiled by that organization. (See table 990.)

<sup>12</sup> Excludes 150 trade-mark republishings (under Trade-Mark Act of 1946) of trade-marks registered under prior acts.

## 30. Foreign Commerce of the United States

All foreign trade statistics in this section were compiled by the Department of Commerce, Bureau of the Census beginning May 1941. Prior to that time the statistics were compiled by the Bureau of Foreign and Domestic Commerce. Annual statistics on foreign trade appear in the report, Foreign Commerce and Navigation of the United States, and monthly data appear in the Monthly Summary of Foreign Commerce of the United States. Except as noted (as, for example, in table 1028) the values stated are in United States dollars without reference to changes in the gold content of the dollar. (The statutory price of gold—\$20.67 per ounce—in effect prior to Jan. 31, 1934, was changed on that date by Executive Order to \$35 per ounce. Between Mar. 10, 1933, and Jan. 31, 1934, the foreign exchange value of the dollar was permitted to depreciate as a result of the restriction placed on gold shipments to foreign countries.) The geographic area covered by these statistics, except as noted, is the United States customs area, which includes Alaska, Hawaii, and Puerto Rico, and from Jan. 1, 1935, through Dec. 31, 1939, the Virgin Islands (see headnote, table 1008). Export data exclude Army civilian supply shipments. Other explanations of the trade tables are given in the introduction to the annual report, Foreign Commerce and Navigation of the United States.

### No. 1000.—FOREIGN TRADE OF THE UNITED STATES—SUMMARY: 1931 TO 1947

[In thousands of dollars. For calendar years]

<sup>1</sup> Unilateral transfers indicate amount of contributions in kind or in cash thru Lend-lease, U. N. R. R. A., personal and institutional remittances, and similar channels. Thus, payments or receipts under unilateral transfers in most cases offset exports or imports, respectively, of goods and services for which present or future compensation is not required.

No. 1002.—EXPORTABLE GOODS, PRODUCTION AND PROPORTION EXPORTED: 1919  
TO 1947

[Agricultural production is gross income, excluding feed, seed, and waste. Manufactures represent value added by manufacture—census data through 1939 and approximations thereafter. Value of mine products in 1909, 1919, and 1939 are census figures, in 1929 census data plus petroleum products, and in other years, estimates based on data of Bureau of Mines. Freight receipts represent receipts of steam railroads through 1927; of steam railroads, motor carriers of property (estimate), and pipelines thereafter. As figures are not adjusted for price changes, increase or decrease in absolute values from period to period should be disregarded]

[Amounts in millions of dollars]

includes gold and silver prior to 1821.

<sup>1</sup> Period beginning Oct. 1, 1842, and ending June 30, 1843.

# 2. 1007.—EXPORTS AND IMPORTS OF MERCHANDISE, PER CAPITA: 1791 TO 1947

port figures for 1791 to 1820 are based on total exports including reexports (the latter were then relatively large) and for 1821 to date, on exports of United States merchandise only, shown in table 1003. Import figures for 1791 to 1820 are based on general imports shown in table 1003, for 1821 to 1870, total imports less reexports, and for 1871 to date, imports for consumption, shown in table 1003.]

# No. 1008.—MERCHANDISE TRADE OF CONTINENTAL UNITED STATES WITH FOREIGN COUNTRIES AND OUTLYING TERRITORIES AND POSSESSIONS: 1903 TO 1946

**IMPORTANT NOTE.**—This table differs as to its geographic basis from all other foreign trade tables in this section and in other publications: (1) In the case of other tables the data represent the trade of the United States customs area with all foreign countries, including the Philippine Islands and prior to 1935, the Virgin Islands. The U. S. customs area comprises continental U. S., Alaska, Hawaii, Puerto Rico, and during 1935 through 1939, the Virgin Islands. Trade between continental U. S. and the territories mentioned as part of the customs area are therefore excluded from these data. (2) The present table takes continental United States as the basis. In the totals, trade between it and all United States Territories and possessions is included, while the trade between that part of the customs area outside of continental United States and foreign countries is excluded. Practically all other nations calculate their foreign trade in the manner followed in the present table; that is, totaling the trade of the home country with foreign countries and with all outlying areas. Prior to 1901 Alaska was our only outlying area. Therefore, our foreign trade statistics for 1900 and earlier years very nearly represent the trade of continental United States with foreign countries. Data are for years ending June 30 through 1918; thereafter, for years ending Dec. 31.

(In thousands of dollars)

YEARLY AVERAGE OR YEAR	EXPORTS <sup>1</sup>			IMPORTS

**No. 1015.—EXPORTS OF U. S. MERCHANDISE AND IMPORTS—INDEXES OF CHANGES  
IN QUANTITY, UNIT VALUE (PRICE), AND TOTAL VALUE: 1913 TO 1947**

[Quantity and unit value indexes have been constructed by so-called "ideal formula," essential feature of which is use of quantities of several articles as weighting factors of their unit values for each pair of years compared. About 265 commodities were included in direct calculations for both exports and imports. It was then assumed that prices of articles in each economic class not directly covered had moved in parallel with those of articles covered and their value, adjusted by computed price index, was included in aggregative totals from which quantity index for each class was calculated. Index of quantity and unit value of total exports and imports was based on aggregate of adjusted totals of classes. In constructing indexes, data for 1919 were linked directly to 1913, and each subsequent year was compared with that preceding. Resulting year-to-year percentages were made into a series by chain method]

[1923-25 average=100]

## No. 1018.—EXPORTS OF UNITED STATES MERCHANDISE—VALUE OF SELECTED ARTICLES: 1821 TO 1946

[For basis of dollar values, except export figures for 1865 and 1870-78, see general note, p. 899. Export figures for those years are mixed gold and currency values. Figures are for fiscal years ending Sept. 30 through 1890, and June 30, 1890 through 1915; calendar years thereafter. In some cases blanks represent entire absence of trade; in other cases the item is not available separately]

[In thousands of dollars]

YEAR OR YEARLY AVERAGE	Meat products	Animal fats and oils	Leather	Rye	Wheat (including flour)	Oil cake and oil-cake meal	Fruits and nuts	Rubber and manufactures	Naval stores, gums, and resins	Tobacco, unmanufactured
1821					4,476				315	5,549

Excludes inedible fish oils. Excludes "lard compounds" beginning 1921; now classified as "vegetable cooking oil."

<sup>1</sup> Average for period July 1, 1915, to Dec. 31, 1920.<sup>2</sup> July to December.<sup>3</sup> Includes semimanufactures.

Source: See general note, p. 899.

## No. 1019.—IMPORTS—VALUE OF SELECTED COMMODITIES: 1821 to 1946.

[For basis of dollar values, see general note, p. 899. Figures represent "general imports" through 1933, "imports for consumption" thereafter, except as indicated. Figures cover fiscal years ending Sept. 30 through 1840, and June 30, 1880 through 1915; calendar years thereafter. In some cases blanks represent entire absence of trade; in other cases the item is not available separately.]

[In thousands of dollars]

notes for hats beginning 1921; formerly classified as miscellaneous textile products.  
 notes shreds and maple sugar prior to Oct. 4, 1913. \* Includes semimanufactures.  
 base for period July 1, 1918, to Dec. 31, 1920.  
 "total imports" through 1932; "imports for consumption" thereafter.  
 for December. \* Imports for consumption; see headnote.  
 paper transferred to fertilizers from chemicals beginning 1921.

see: See general note, p. 899.

779832°—48—59

No. 1020.—FOREIGN TRADE WITH EACH CONTINENT, BY ECONOMIC CLASSES:  
1931 TO 1945

(In millions of dollars. "Manufactured foodstuffs" includes beverages)

July 1, 1915, to Dec. 31, 1920.

2 years ending June 30. Shown because of influence of war on trade character.

Latin N. A. includes Iceland beginning 1942, Europe includes Iceland prior to 1942.

See general note, p. 899.

# No. 1028.—EXPORTS AND GENERAL IMPORTS, BY CONTINENTS—PERCENT DISTRIBUTION: 1821 TO 1946

<sup>1</sup> Less than \$500. © Average for 3 years. © Bahamas, Leeward and Windward Islands known as Other British West Indies prior to 1942. © Reported as noncontiguous territory beginning 1935. © Average for 1931-34. © Shipment for relief or charity and shipment to Andorra which is included with France. © For statistical purposes, trade with Germany was defined to include (as far as ascertainable) trade with German-occupied areas from the following dates to close of World War II: Austria, May 6, 1938; Sudeten area of Czechoslovakia, November 10, 1938; other Czechoslovak provinces (Protectorate of Bohemia-Moravia, and part of Slovakia), March 18, 1939, and Danzig and the German-occupied parts of Poland, November 16, 1939. Trade with Memel territory of Lithuania was also included with Germany beginning March 25, 1939. Similarly trade with Czechoslovak area occupied by Poland is included with Polish trade from

December 30, 1938, to November 16, 1939, while trade with that area of Czechoslovakia occupied by Hungary was defined to be trade with Hungary on December 30, 1938, and March 19, 1939, for the respective portions of Ruthenia and part of Slovakia occupied by Hungary on those dates. Though country classifications used in this table do not recognize de facto boundaries existing after World War II in regard to certain geographical areas, statistics are primarily in terms of this situation. For example, certain shipments credited to U. S. S. R. should probably be credited to Estonia, Latvia, Russian-occupied Poland, etc., but when the country of ultimate destination or origin of merchandise in terms of pre-war boundaries is not always readily ascertainable, the de facto situation is reflected in the statistics. © Shipments for relief for charity.

<sup>1</sup> As reported to Treasury Department by collectors of customs, subject in certain cases to subsequent refund as well as drawback. These figures are somewhat higher than duties as calculated on the basis of imports for consumption, as shown in table 1021.

<sup>2</sup> Includes \$19,483,000 for export shipments individually valued under \$25, except shipments by air; previously distributed by Customs Districts.

<sup>3</sup> Less than \$500.

<sup>4</sup> Duties less cost of collection are turned into the Islands Treasury; excluded from totals.

<sup>5</sup> Excluded from totals; not part of U. S. Customs area, assessed under Tariff law of Virgin Islands.

<sup>6</sup> Omaha included with Chicago.

Source: See general note, p. 899.

**No. 1028.—EXPORTS (INCLUDING REEXPORTS) AND IMPORTS OF MERCHANDISE,  
BY GROUPS OF CUSTOMS DISTRICTS: 1860 TO 1946**

[In thousands of dollars. For basis of dollar values, except export figures for 1865 and 1870-78, see general note, p. 899. Export figures for those years represent mixed gold and currency values and hence do not agree with the specie values given for total exports in other tables. Figures cover fiscal years to and including 1915, calendar years beginning 1916. Import data are "general imports" through 1933; "Imports for consumption" thereafter. Exports and imports of the interior districts, a small percentage of the total, are not included in this table]

# No. 1029.—EXPORTS (INCLUDING REEXPORTS) AND IMPORTS OF MERCHANDISE, BY PRINCIPAL CUSTOMS DISTRICTS: 1860 TO 1946

[In thousands of dollars. For basis of dollar values, except export figures for 1865 and 1870-78, see general note, p. 899. Export figures for those years represent mixed gold and currency values. Figures cover fiscal years to and including 1915; thereafter, calendar years. Import data are "general imports" through 1933; "imports for consumption" thereafter. Areas of districts were rearranged July 1, 1913. Prior to that date some of the districts were more restricted. However, in most cases this change only slightly affects the comparability of the figures. Prior to 1914 the statistics given in the table for Buffalo include the (former) districts of Buffalo Creek and Niagara; those for Michigan include the (former) districts of Superior, Huron, and Detroit; and those for Massachusetts and Maryland were the former districts of Boston and Baltimore, respectively]

### 681.—IMPORTS ENTERED FOR CONSUMPTION AND DUTIES THEREON: 1821 to 1945

*s of dollar values, see general note, p. 899. From 1821 to 1865, inclusive, figures of import values represent imports less reexports, and for 1867 and later years imports entered for consumption. \*Ratio of duties to is based upon values of imports shown in table. Figures cover fiscal years ending Sept. 30, 1821 to 1842, and 30, 1843 to 1915, calendar years thereafter]*

July 1, 1915, to Dec. 31, 1920. \* Based on estimated population including armed forces overseas.

See general note, p. 899.

# No. 1032.—IMPORTS OF MERCHANDISE, FREE AND DUTIABLE, AND PERCENT FREE, BY ECONOMIC CLASSES: 1821 TO 1946

[In thousands of dollars. For basis of dollar values, see general note, p. 809. Figures cover fiscal years ending Sept. 30, 1821 to 1840, and June 30, 1850 to 1915; calendar years thereafter, except as noted. Data are "general imports" through 1933; "imports for consumption" beginning 1934. Percentage free in general imports is normally slightly lower than in imports for consumption because relatively more of dutiable general imports are reported as reexported than of free general imports. Moreover, in the period 1922-1933, there is an understatement of free goods in general imports because, for 1922 to 1933, carpet wool used for making carpets and, for 1922 to 1928, wheat imported for milling in bond for exports were reported as dutiable when entered, although no duty was ultimately paid on these products. For adjusted figures see table 492 of 1935 issue of Statistical Abstract]

YEAR OR YEARLY AVERAGE	TOTAL			CRUDE MATERIALS			CRUDE FOODSTUFFS AND FOOD ANIMALS		
	Free	Dutiable	Percent free	Free	Dutiable	Percent free	Free	Dutiable	Percent free

## 31. Commerce of Territories and Possessions

All statistics in this section, except as noted, were compiled by the Department of Commerce, Bureau of the Census beginning May 1941. Prior to that time, the data were compiled by the Bureau of Foreign and Domestic Commerce. These statistics are published in the Monthly Summary of Foreign Commerce of the United States. In the general foreign trade statistics in the preceding section, the Virgin Islands is treated as a foreign country prior to 1935 and its trade with the United States is included while its trade with other countries is not included. On the other hand, Alaska, Hawaii, and Puerto Rico, and for 1935-39, the Virgin Islands, are treated as integral parts of the United States, so that trade between them and continental United States is not included, while trade between them and foreign countries is included. Each of these territories appears as a separate customs district, but beginning with 1940, trade of the Virgin Islands has been excluded from the merchandise export and import figures. Neither trade of American Samoa and Guam with foreign countries nor shipments between them and the United States are included in the general tables on foreign trade. See also table 1008, p. 906.

The tables in this section present the total foreign trade of each of the U. S. Territories and possessions and show separately the trade with continental United States (unless otherwise indicated) and with foreign countries, including other U. S. Territories and possessions. For basis of dollar values, see general note, p. 899.

### No. 1035.—IMPORTS AND EXPORTS OF ALASKA: 1882 TO 1946

(In 1946 Alaska shipped domestic silver valued at \$19,260 to the United States)

See general note, p. 944.

## 32. Distribution and Services

Data in this section relate to continental United States.

For additional or related data on distribution and service trades other than those included in this section, consult the index.

### CENSUS OF BUSINESS

The primary source of data on distribution and services is the Census of Business. The first Census of Business covered the calendar year 1929. Although the next was scheduled by law to cover the year 1939, two special censuses covering the years 1933 and 1935 were taken before the regular 1939 census conducted as part of the 16th Census of the United States.

The business establishments covered in the distribution and service fields included in the Census of Business may be generally described as follows:

**Retail trade.**—Places of business primarily engaged in selling merchandise in a retail manner to personal and household consumers;

**Wholesale trade.**—Establishments primarily engaged in selling goods to dealers and distributors for resale or to purchasers who buy for business uses; and,

**Service.**—Establishments engaged primarily in selling services as contrasted with merchandise as in the case of retail and wholesale trade.

In order that the coverage of distribution operations be complete, the censuses taken in 1929, 1935, and 1939 included information on the distribution of manufacturers' sales showing the proportion of manufacturers' output flowing through various distribution channels.

The most important differences in scope among the four Censuses of Business are to be found in the coverage of service enterprises. Service establishments were not included in the 1929 Census of Business at all. In 1933 the Census of Business was expanded to include certain service enterprises. These can be broadly classified into the following five major groups: (1) personal services, such as barber shops, laundries, etc., (2) selected business services, (3) repair services, (4) places of amusement, and (5) hotels. The 1935 Business Census added a number of important businesses among which were banking and finance, motor transportation, real estate agencies, warehousing, insurance, and radio broadcasting. The types of business added in 1935 were dropped in 1939 along with a number of minor types of service business.

In addition to observing the changes in the coverage of establishments from census to census, it is important to take cognizance of the kind of businesses, broadly defined, not included in any Census of Business. Outstanding in this group are the business activities of doctors, lawyers, dentists, and others performing a professional or scientific service, educational institutions, religious or charitable institutions, hospitals and infirmaries, public utilities, and government operated enterprises. In the past, these types of economic activity have been omitted largely because of problems in obtaining information or because reasonably adequate data were already available from other sources.

In many of the following tables data from the various Censuses of Business are compared. Adjustments have been made in the figures to make allowances for the changes in scope among the various years compared.

## CURRENT STATISTICS

**Wholesale trade.**—Monthly statistics on wholesalers' sales, inventories, and credits are compiled and published by the Bureau of the Census. These data are compiled on a sampling basis, covering 2,500 to 3,000 firms. Using these survey data as a basis, monthly estimates of aggregate sales of wholesalers raised to national totals are prepared by the Bureau of Foreign and Domestic Commerce and published in the Survey of Current Business.

Financial statistics relating to corporations in wholesale trade are available from the annual reports, Statistics of Income, published by the Bureau of Internal Revenue.

Current data on the production, movement, stocks, carry-over, receipts, and disappearances at principal markets, etc., for major agricultural commodities are available from the Production and Marketing Administration, Department of Agriculture.

As part of its investigations, the Federal Trade Commission has collected operating statistics on wholesalers as well as on the wholesale business of chains in various lines. Financial statistics on corporations engaged in wholesale trade whose securities are listed on the national security exchanges are available from the Securities and Exchange Commission.

**Retail trade.**—The Bureau of the Census compiles and publishes monthly statistics on trends in independent retail store sales, by kind of business, for the country as a whole and for selected large cities and other local areas; monthly data for all retail trade combined are also provided for a large number of additional cities and local areas. These data are based on reports from a sample of some 55,000 stores. The Census Bureau also issues jointly with the Office of Business Economics of the Bureau of Foreign and Domestic Commerce monthly statistics on the trends and dollar volume of retail chain store and mail-order house sales nationally by kind of business. Monthly estimates of the dollar volume of retail sales by kind of business groups are prepared by the Office of Business Economics and are published currently in the Survey of Current Business.

Indexes of department store sales and stocks are compiled by the Board of Governors of the Federal Reserve System and by each of the 12 Federal Reserve Banks for its district. These indexes are published monthly in the Federal Reserve Bulletin and also in the Survey of Current Business. Monthly and annual statistics on consumer credit are compiled by the Board of Governors of the Federal Reserve System and published currently in the Federal Reserve Bulletin. Financial data for corporations engaged in retail trade and filing income tax returns are published by the Bureau of Internal Revenue in its annual report, Statistics of Income. Financial statistics on corporations engaged in retail trade whose securities are listed on the national securities exchanges are available from the Securities and Exchange Commission.

**Service trades.**—Typical of the numerous current statistical reports on personal and business services compiled by private agencies are the Horwath Hotel Accountant, Interiors Ink, and National Advertising Records. Financial statistics of service businesses derived from corporation income tax returns are compiled and published annually by the Bureau of Internal Revenue in its annual report, Statistics of Income. The Bureau of Census compiles and publishes monthly statistics on trends in receipts of selected personal service trades nationally and in selected large cities and local areas, based on a sample of 3,000 establishments. Other current data on service trades are provided by the Bureau of Foreign and Domestic Commerce in its quarterly and annual estimates of consumption expenditures published in the Survey of Current Business.

**No. 1043.—MANUFACTURERS' SALES—DISTRIBUTION, BY PRIMARY CHANNELS,  
BY INDUSTRY GROUPS: 1929, 1935, AND 1939**

[No data are included for following classes of industries: (1) Those in which no sales were made, plants being maintained for purpose of making repairs; (2) those in which plants were engaged primarily in performing labor on materials owned by others so that their sales represented sales of services rather than commodities. This table is limited to industries for which 1929, 1935, and 1939 figures are directly comparable, whereas table 1044 covers all industries for which 1939 figures are available. For comparative purposes, data covering direct export are excluded]

<sup>1</sup> Includes sales of certain milk dealers in the amount of \$130,000,000, not included in tables 1051, 1057, and 1059. Data for these concerns were received too late for inclusion in summary tables for 1929.

<sup>2</sup> Much of increase in sales of filling stations from 1929 to 1939 results from change in classification. Garages primarily selling gasoline and oil were classified separately as garages in 1929 Census of Retail Trade and included in filling station category in 1939 Census of Retail Trade.

Source: 1929 through 1939, Department of Commerce, Bureau of the Census; Census of Business, 1939, Vol. I, Retail Trade, Part 3. Other years, estimates by Department of Commerce, Bureau of Foreign and Domestic Commerce, based on trends shown by statistics available currently; published currently in Survey of Current Business.

<sup>1</sup> Figures for 1935 revised to exclude service garages; data to adjust 1929 figures not available.

<sup>2</sup> Represents, in addition to chain data shown in tables 1057 and 1058, data for multiunit organizations with 4 or more retail units, such as public utility stores, State liquor stores, direct selling (house-to-house), and other lesser types.

<sup>3</sup> Not strictly comparable with previous years; a schedule form provided for reporting warehouse operations for 1939 resulted in the receipt of a greater number of separate reports.

<sup>4</sup> Data not available.

<sup>5</sup> Includes estimates for a small number of warehouses for which billings were not reported.

Source of tables 1055 and 1056: Department of Commerce, Bureau of the Census; Census of Business, 1939, Vol. 1, Retail Trade, Part 3, for table 1055; Part 1, for table 1056.

# 7.—RETAIL TRADE—NUMBER OF STORES AND SALES, BY TYPE OF OPERATION: 1929, 1935, AND 1939

[Figures for 1929 and 1935 have been adjusted between types as grouped for 1939]

<sup>1</sup>and pay roll include paid executives of corporations but not number and compensation of proprietors of unincorporated businesses.

<sup>2</sup>one-tenth of 1 percent.

Department of Commerce, Bureau of the Census; Census of Business, 1939, Vol. I, Retail Trade.

## No. 1059.—RETAIL TRADE—SUMMARY, BY STATES: 1929, 1935, AND 1939

[Data for 1929 and 1935 revised to exclude service garages and other automotive service businesses whose receipts from service sales exceeded their sales of merchandise. These are included in the Census of Service Establishments for 1939]

DIVISION AND STATE	NUMBER OF STORES			SALES (THOUSANDS OF DOLLARS)			ACTIVE PROPRIETORS OF UNINCORPORATED BUSINESSES

12.—SALES OF NEW PASSENGER AUTOMOBILES—INDEXES OF DOLLAR SALES  
ADJUSTED FOR SEASONAL VARIATION: 1929 TO 1941

Consumer outlay on new passenger automobiles relative to base period 1935-39. Based on actual dollar sales of new cars sold by dealers each month, converted to a dollar basis by application of an estimated average price per car. Number of cars sold was reported each month to Automobile Manufacturers' Association and represents 95 percent of all dealers' sales. Series discontinued for the duration of the war will be resumed when data become available.

[Daily average basis, 1935-39=100]

<sup>1</sup> Number and pay roll include paid executives of corporations but not number and compensation of proprietors of unincorporated businesses.

<sup>2</sup> For 1935, adjusted for comparison, are as follows: Number of establishments, 631,309; receipts, \$1,000,000,000. The adjustment was made by revising the original 1935 figures to include certain kinds of businesses included in the Service Census but were published in other census reports and by excluding others within the scope of the 1935 census but were omitted from the 1939 census. For a comparison of the industries, see source.

<sup>3</sup> For earlier years, see table 1058, p. 980.

<sup>4</sup> Manufacturing plants with products valued at less than \$5,000 and therefore not covered by the manufactures.

Department of Commerce, Bureau of the Census; Census of Business, 1939, Vol. III, Service Establishments.

## No. 1065.—SERVICE ESTABLISHMENTS—SUMMARY, BY STATES: 1939

[The census of service establishments covers a heterogeneous group of establishments (see table 1064) engaged primarily in the sale of service, as distinguished from establishments dealing in merchandise. The professional field, the financial, educational, transportation, construction, and diverse other fields of business activity, many of which are covered elsewhere, are not included. Owing to differences in the scope of the 1935 and 1939 censuses of service establishments, the aggregates for 1939 are not comparable with those for 1935 as published in the 1937-40 issues of the Abstract]

No. 1068.—POWER LAUNDRIES, CLEANING AND DYEING ESTABLISHMENTS, AND RUG CLEANING ESTABLISHMENTS—SUMMARY: 1919 TO 1939

[All money figures in thousands of dollars. Statistics cover establishments reporting receipts of \$5,000 or more except for 1939 figures in italics, which represent establishments reporting receipts of \$100 or more. The Census of Business for 1939 classified the establishments shown in this table as service establishments and covered those reporting receipts of \$100 or more. See also table 1064 for statistics for 1939. Statistics for 1935 and earlier years were compiled in connection with the Census of Manufactures. Rug cleaning was treated, in general, as an activity of the power laundry industry for 1929 and earlier years]

YEAR	Num-ber of estab-lish-ments	Propri-eters and firm mem-bers	Salaried employ-ees	Wage earners (average for year)	Salaries	Wages	Cost of sup-plies, fuel, and pur-chased electric energy	Cost of contract work	Re-ceipts for work done

No. 1069.—HOTELS—SUMMARY, 1929 TO 1939, AND BY SIZE, 1939

[The census coverage of hotels is restricted, in the main, to establishments which are designated as hotels and which provide hotel accommodations as their major business activity. For 1935 and 1939, the canvass was limited to hotels having at least 6 guest rooms or having receipts from room rentals amounting to at least \$500 for a full year's operations. Because of differences in coverage for 1929, 1933, 1935, and 1939, comparable data are available only for year-round hotels having 25 or more guest rooms]

YEAR	Num-ber of hotels	Number of guest rooms	Receipts (thou-sands of dollars)	Employees, full-time and part-time (average for year) <sup>1</sup>	Total pay roll (thou-sands of dollars) <sup>1</sup>
<b>All hotels:</b>					
1935.....	28,822	1,428,646	720,145	291,165	191,845
1939.....	27,987	1,444,390	863,155	338,029	243,228
<b>Year-round hotels with 25 or more guest rooms: <sup>2</sup></b>					
1929.....	11,873	1,005,684	873,508	<sup>3</sup> 267,903	232,137
1933.....	10,680	890,866	398,674	<sup>3</sup> 190,183	118,489
1935.....	11,373	934,661	565,317	<sup>3</sup> 234,491	158,400
1939.....	11,836	983,756	686,305	279,155	202,997

ITEM	SIZE OF HOTEL, 1939 (NUMBER OF GUEST ROOMS)				
	Less than 25 rooms	25 to 49 rooms	50 to 99 rooms	100 to 299 rooms	300 rooms and over
Number of hotels.....	12,136	8,156	4,626	2,521	546
Receipts (1,000 dollars).....	62,275	78,967	119,631	258,972	343,310
Active proprietors of unincorporated businesses.....	12,025	7,702	3,350	907	34
Employees, full-time and part-time (average for year) <sup>1</sup> .....	20,285	30,273	47,578	108,458	131,435

<sup>1</sup> Employees and pay roll include paid executives of corporations but not number and compensation of proprietors of unincorporated businesses.  
<sup>2</sup> No data included for California, as comparable figures for all years are not available.  
<sup>3</sup> Based on number of employees for April, July, October, and December.

## APPENDIX

### UNITED STATES UNITS WITH METRIC EQUIVALENTS

1 inch = 2.540 centimeters.	1 liquid quart = 0.9463 liter.
1 foot = 0.3048 meter.	1 gallon = 231 cubic inches = 3.785 liters.
1 yard = 0.9144 meter.	1 bushel (measured) = 2,150.4 cubic inches = 35.24 liters.
1 mile = 1.609 kilometers.	1 avoirdupois ounce = 28.35 grams.
1 square yard = 0.8361 square meter.	1 troy ounce = 31.10 grams.
1 acre = 0.4047 hectare.	1 pound = 0.4536 kilogram.
1 square mile = 2.590 square kilometers.	1 long ton = 2,240 pounds = 1.0160 metric tons of 1,000 kilograms.
1 cubic inch = 16.39 cubic centimeters.	1 short ton = 2,000 pounds = 0.9072 metric ton.
1 cubic foot = 0.02832 cubic meter.	
1 cubic yard = 0.7646 cubic meter.	

### UNITED STATES GALLON AND BUSHEL WITH BRITISH EQUIVALENTS

1 United States gallon = 231 cubic inches = 0.8331 imperial gallon.	1 United States bushel = 2,150.4 cubic inches = 0.9604 imperial bushel.
---	---

### OFFICIAL WEIGHTS OF THE BARREL OF NONLIQUID PRODUCTS

	Pounds	Kilograms
Wheat flour, barley flour, rye flour, and corn meal (net) <sup>1</sup> .....	196	88.90
Rosin, tar, and pitch (gross).....	500	226.80
Fish, pickled (net).....	200	90.72
Lime (net).....	200	90.72
Cement (4 bags counted as 1 barrel) (net) <sup>1</sup> .....	376	170.55

<sup>1</sup> Except as noted in the tables.

### OFFICIAL WEIGHTS OF THE UNITED STATES BUSHEL

	Pounds	Kilograms
Wheat, beans, peas, potatoes (Irish or white).....	60	27.22
Rye, corn (maize), linseed (flaxseed), maslin (mixed grain).....	56	25.40
Barley, buckwheat.....	48	21.77
Onions.....	57	25.86
Rough rice.....	45	20.41
Malt.....	34	15.42
Oats.....	32	14.51
Peanuts, green, in shell.....	22	9.98
Castor beans.....	50	22.68

### APPROXIMATE WEIGHT OF PETROLEUM AND PRODUCTS

In the United States petroleum and its products are measured by bulk, not weight. Whether handled in containers or without them the quantities are customarily reduced to the equivalent of barrels of 42 United States gallons (barrel thus equals 158.984 liters). In many foreign countries these commodities are measured by weight. The specific gravity of the different grades of crude petroleum and of the finished products varies materially. On the basis of approximate averages the Department of Commerce in converting foreign weight statistics to gallons or barrels of 42 gallons uses the factors shown in the following table:

	WEIGHT OF UNITED STATES GALLON		WEIGHT OF BARREL OF 42 GALLONS	
	Pounds	Kilo-grams	Pounds	Kilo-grams
Crude petroleum.....	7.3	3,311	306.6	139.07
Lubricating oils.....	7.0	3,175	294.0	133.36
Illuminating oils (kerosene).....	6.6	2,994	277.2	125.74
Gasoline and related products (motor spirit, benzine, etc.).....	6.1	2,767	258.2	116.21
Fuel and gas oils.....	7.7	3,493	322.4	146.00

of daily rates for that part of year during which quotations were certified.

of June 1945 official rates for Australian and British pounds were abolished, and after this date quoted buying rates in New York market. Rates shown represent averages for second half of 1945 and are the same as those quoted before 1940.

Nov. 1, 1942, official designation of Brazilian currency unit was "milreis."

quoted after July 22, 1944, is not strictly comparable to "free" rate shown before that date. Average for 1944 for July 1-19 is 5.1902, and for Jan. 1-July 19, 5.1400, while average for new rate for July 20-31 is 5.2300, and for 25-Dec. 31, 5.2065.

Board of Governors of the Federal Reserve System; annual and monthly figures published monthly in the Federal Reserve Bulletin.

## TABLES BY SOURCE

Table numbers followed by "co-op." indicate that the statistics were compiled in cooperation with another agency; those followed by "part" indicate that statistics from another source appear in the same table.

# BIBLIOGRAPHY OF SOURCES OF STATISTICAL DATA

This bibliography contains under the various subject headings references to the important primary sources of statistical information for the United States. Secondary sources have been referred to if the information contained therein is presented in a particularly convenient form or if primary sources are not readily available. One-time studies presenting compilations or estimates for several years or new types of data not available in regular series are included.

Much valuable information will also be found in State reports and in reports for particular commodities, industries, or similar segments of our economic and social structure. However, because of the large number of such references, they are not included here.

Section references on the right hand side of each page indicate where data from the report cited appear in the Statistical Abstract. Where current reports and a summary volume are both cited in the bibliography the section reference will often appear opposite the summary volume only. Reference to the sections indicated will enable the user to ascertain the type of information presented in the original source. However, it should not be assumed that all of the subjects from that source are summarized in the Abstract.

The location of the publisher of the report is given except for Federal governmental agencies located in Washington. Major inquiries, such as the Census of Population, are referred to by name rather than by specific volume references under the various topic headings. The final reports of the Sixteenth Census, which include those on the Censuses of Agriculture, Business, Manufactures, Mineral Industries, Population, and Housing, are listed at the end of the bibliography.

**aphy.**

**as of the United States: 1940.**

**ncorporated Communities by States, United States.**

**factures.**

**. I: Statistics by Subjects.**

**. II: Reports by Industries (2 parts).**

**art 1. Groups 1-10.**

**art 2. Groups 11-20.**

**. III: Reports for States and Outlying Areas.**

**er Reports:**

**lan-Hour Statistics for 171 Selected Industries (Cooperative Study—Bureau of the Census, U. S. Department of Commerce and Bureau of Labor Statistics, U. S. Department of Labor).**

**anges in the Distribution of Manufacturing Wage Earners 1899-1939 (Cooperative Study—Bureau of the Census, U. S. Department of Commerce and Bureau of Agricultural Economics, U. S. Department of Agriculture).**

**al Industries.**

**I: General Summary and Industry Statistics.**

**II: State and County Statistics.**

**tion.**

**I: Number of Inhabitants.**

**II: Characteristics of the Population (7 parts).**

**rt 1. U. S. Summary, Alabama-District of Columbia.**

**rt 2. Florida-Iowa.**

**rt 3. Kansas-Michigan.**

**rt 4. Minnesota-New Mexico.**

**rt 5. New York-Oregon.**

**rt 6. Pennsylvania-Texas.**

**rt 7. Utah-Wyoming.**

**III: The Labor Force (5 parts).**

**rt 1. United States Summary.**

**rt 2. Alabama-Indiana.**

**rt 3. Iowa-Montana.**

**rt 4. Nebraska-Oregon.**

**rt 5. Pennsylvania-Wyoming**

**V: Characteristics by Age (4 parts).**

**t 1. U. S. Summary.**

**t 2. Alabama-Louisiana.**

**t 3. Maine-North Dakota.**

**t 4. Ohio-Wyoming.**

**reports:**

**ational Attainment of Children by Rental Value of Home.**

**itutional Population 14 Years Old and Over.**

**comparative Occupation Statistics for the United States, 1870-1940.**

**mates of Labor Force, Employment, and Unemployment in the U. S., 1940 and 1930.**

**racteristics of the Nonwhite Population by Race.**

**rnal Migration, 1935 to 1940.**

**ge of Migrants.**

**olor and Sex of Migrants.**

**onomic Characteristics of Migrants.**

**cial Characteristics of Migrants.**

**of Birth of the Native Population.**

**Population—Continued****Other reports—Continued**

Nativity and Parentage of the White Population.

General Characteristics.

Foreign trade	920, 932, 946
Postal service	489
Public lands	160
Visitors to National Parks and Monuments	165, 166
Visits to National forests	719
Vital statistics:	
Births and birth rates:	
By age of mother	67
By cities	65
By person in attendance	70
By place of occurrence and residence	63, 65
By race	63
By sex	67
By States	63, 68-70
By urban and rural areas	60
Completeness of birth registration	66, 71
Excess over deaths	67, 79
Summary	66, 67, 70
Deaths and death rates ( <i>see also</i> Accidents and fatalities):	
By age groups and sex	74
By cause	75, 76, 80
By cities	65
By place of occurrence and residence	63, 65
By race	73, 74, 78
By States	63, 72, 73, 76-78
By urban and rural areas	73, 78
Infant	66, 74, 77-80
By age groups and sex	79
In mental institutions	85
In prisons and reformatories	90, 83
Maternal	66
Summary	66, 79
Life tables	80, 81
Marriages and divorces	89, 90
Mental patients and epileptics	85-88
Morbidity	82, 83
Registration area for births and deaths	63
National education and rehabilitation	142-145, 234, 243
rs:	
Congressional	315, 316
Electoral	311-313
Voting age. <i>See</i> Population.	
Wage earners ( <i>see also</i> Employees and Employment):	
Consumers' price indexes	302-304
Employment service placements	250-252
Federal work programs	246
Manufacturing industries:	
By industrial groups and industries	200, 831-850, 891-895
By size of establishments	826
By States	851
Indexes of employment	201-205
Summary	825

Wage earners—Continued	Page
Nonmanufacturing industries:	
Indexes of employment	206
Selected industries	206, 748, 750-752, 754, 890
Old-age and survivors insurance	249, 252, 253
Unemployment insurance	254-256, 259
Wage or salary income	276, 291
Wages and wage rates ( <i>see also</i> Salaries and wages and individual industries):	
Federal work programs	220, 222, 247
Manufacturing industries:	
Average earnings	217-219
Indexes of pay rolls	201-205
Industrial groups and industries	219, 831-850, 891-895
State distribution	851
Summary	825
Median, by years of school completed	127
Nonmanufacturing industries:	
Average earnings	220
Indexes of farm wages	199, 642
Indexes of pay rolls	206
Indexes of union rates	221
Industrial groups and industries	220, 621, 624, 629, 749, 751, 753, 754, 890
Old-age and survivors insurance	249, 252, 253
Unemployment insurance	254-256, 259
Wales, trade with United States	546
Immigration and emigration	107, 108
Wall paper:	
Manufacture, summary	839
Retail trade	971
Wholesale trade	956, 959
Wallboard, insulating board, etc., manufacture:	
Corporation income-tax returns	346
Indexes of employment and pay rolls	203
Summary	843
Walnuts:	
Production and value	648
Trees on farms	670
War Department ( <i>see also</i> Department of the Army):	
Civil service employees	208
Expenditures for	322, 324
Warehousing and storage services:	
Persons employed	180, 185, 187, 192, 976
Summary	976
Unemployment insurance	255
Washing machines and clothes wringers for household use:	
Manufacture:	
Indexes of employment and pay rolls	203
Summary	848
Production, value	884
Wholesale prices	301
Waste and scrap material, wholesale trade	959, 960
Watches and clocks:	
Foreign trade	913, 915
Manufacture:	
Indexes of employment and pay rolls	203
Summary	846
Repair establishments	977
Wholesale trade	958
Water-borne commerce	552-556, 562, 564-565
Water power:	
Annual supply of energy from	491
Developed and potential	501
Electric energy generated by	493, 496, 498
Installed capacity of generating plants	493, 495, 498, 501, 826
Water transportation:	
Corporation income-tax returns	348
Persons employed	192
Unemployment insurance	255
Water wheels and turbines, manufacture, summary	847
Watermelons, acreage, production, and value	667
Waterways, internal traffic	552-556
Wax, mineral production	773, 774
Wearing apparel. <i>See</i> Apparel and Knit goods.	
Weather conditions at selected stations	147-158
Welding shops, summary	977
Welfare services, under Social Security Act	243, 270
Well-drilling machinery, production, value	884
West Indies, trade with United States ( <i>see also</i> Cuba, Haiti, Dominican Republic, etc.)	506, 926, 942
Immigrants naturalized	114
Immigration and emigration	107, 108, 111
